SmartBiz BD

Complete story-to-screen journey

12 epics · 76 stories · 76 presentation screens

Bangla-first order-to-cash clarity for small online sellers in Bangladesh

SmartBiz BD in brief

The problem

Small Facebook and WhatsApp sellers can see sales, but returns, delivery charges, purchase cost, and COD deductions make real profit hard to know.

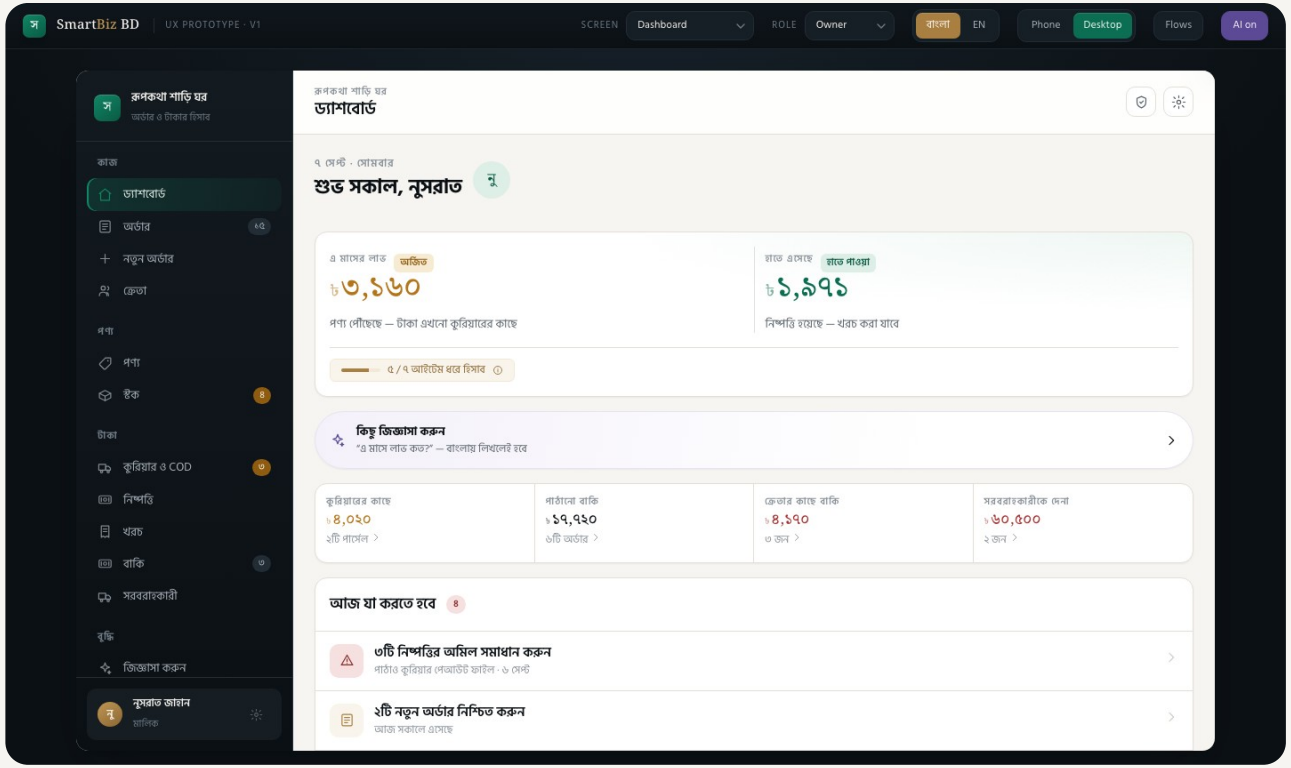

The product

One order-to-cash ledger follows each order from message capture through stock, delivery, collection, settlement, and realized profit.

The distinction

Every profit figure states its recognition basis and completeness. Missing cost stays visible instead of becoming false precision.

Primary audience: owner-led social-commerce businesses handling 10 to 50 orders a day.

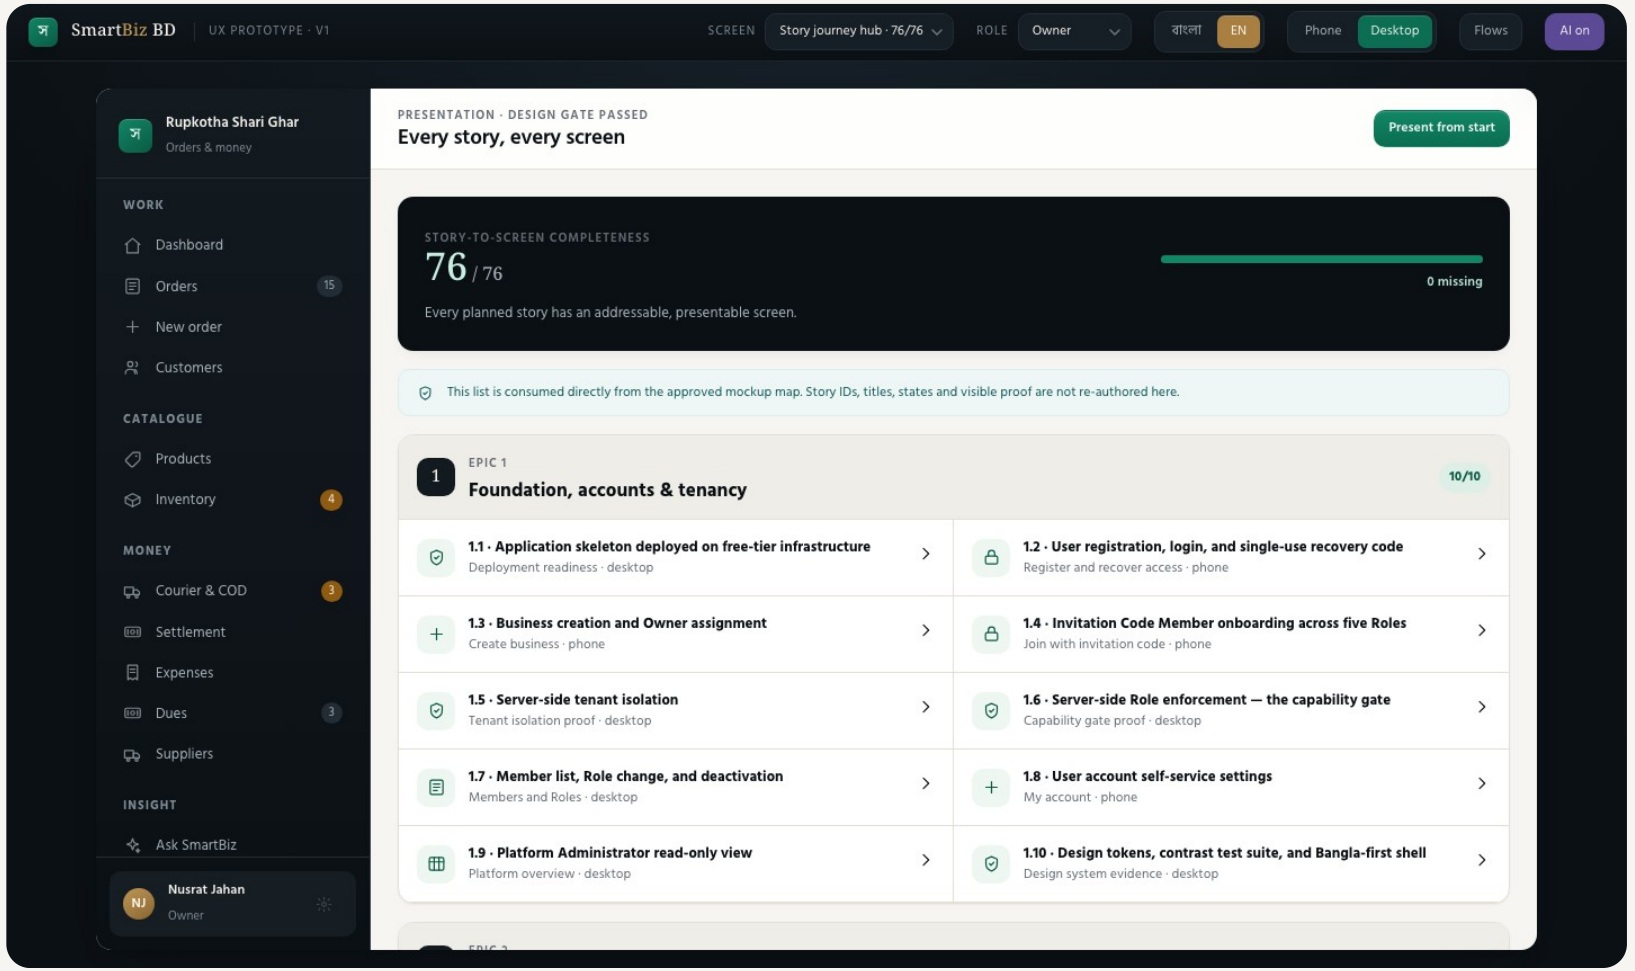

Journey coverage

76 / 76

Every story in epics.md has a directly addressable static prototype screen.

Sequence

Foundation first, then catalog, inventory, order lifecycle, settlement, reporting, audit, and safe insights.

How to read the journey

12 epics 76 stories 76 screens

Story order

Slides follow the exact epic and story sequence.

Each screen

A designed state, one primary action, and the evidence the audience should notice.

System stories

Tenant isolation, permissions, rendering, and AI safeguards appear as explicit proof surfaces.

The deck shows synthetic presentation data. It demonstrates UX coverage rather than production readiness.

EPIC 1 · STORY 1.1

Foundation, accounts & tenancy

Application skeleton deployed on free-tier infrastructure

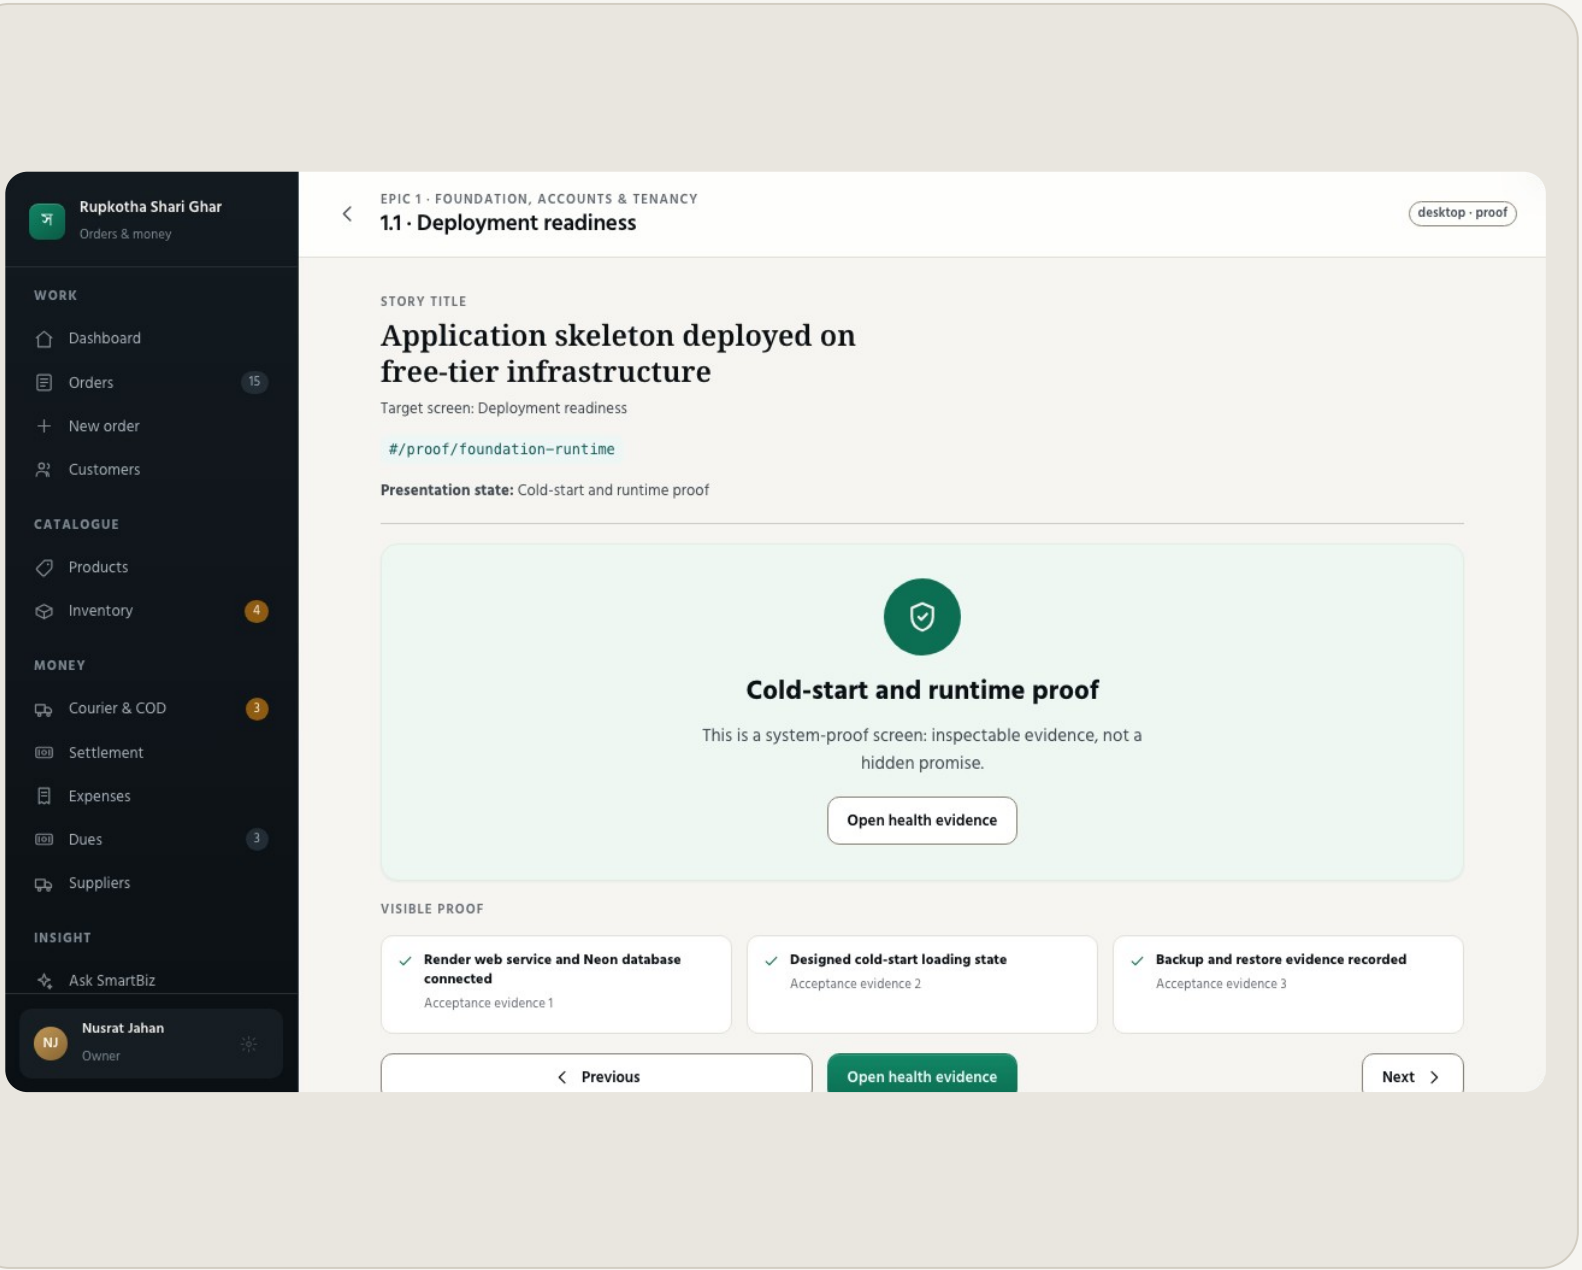

Deployment readiness

State: Cold-start and runtime proof

Visible proof

- ✓ Render web service and Neon database connected
- ✓ Designed cold-start loading state
- ✓ Backup and restore evidence recorded

Primary action: Open health evidence

EPIC 1 · STORY 1.2

Foundation, accounts & tenancy

User registration, login, and single-use recovery code

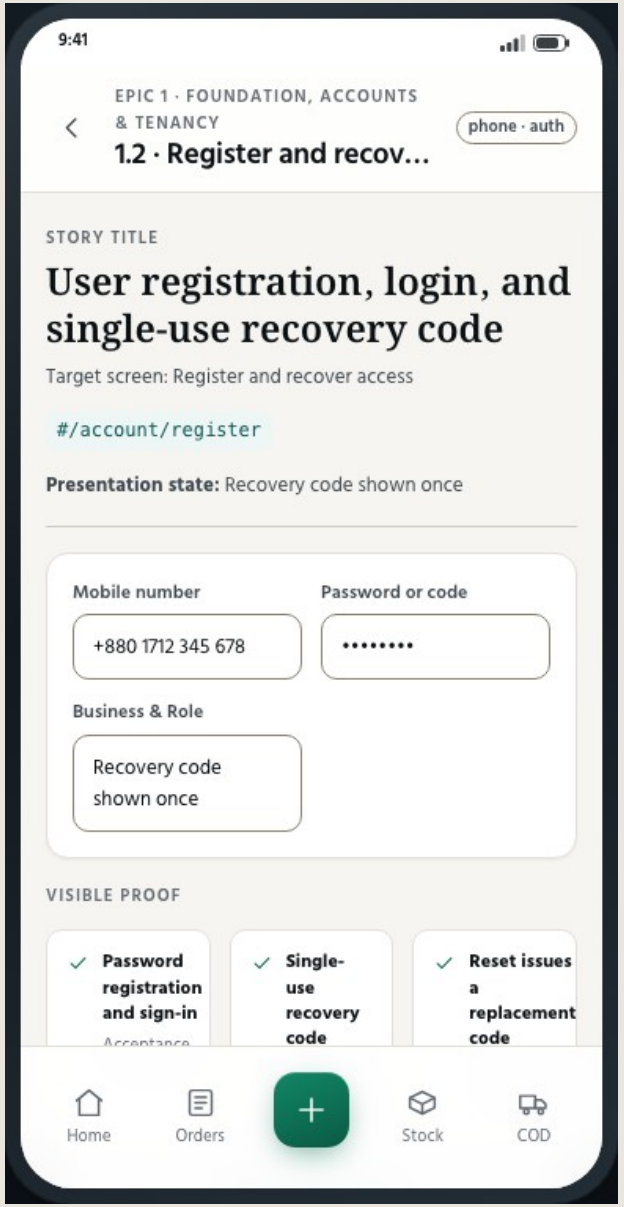

Register and recover access

State: Recovery code shown once

Visible proof

- ✓ Password registration and sign-in
- ✓ Single-use recovery code reveal
- ✓ Reset issues a replacement code

Primary action: Save recovery code

EPIC 1 · STORY 1.3

Foundation, accounts & tenancy

Business creation and Owner assignment

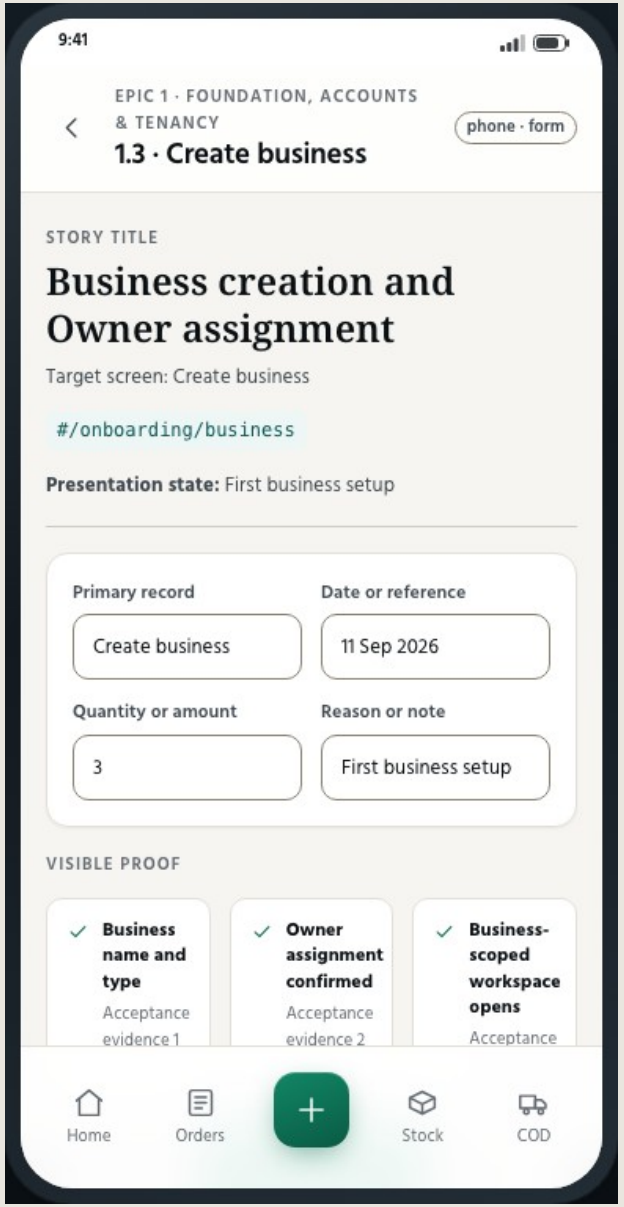

Create business

State: First business setup

Visible proof

- ✓ Business name and type
- ✓ Owner assignment confirmed
- ✓ Business-scoped workspace opens

Primary action: Create my business

EPIC 1 · STORY 1.4

Foundation, accounts & tenancy

Invitation Code Member onboarding across five Roles

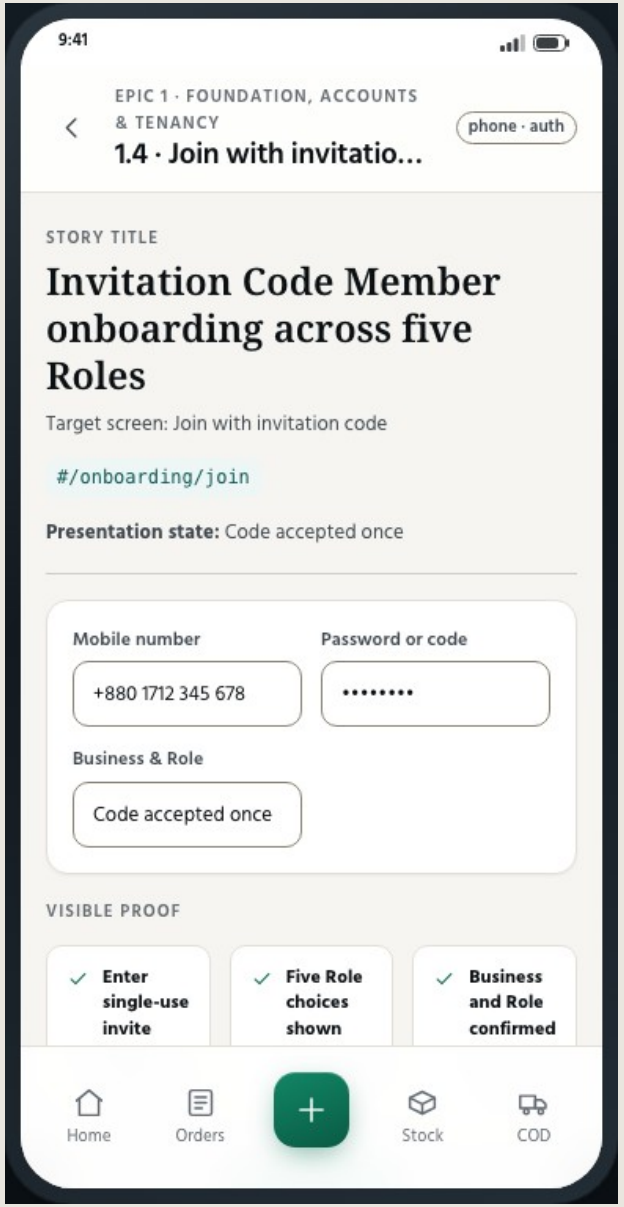

Join with invitation code

State: Code accepted once

Visible proof

- ✓ Enter single-use invite code
- ✓ Five Role choices shown
- ✓ Business and Role confirmed

Primary action: Join business

EPIC 1 · STORY 1.5

Foundation, accounts & tenancy

Server-side tenant isolation

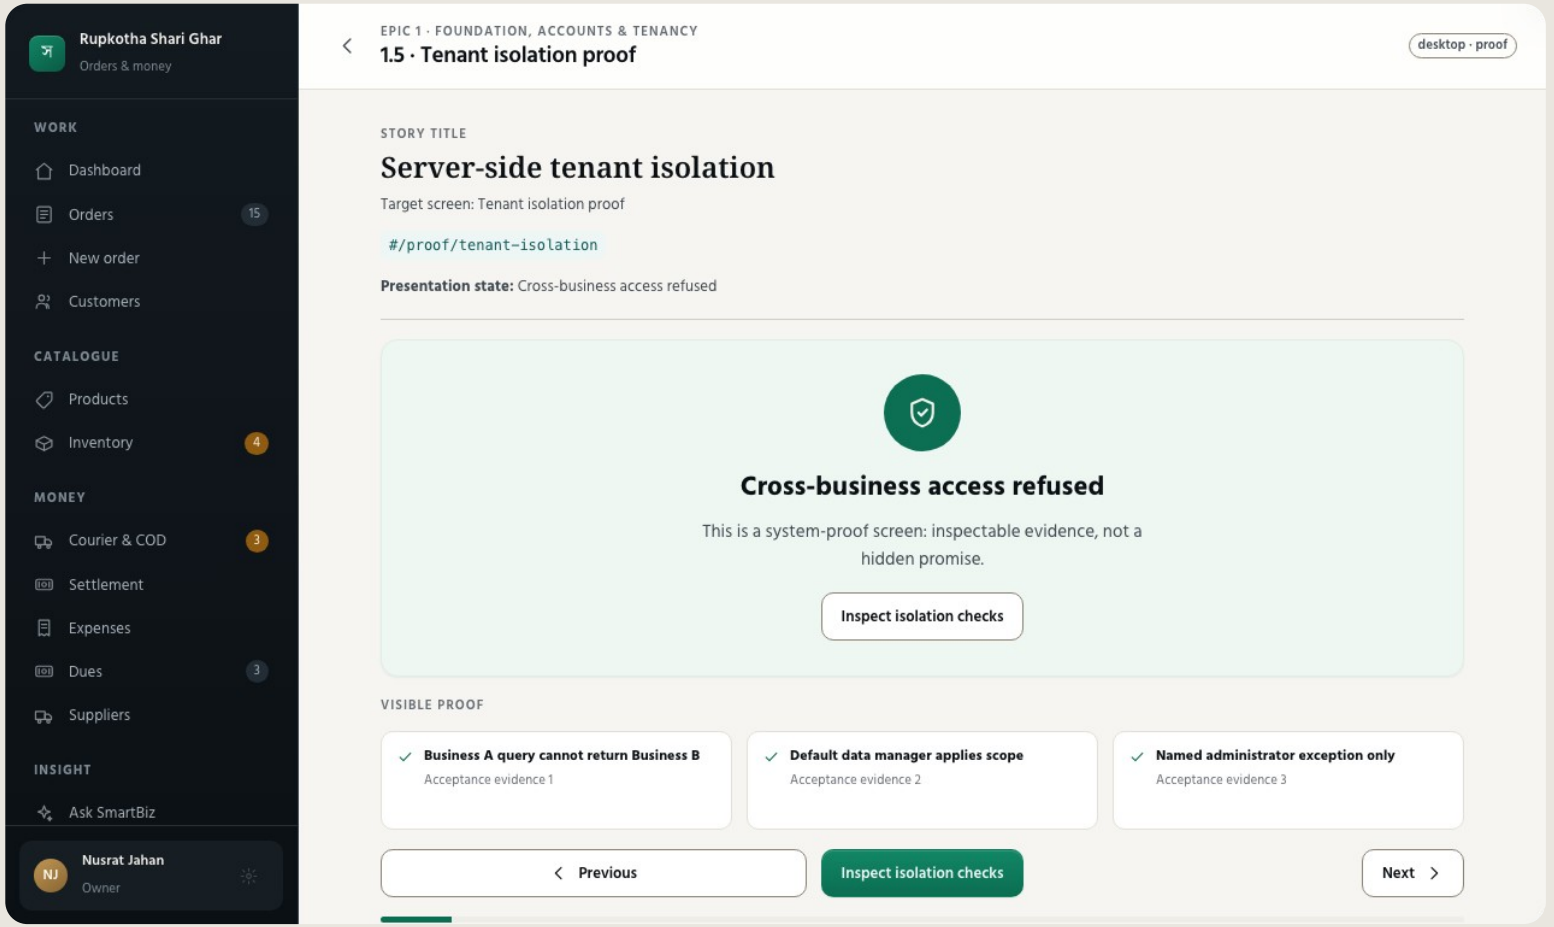

Tenant isolation proof

State: Cross-business access refused

Visible proof

- ✓ Business A query cannot return Business B
- ✓ Default data manager applies scope
- ✓ Named administrator exception only

Primary action: Inspect isolation checks

EPIC 1 · STORY 1.6

Foundation, accounts & tenancy

Server-side Role enforcement — the capability gate

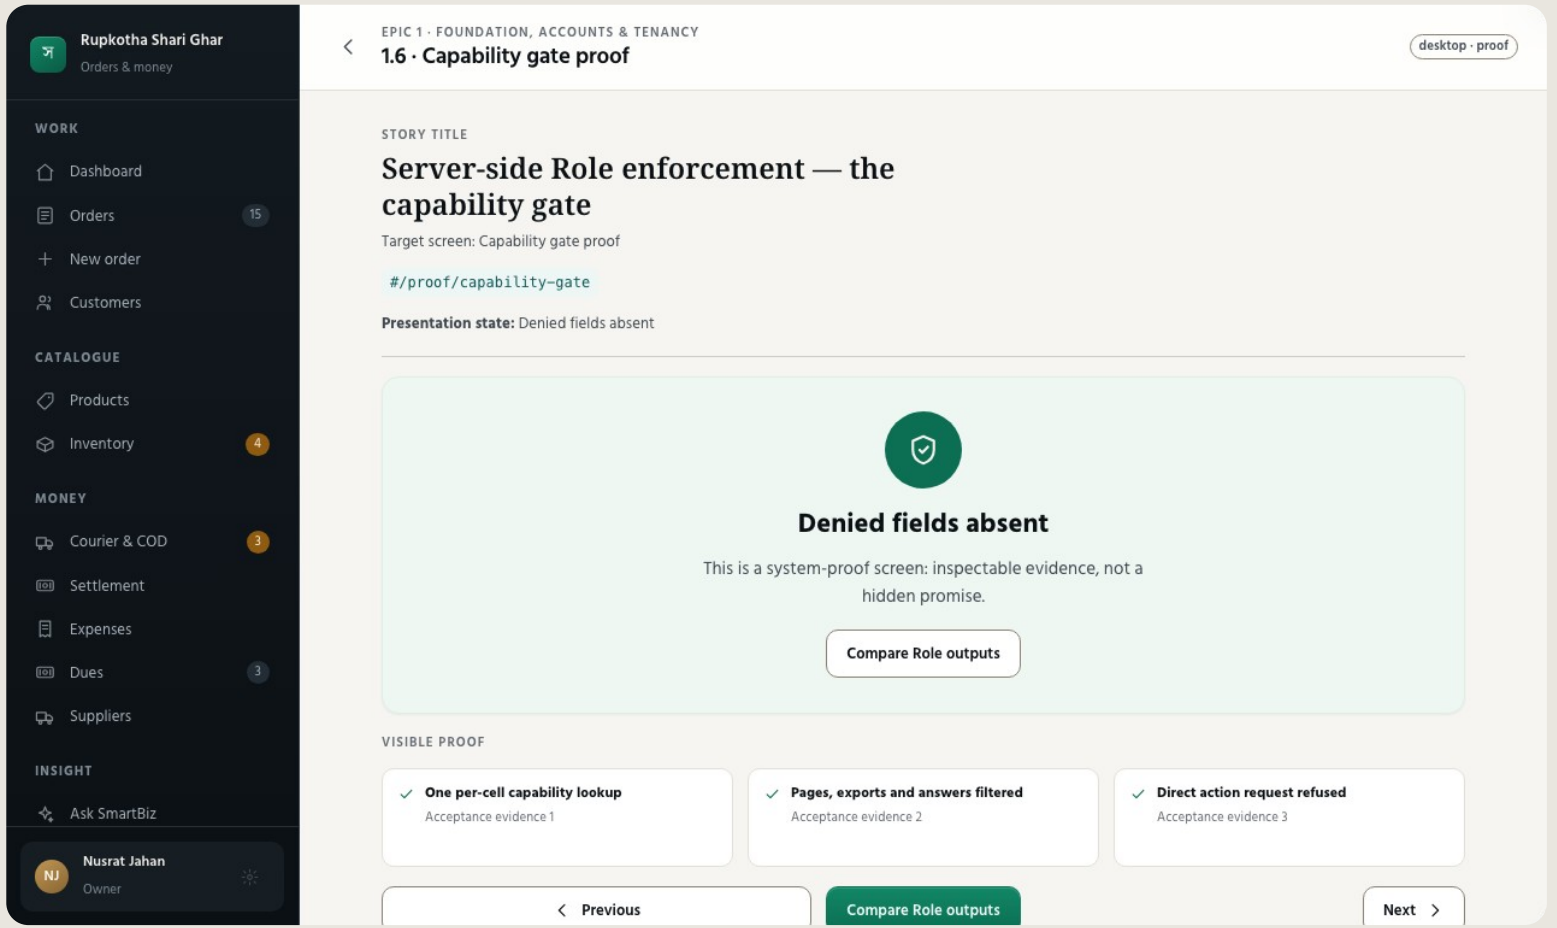

Capability gate proof

State: Denied fields absent

Visible proof

- ✓ One per-cell capability lookup
- ✓ Pages, exports and answers filtered
- ✓ Direct action request refused

Primary action: Compare Role outputs

EPIC 1 · STORY 1.7

Foundation, accounts & tenancy

Member list, Role change, and deactivation

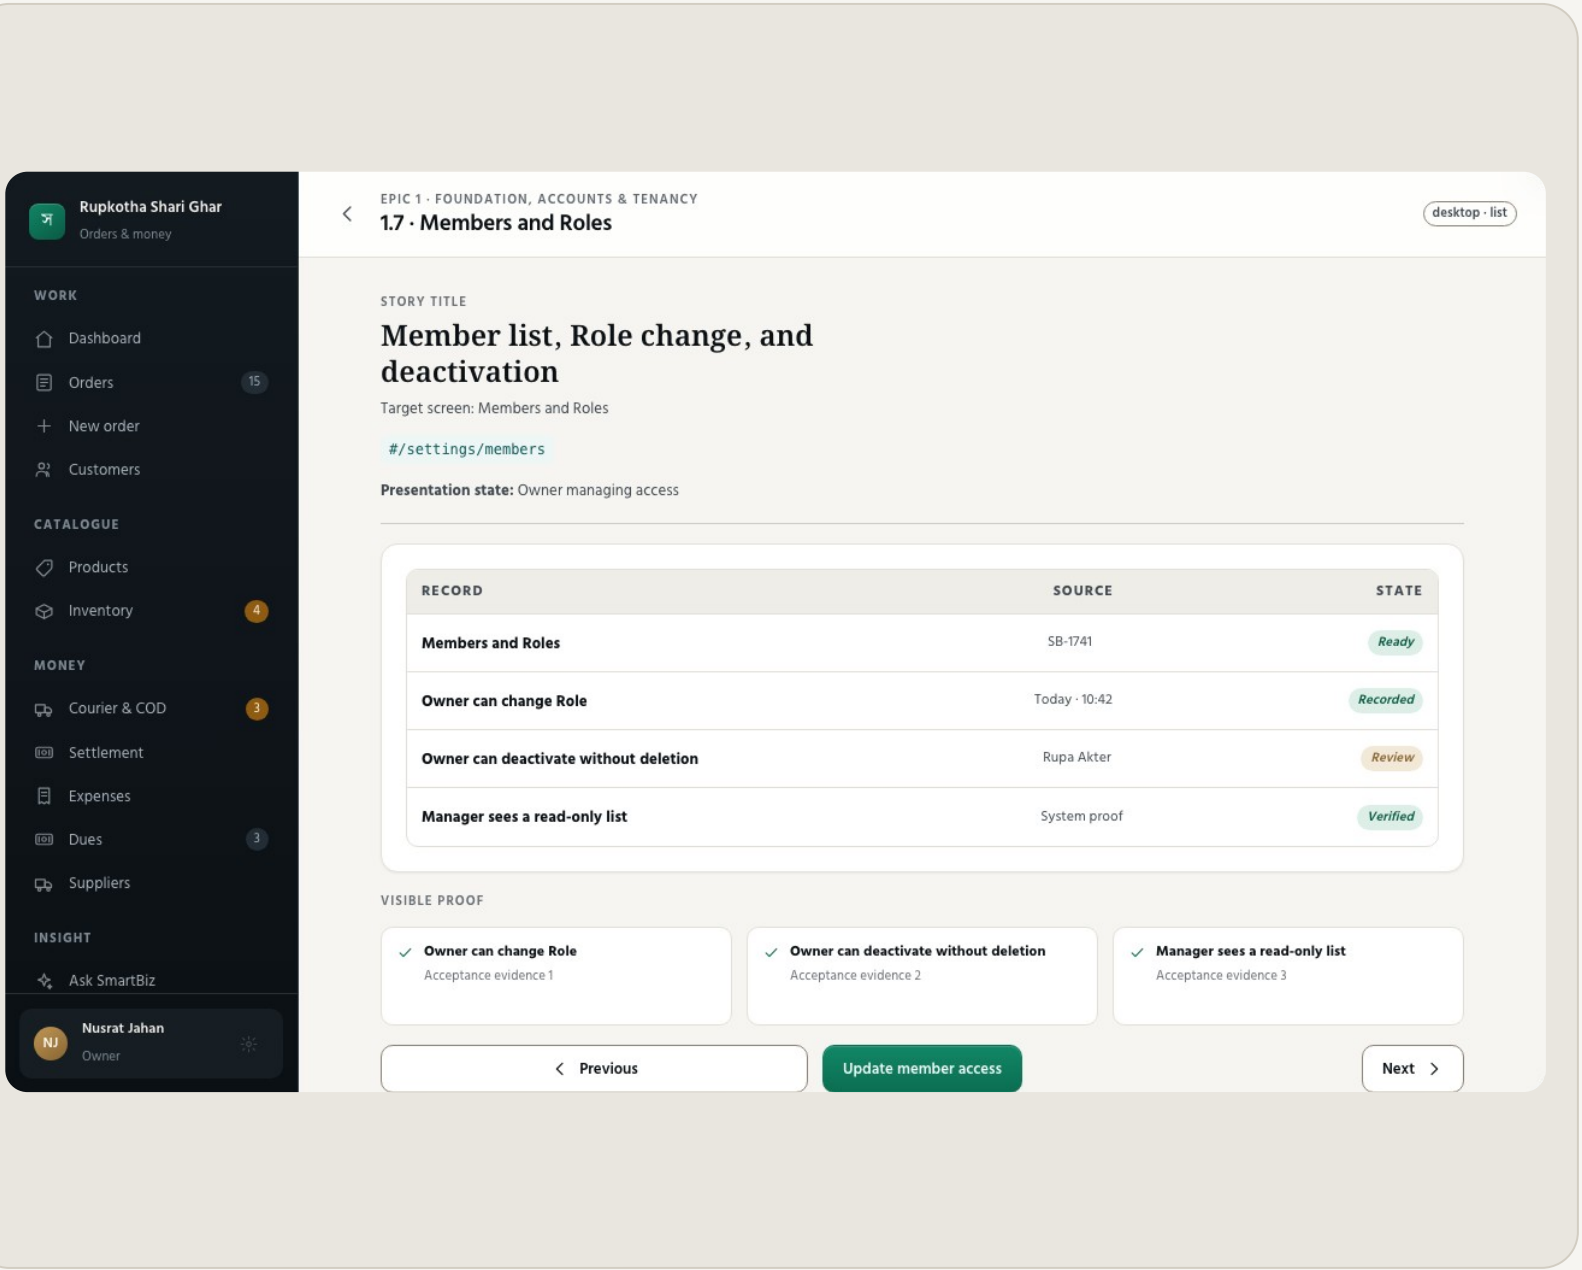

Members and Roles

State: Owner managing access

Visible proof

- ✓ Owner can change Role
- ✓ Owner can deactivate without deletion
- ✓ Manager sees a read-only list

Primary action: Update member access

EPIC 1 · STORY 1.8

Foundation, accounts & tenancy

User account self-service settings

My account

State: Profile and memberships

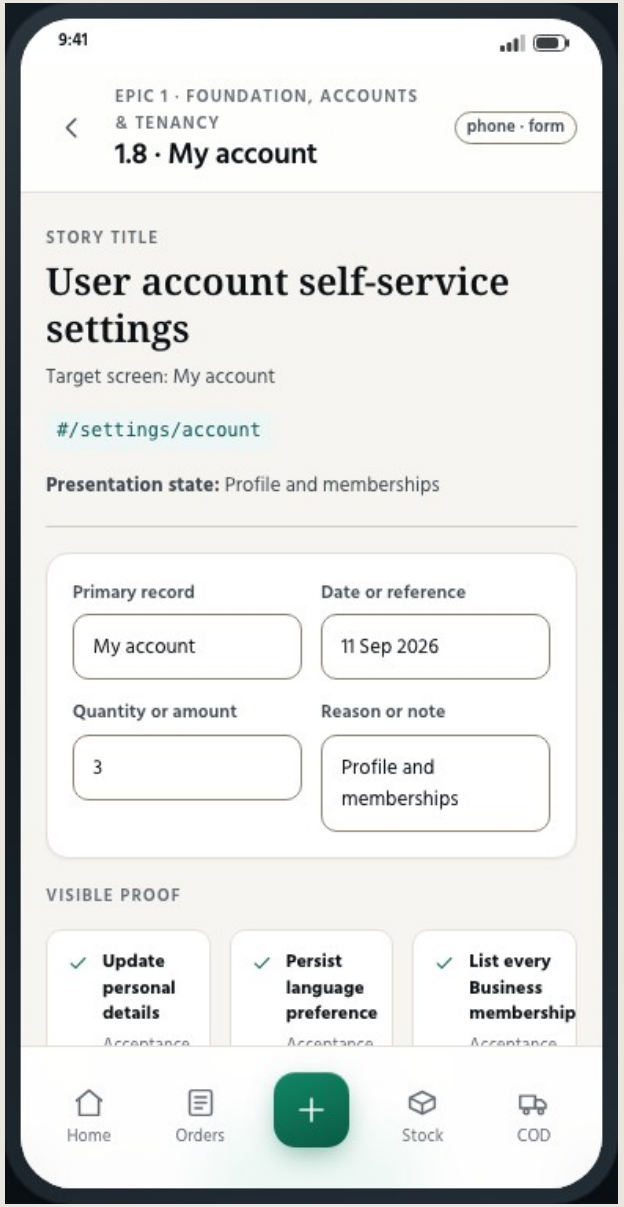

Visible proof

✓ Update personal details

✓ Persist language preference

✓ List every Business membership

Primary action: Save my settings

EPIC 1 · STORY 1.9

Foundation, accounts & tenancy

Platform Administrator read-only view

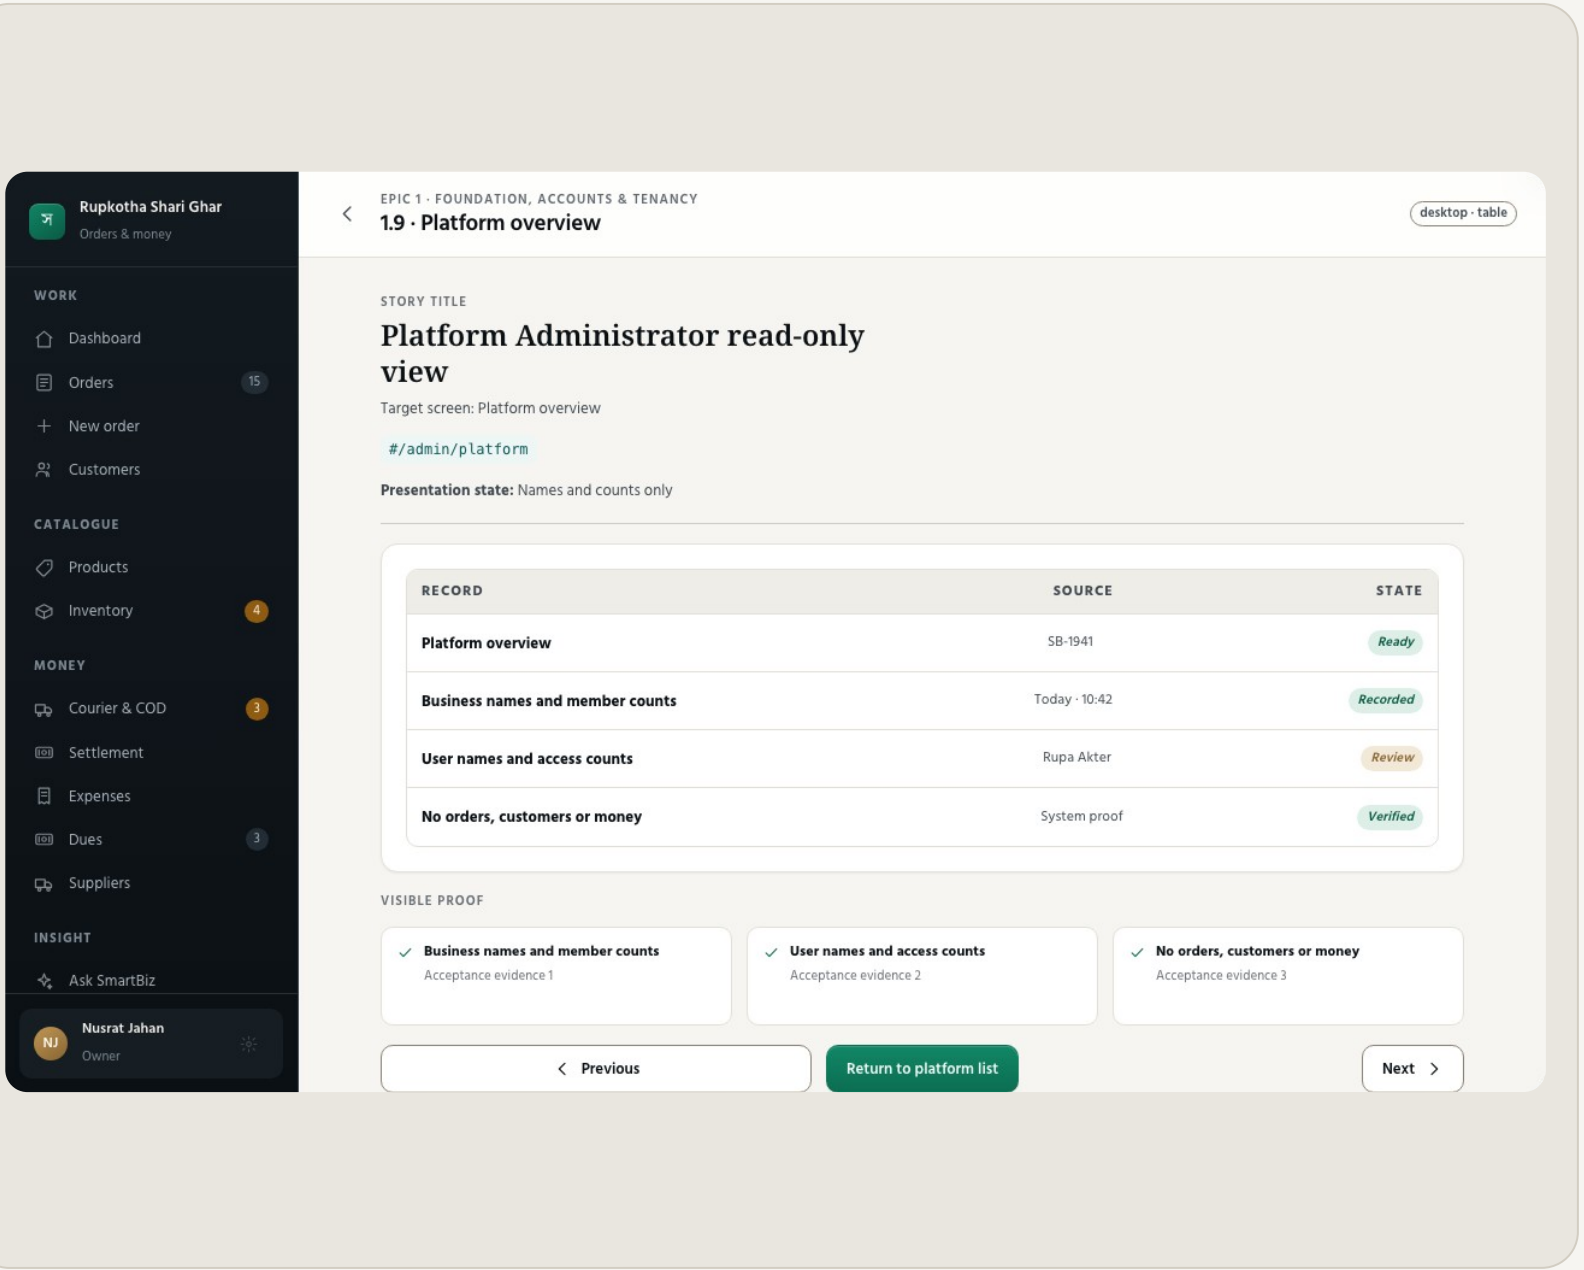

Platform overview

State: Names and counts only

Visible proof

- ✓ Business names and member counts
- ✓ User names and access counts
- ✓ No orders, customers or money

Primary action: Return to platform list

EPIC 1 · STORY 1.10

Foundation, accounts & tenancy

Design tokens, contrast test suite, and Bangla-first shell

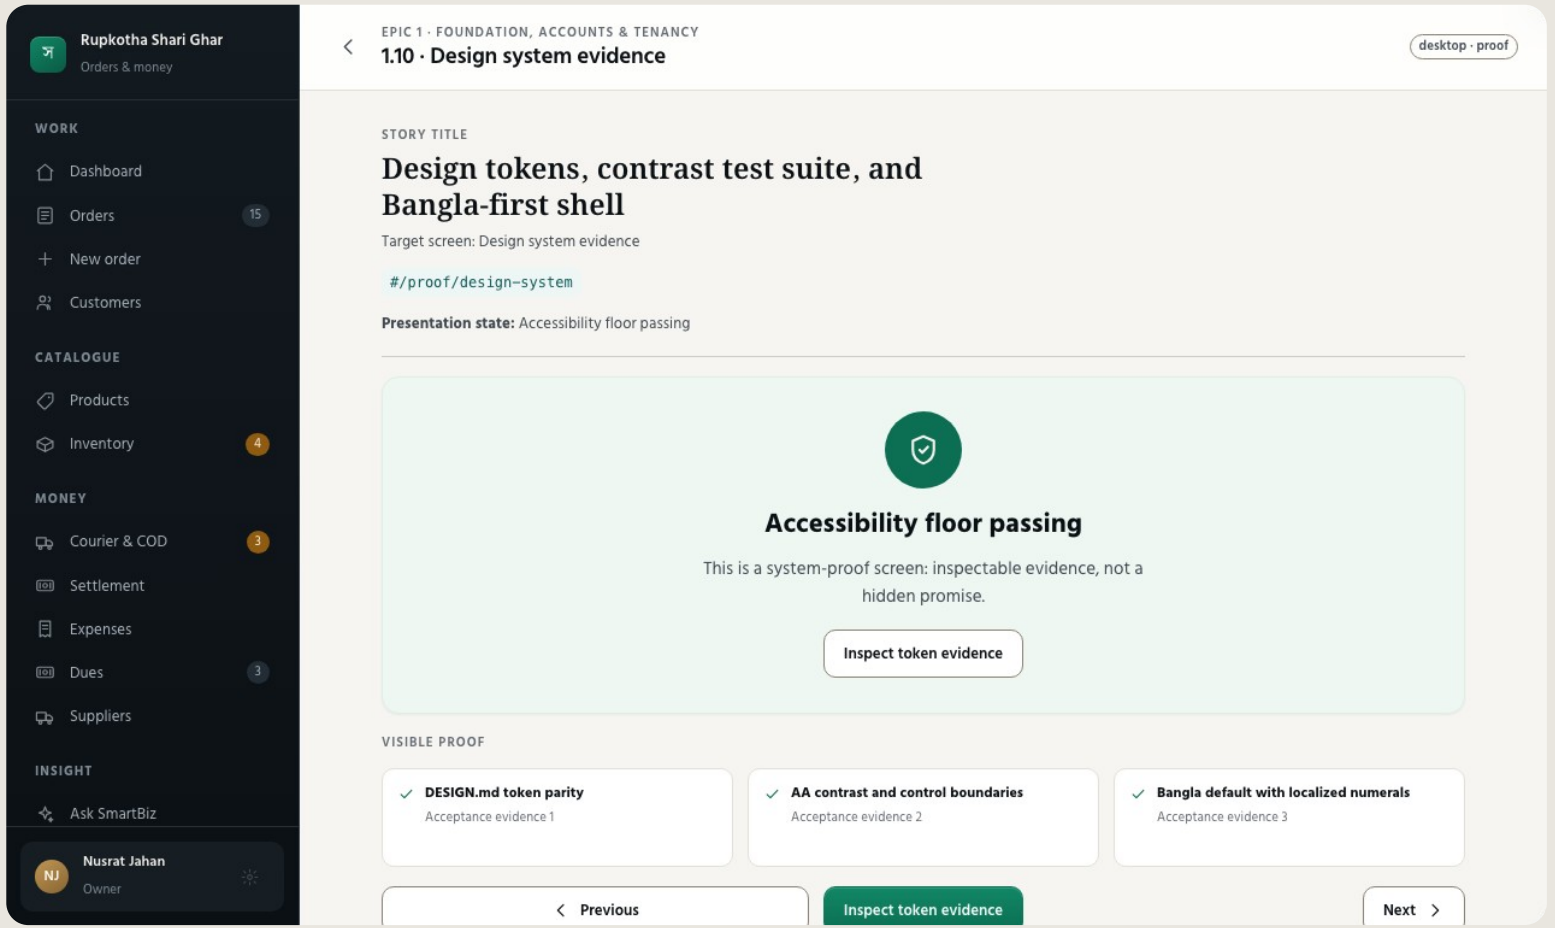

Design system evidence

State: Accessibility floor passing

Visible proof

- ✓ DESIGN.md token parity
- ✓ AA contrast and control boundaries
- ✓ Bangla default with localized numerals

Primary action: Inspect token evidence

EPIC 2 · STORY 2.1

Product catalog & variants

Product and category definition

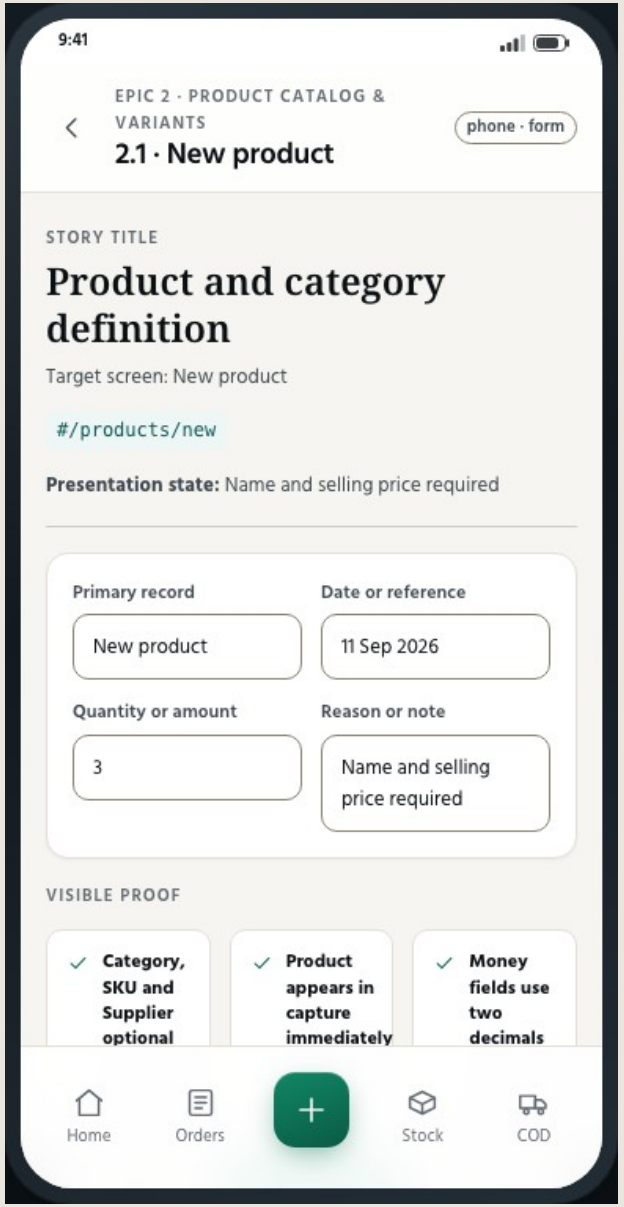

New product

State: Name and selling price required

Visible proof

- ✓ Category, SKU and Supplier optional
- ✓ Product appears in capture immediately
- ✓ Money fields use two decimals

Primary action: Save product

EPIC 2 · STORY 2.2

Product catalog & variants

Variant Dimensions definition

Variant dimensions

State: Three axes configured

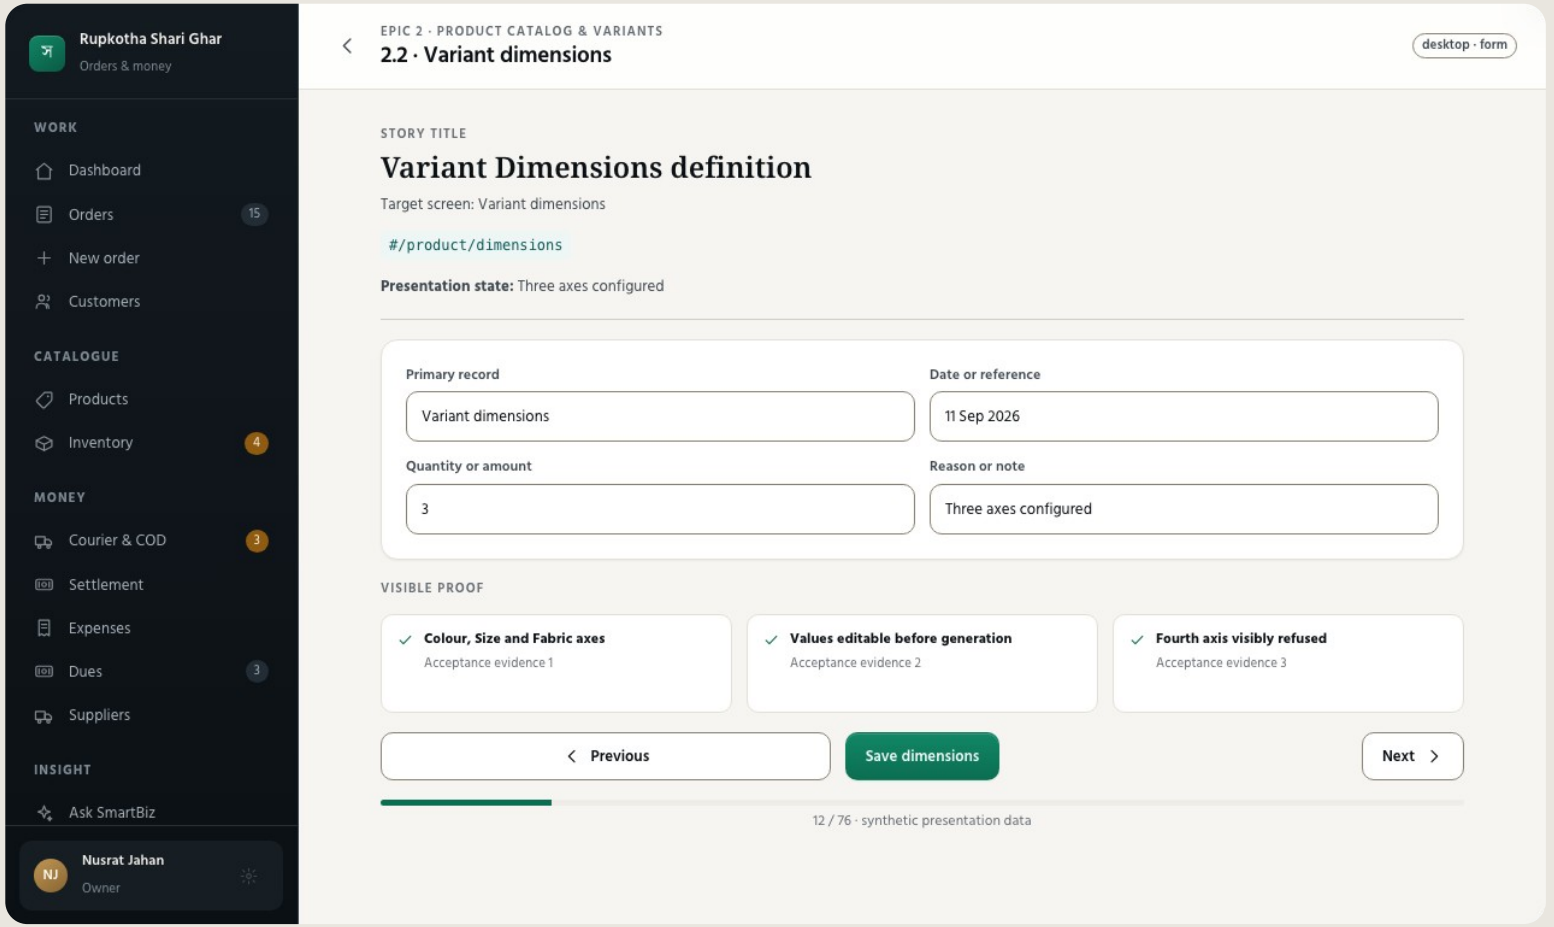

Visible proof

✓ Colour, Size and Fabric axes

✓ Values editable before generation

✓ Fourth axis visibly refused

Primary action: Save dimensions

EPIC 2 · STORY 2.3

Product catalog & variants

Variant matrix generation

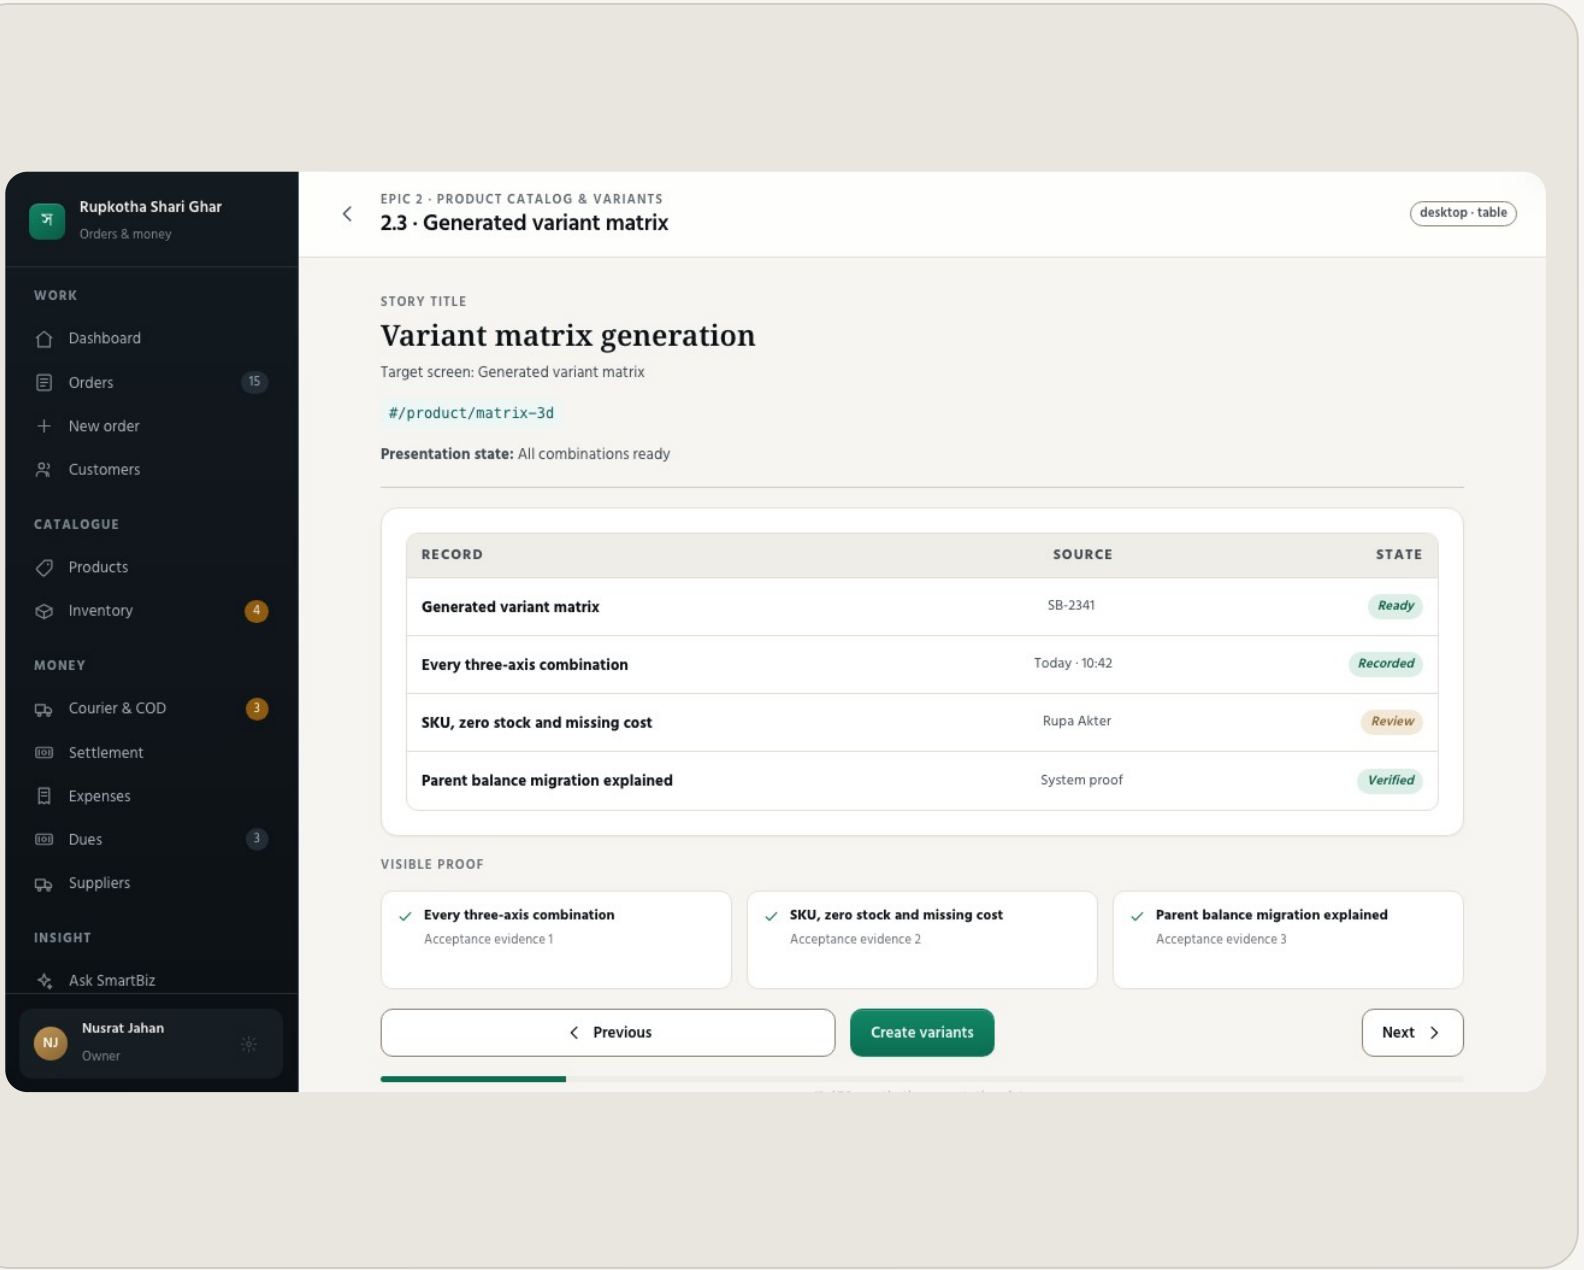

Generated variant matrix

State: All combinations ready

Visible proof

- ✓ Every three-axis combination
- ✓ SKU, zero stock and missing cost
- ✓ Parent balance migration explained

Primary action: Create variants

EPIC 3 · STORY 3.1

Inventory ledger

Stock-In with mandatory Purchase Cost

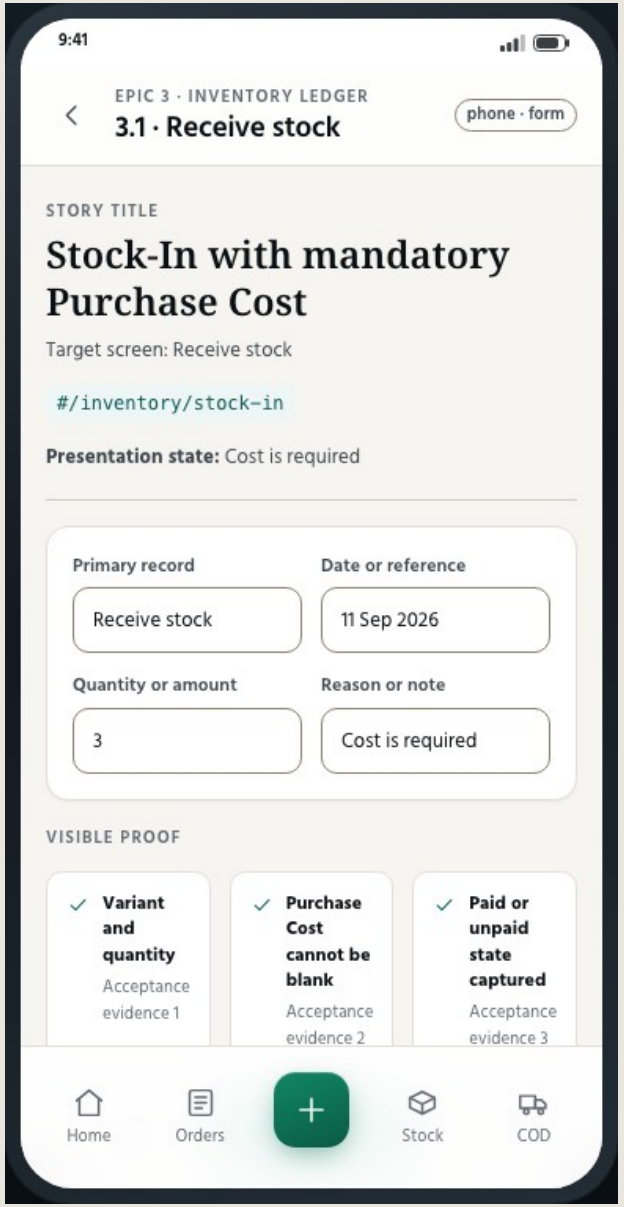

Receive stock

State: Cost is required

Visible proof

- ✓ Variant and quantity
- ✓ Purchase Cost cannot be blank
- ✓ Paid or unpaid state captured

Primary action: Record stock-in

EPIC 3 · STORY 3.2

Inventory ledger

Adjustment with reason

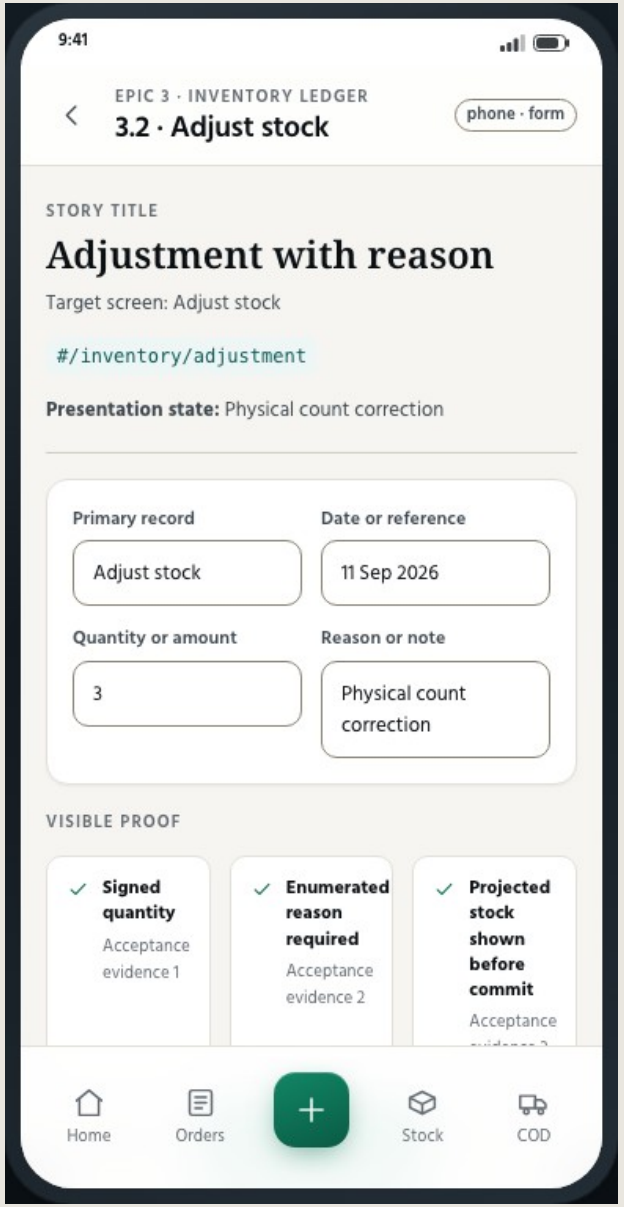

Adjust stock

State: Physical count correction

Visible proof

- ✓ Signed quantity
- ✓ Enumerated reason required
- ✓ Projected stock shown before commit

Primary action: Record adjustment

EPIC 3 · STORY 3.3

Inventory ledger

Damage Write-Off

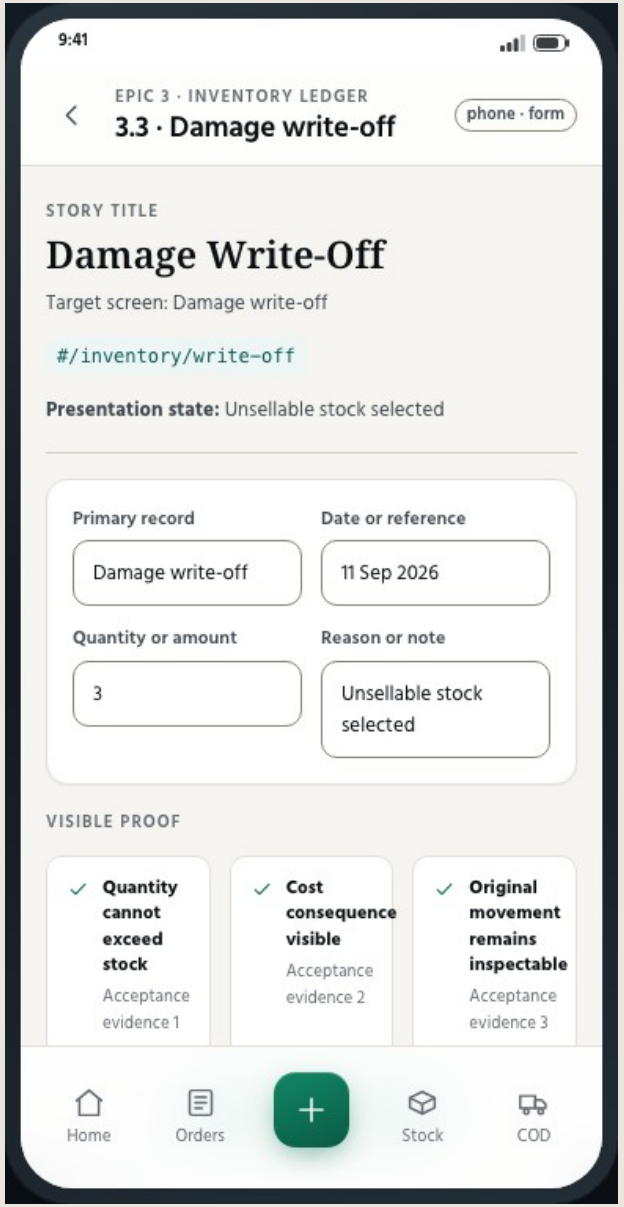

Damage write-off

State: Unsellable stock selected

Visible proof

- ✓ Quantity cannot exceed stock
- ✓ Cost consequence visible
- ✓ Original movement remains inspectable

Primary action: Write off damaged units

EPIC 3 · STORY 3.4

Inventory ledger

Inventory Movement history and reconciliation

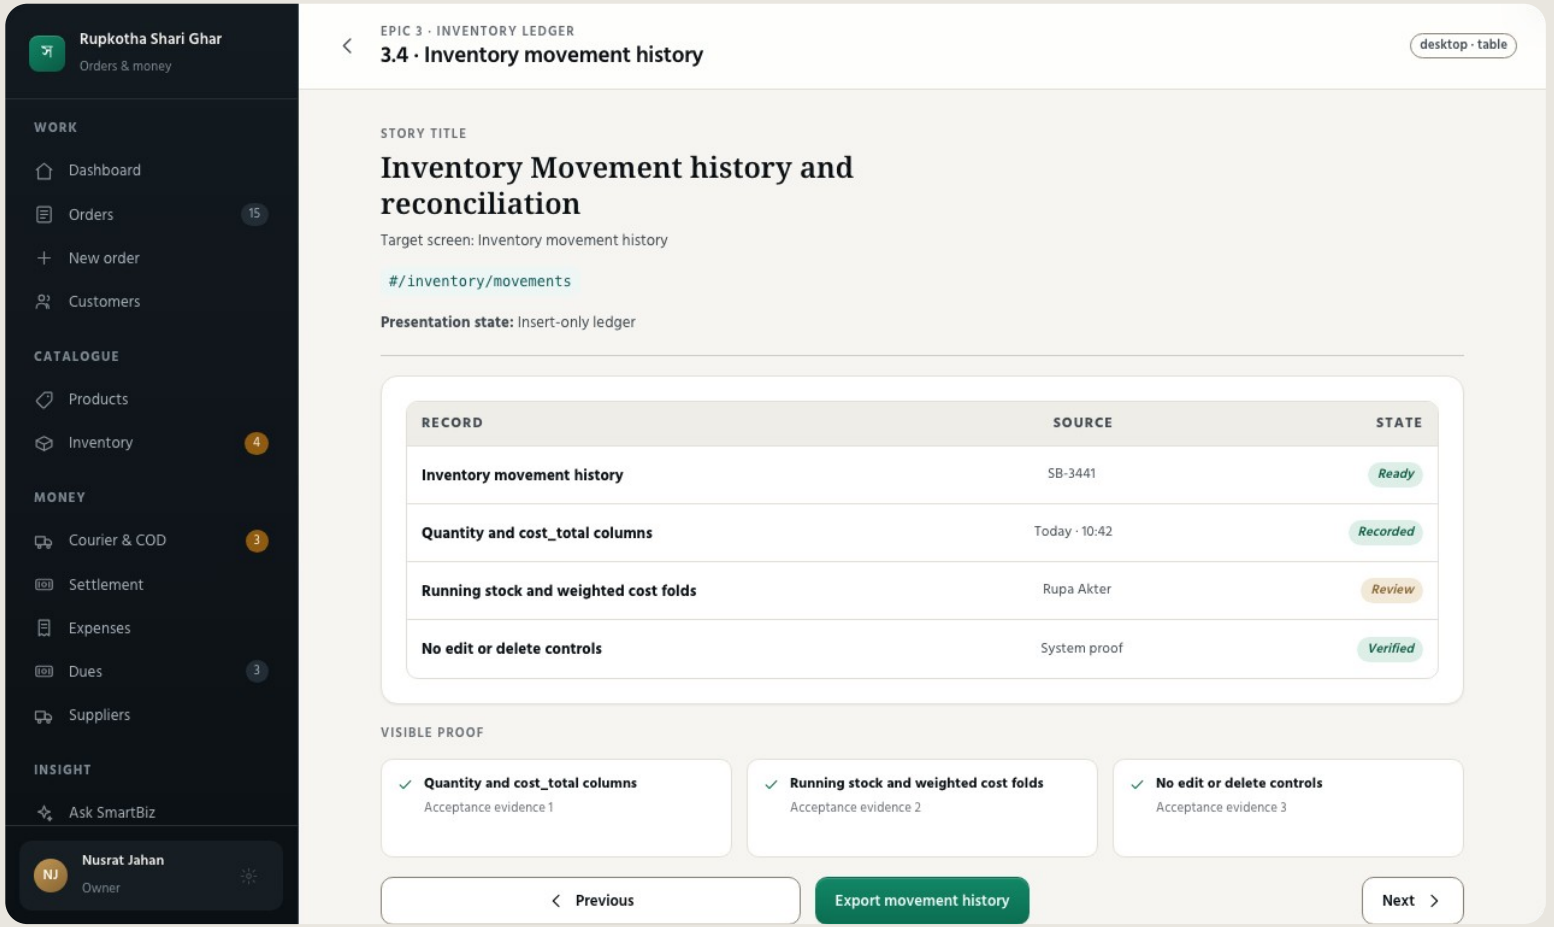

Inventory movement history

State: Insert-only ledger

Visible proof

- ✓ Quantity and cost_total columns
- ✓ Running stock and weighted cost folds
- ✓ No edit or delete controls

Primary action: Export movement history

EPIC 3 · STORY 3.5

Inventory ledger

Low-stock surfacing

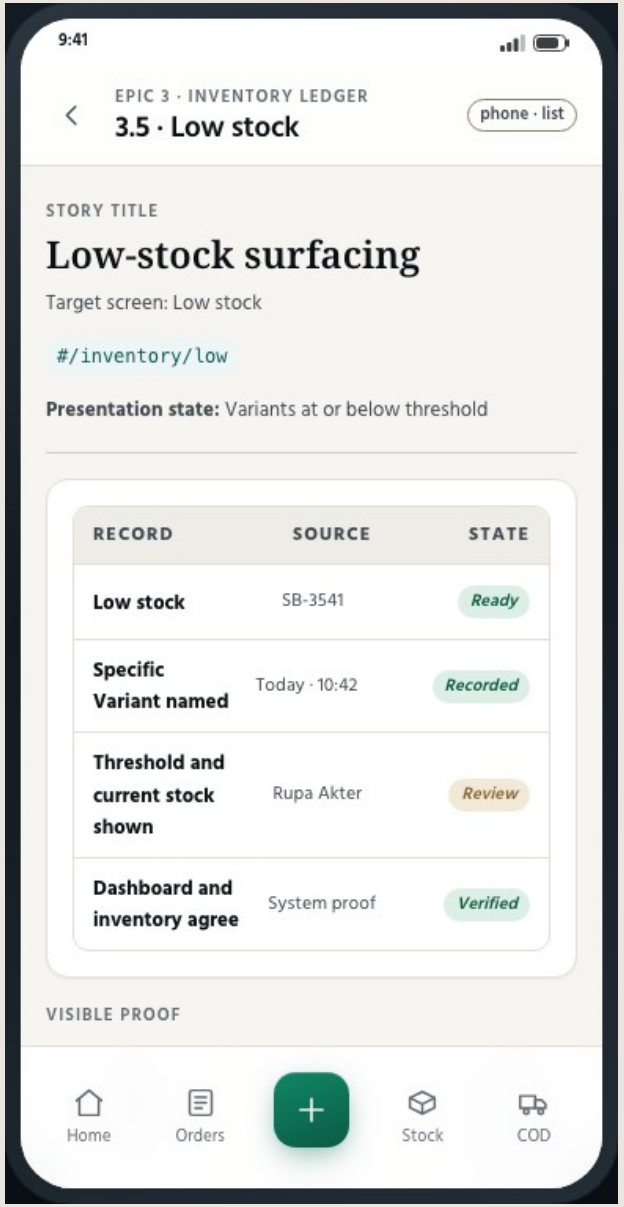

Low stock

State: Variants at or below threshold

Visible proof

- ✓ Specific Variant named
- ✓ Threshold and current stock shown
- ✓ Dashboard and inventory agree

Primary action: Start stock-in

EPIC 4 · STORY 4.1

Order capture & lifecycle

Fast manual order entry

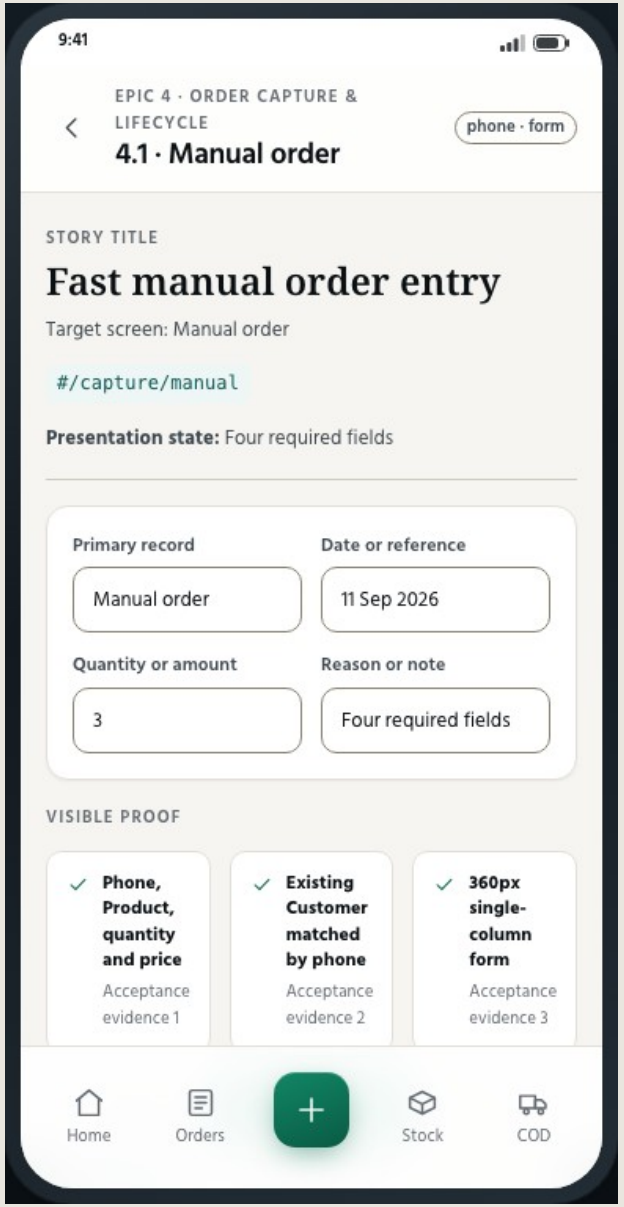

Manual order

State: Four required fields

Visible proof

- ✓ Phone, Product, quantity and price
- ✓ Existing Customer matched by phone
- ✓ 360px single-column form

Primary action: Save new order

EPIC 4 · STORY 4.2

Order capture & lifecycle

Customer identity hardening — normalization and tenant isolation

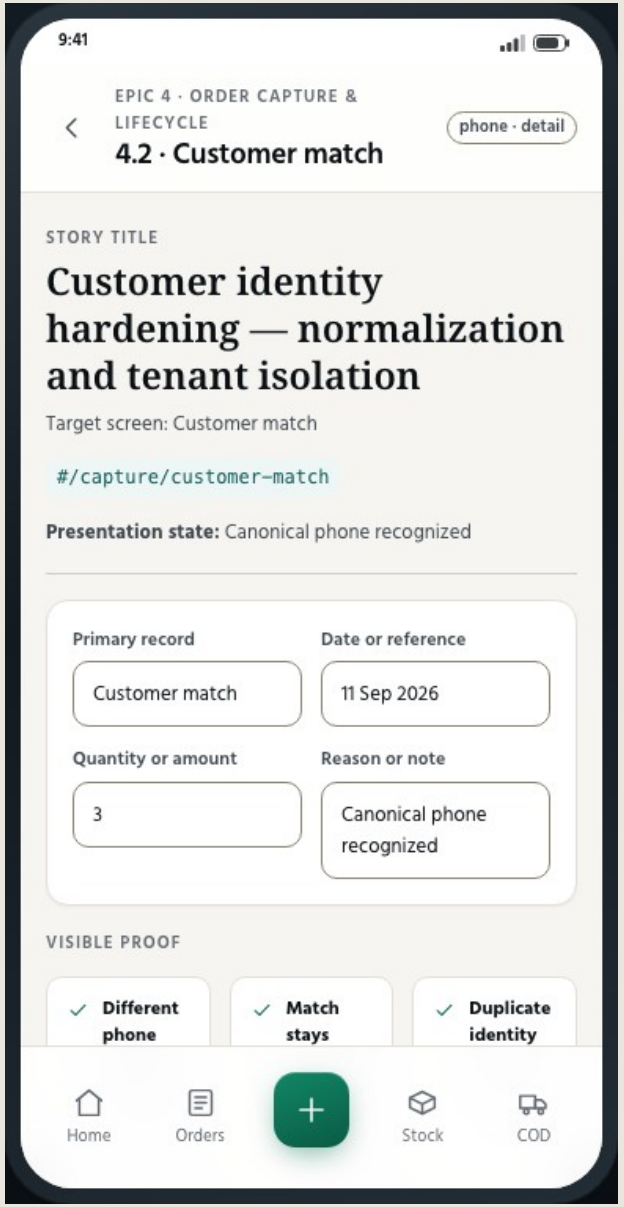

Customer match

State: Canonical phone recognized

Visible proof

- ✓ Different phone formats normalize
- ✓ Match stays inside this Business
- ✓ Duplicate identity warning

Primary action: Use this Customer

EPIC 4 · STORY 4.3

Order capture & lifecycle

Order pricing, discount, and delivery charge

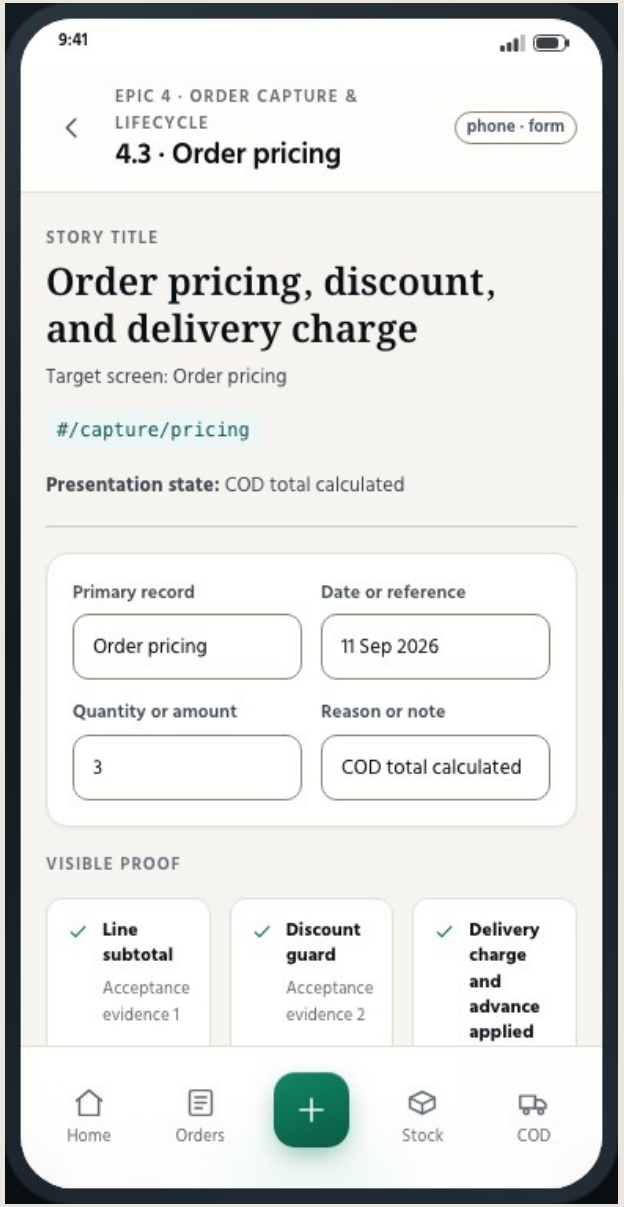

Order pricing

State: COD total calculated

Visible proof

- ✓ Line subtotal
- ✓ Discount guard
- ✓ Delivery charge and advance applied

Primary action: Accept total

EPIC 4 · STORY 4.4

Order capture & lifecycle

Order identity and source tracking

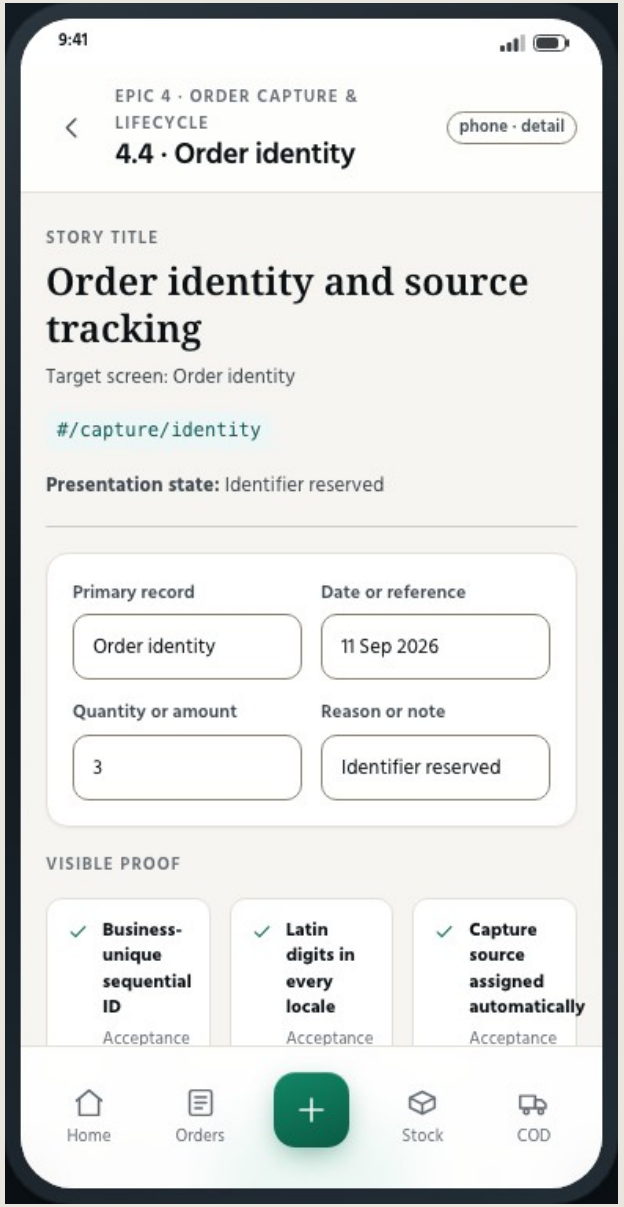

Order identity

State: Identifier reserved

Visible proof

- ✓ Business-unique sequential ID
- ✓ Latin digits in every locale
- ✓ Capture source assigned automatically

Primary action: Continue order

EPIC 4 · STORY 4.5

Order capture & lifecycle

Paste-and-parse order capture

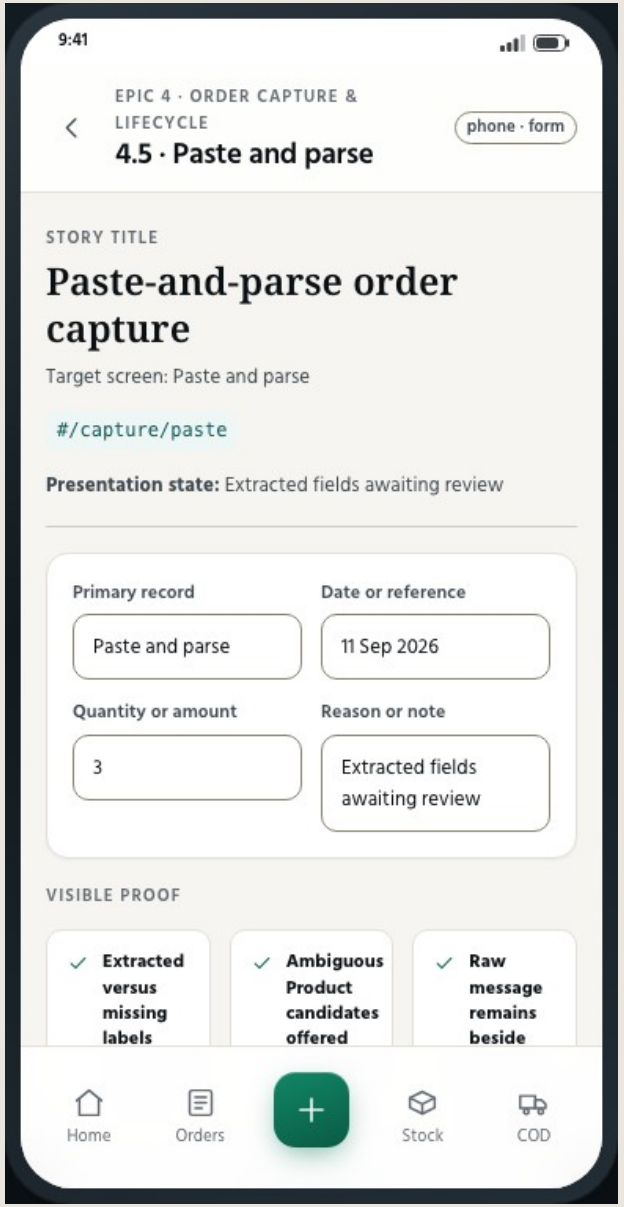

Paste and parse

State: Extracted fields awaiting review

Visible proof

- ✓ Extracted versus missing labels
- ✓ Ambiguous Product candidates offered
- ✓ Raw message remains beside form

Primary action: Review order

EPIC 4 · STORY 4.6

Order capture & lifecycle

Inline Product creation from the order screen

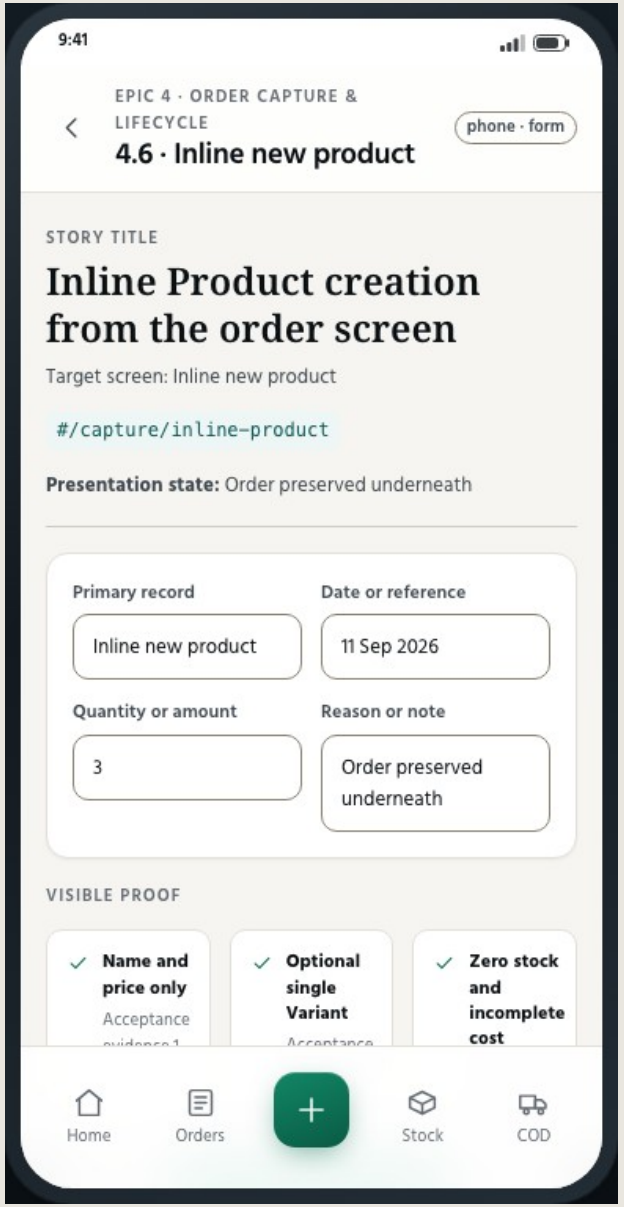

Inline new product

State: Order preserved underneath

Visible proof

- ✓ Name and price only
- ✓ Optional single Variant
- ✓ Zero stock and incomplete cost

Primary action: Create and select product

EPIC 4 · STORY 4.7

Order capture & lifecycle

Resilient order drafts

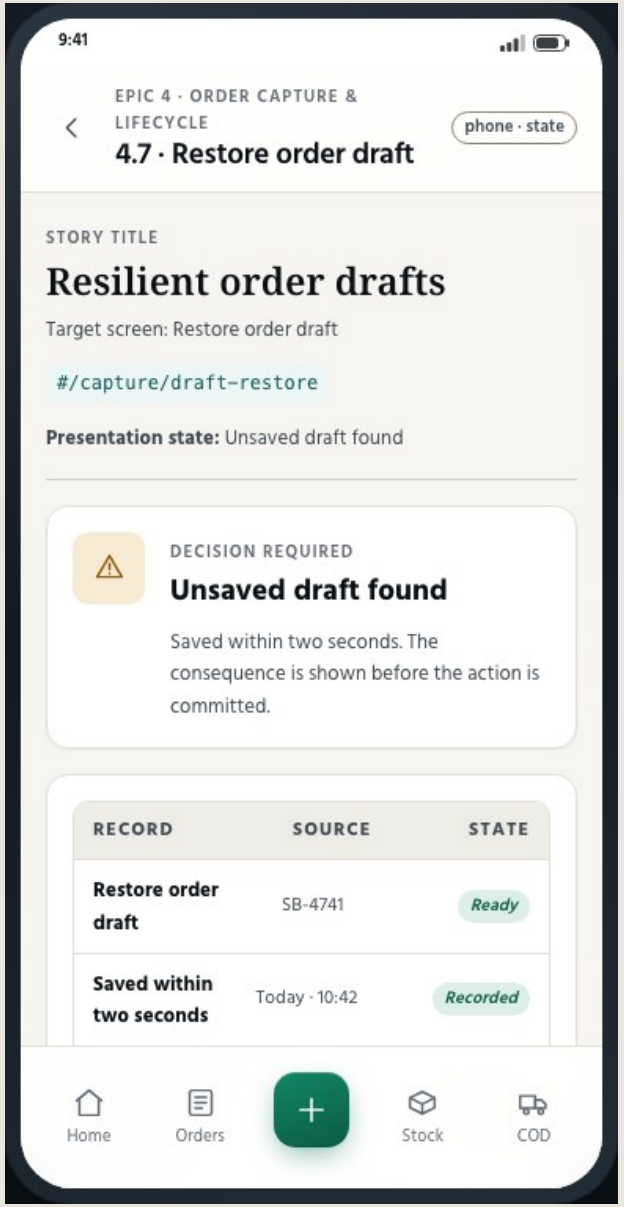

Restore order draft

State: Unsaved draft found

Visible proof

- ✓ Saved within two seconds
- ✓ Raw message and lines retained
- ✓ Discard and save clear the draft

Primary action: Restore every field

EPIC 4 · STORY 4.8

Order capture & lifecycle

Stock allocation and Purchase Cost snapshot on confirmation

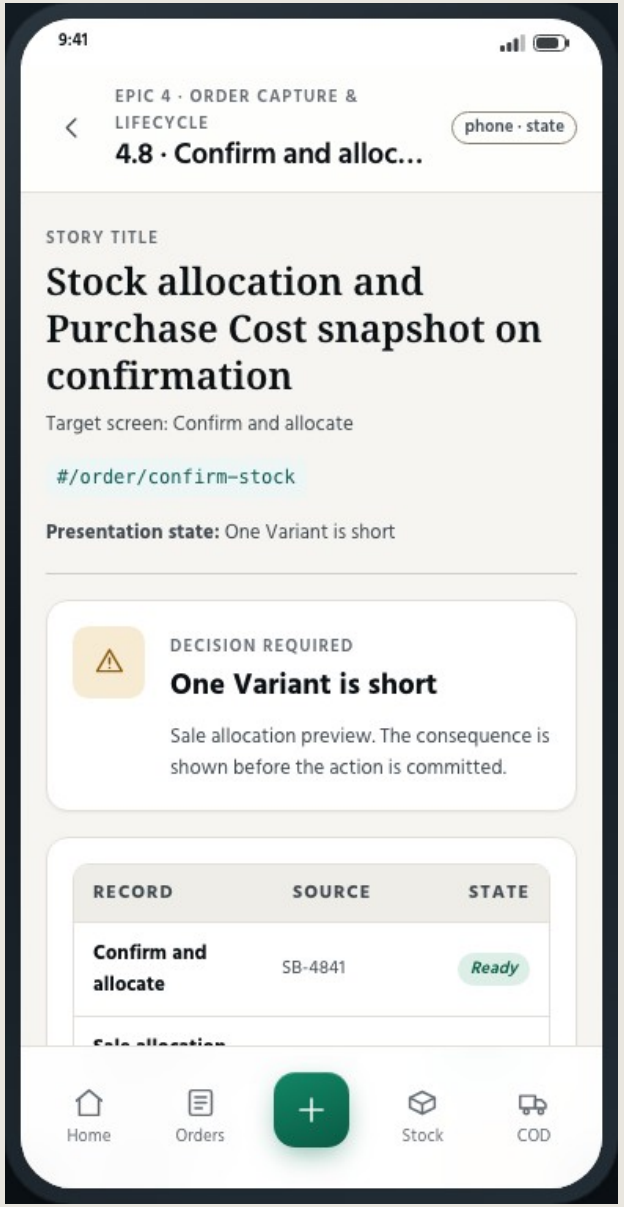

Confirm and allocate

State: One Variant is short

Visible proof

- ✓ Sale allocation preview
- ✓ Purchase Cost snapshot
- ✓ Idempotent confirmation and shortfall

Primary action: Acknowledge and confirm

EPIC 4 · STORY 4.9

Order capture & lifecycle

Order Status transitions

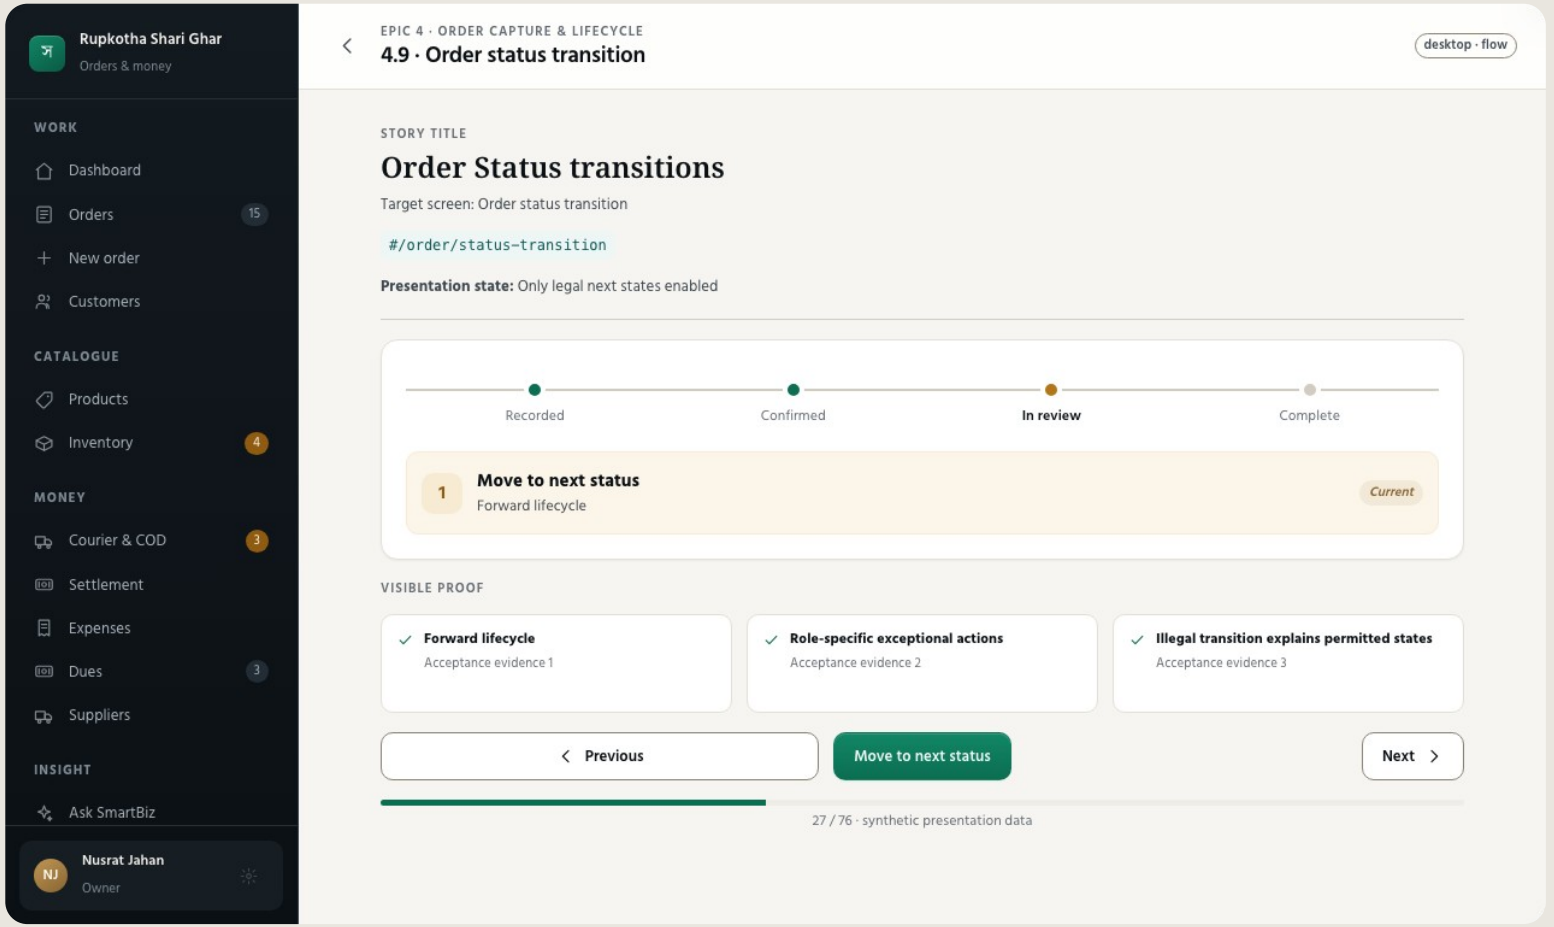

Order status transition

State: Only legal next states enabled

Visible proof

- ✓ Forward lifecycle
- ✓ Role-specific exceptional actions
- ✓ Illegal transition explains permitted states

Primary action: Move to next status

EPIC 4 · STORY 4.10

Order capture & lifecycle

Cancellation

Cancel order

State: Compensating stock release

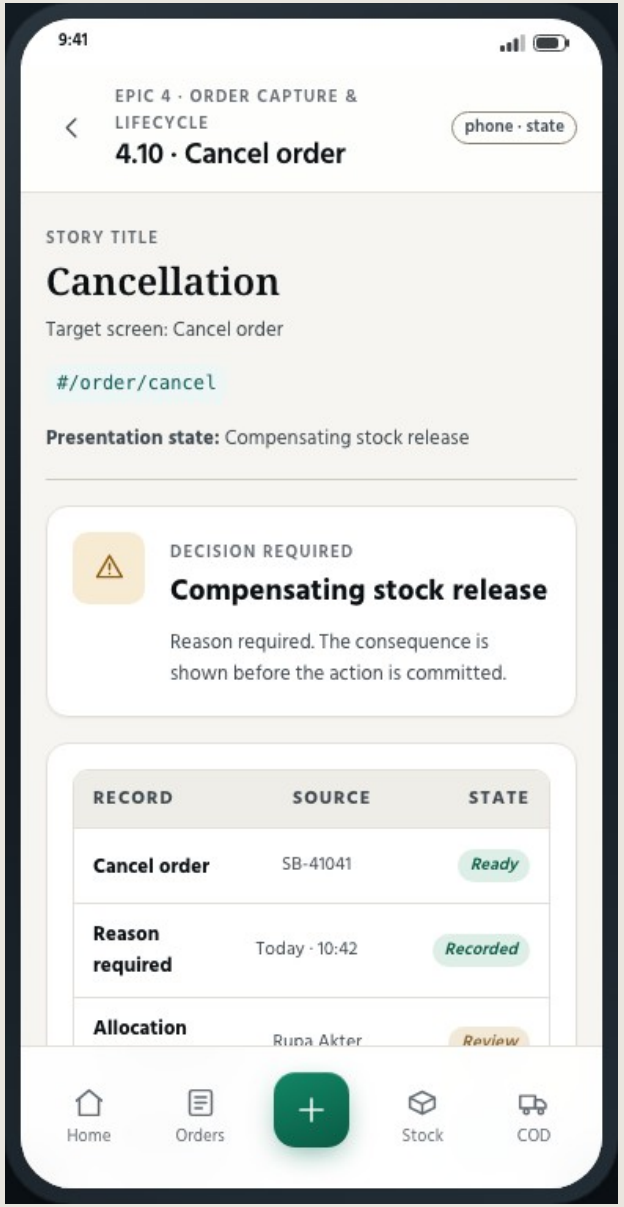

Visible proof

✓ Reason required

✓ Allocation reversal preview

✓ Excluded from sales and profit

Primary action: Cancel and restore stock

EPIC 4 · STORY 4.11

Order capture & lifecycle

Returned status and return-to-stock receipt

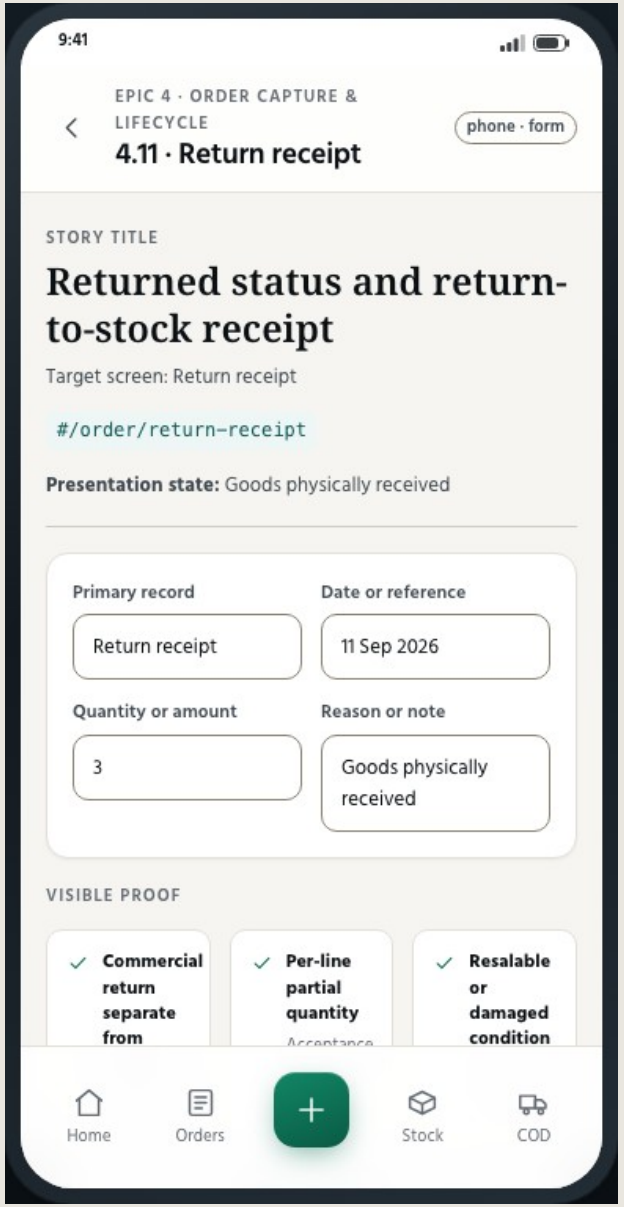

Return receipt

State: Goods physically received

Visible proof

- ✓ Commercial return separate from receipt
- ✓ Per-line partial quantity
- ✓ Resalable or damaged condition

Primary action: Record receipt

EPIC 4 · STORY 4.12

Order capture & lifecycle

Failed delivery

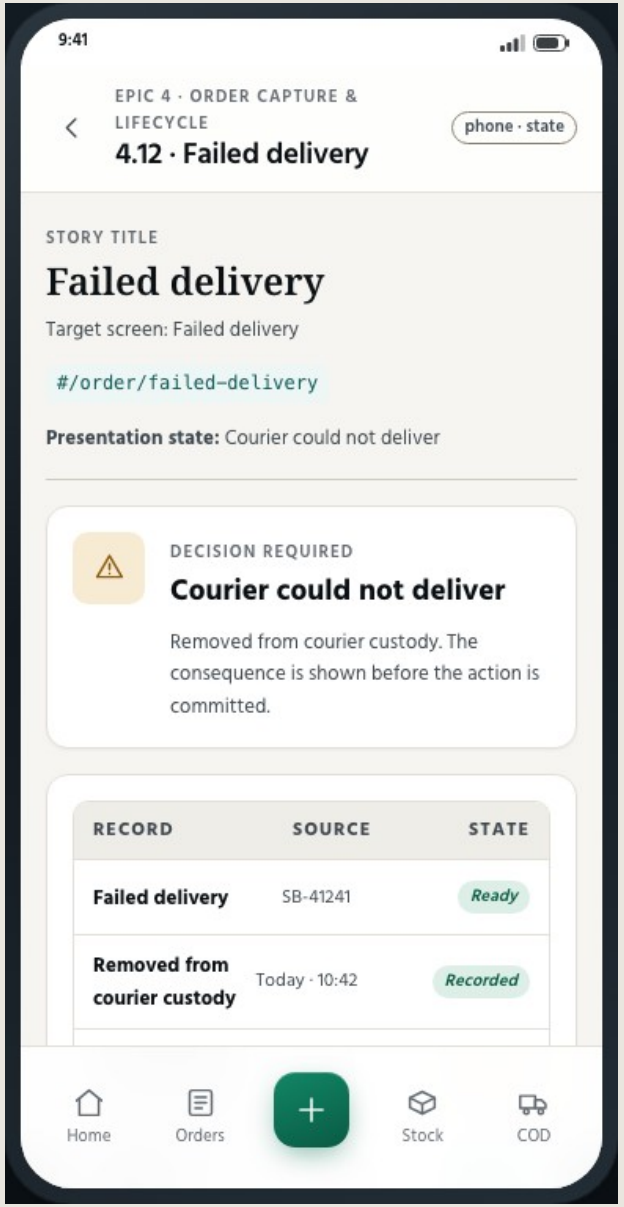

Failed delivery

State: Courier could not deliver

Visible proof

- ✓ Removed from courier custody
- ✓ Retry shipment or receive return
- ✓ Courier charge remains

Primary action: Record failed delivery

EPIC 4 · STORY 4.13

Order capture & lifecycle

Order editing constraints

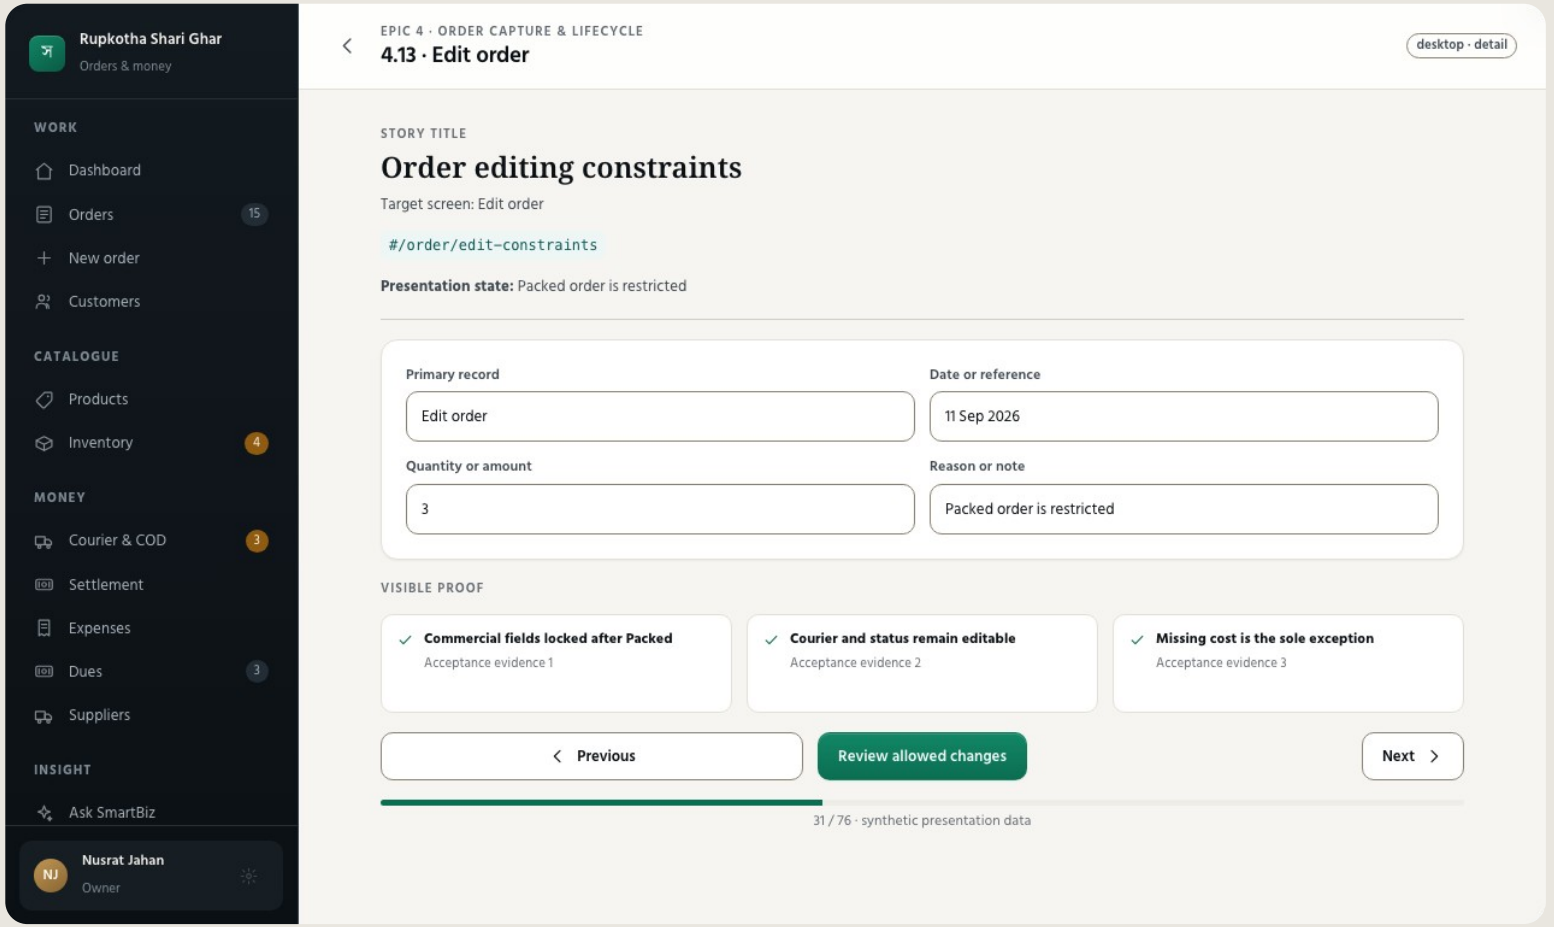

Edit order

State: Packed order is restricted

Visible proof

- ✓ Commercial fields locked after Packed
- ✓ Courier and status remain editable
- ✓ Missing cost is the sole exception

Primary action: Review allowed changes

EPIC 4 · STORY 4.14

Order capture & lifecycle

Order list, search, and filtering

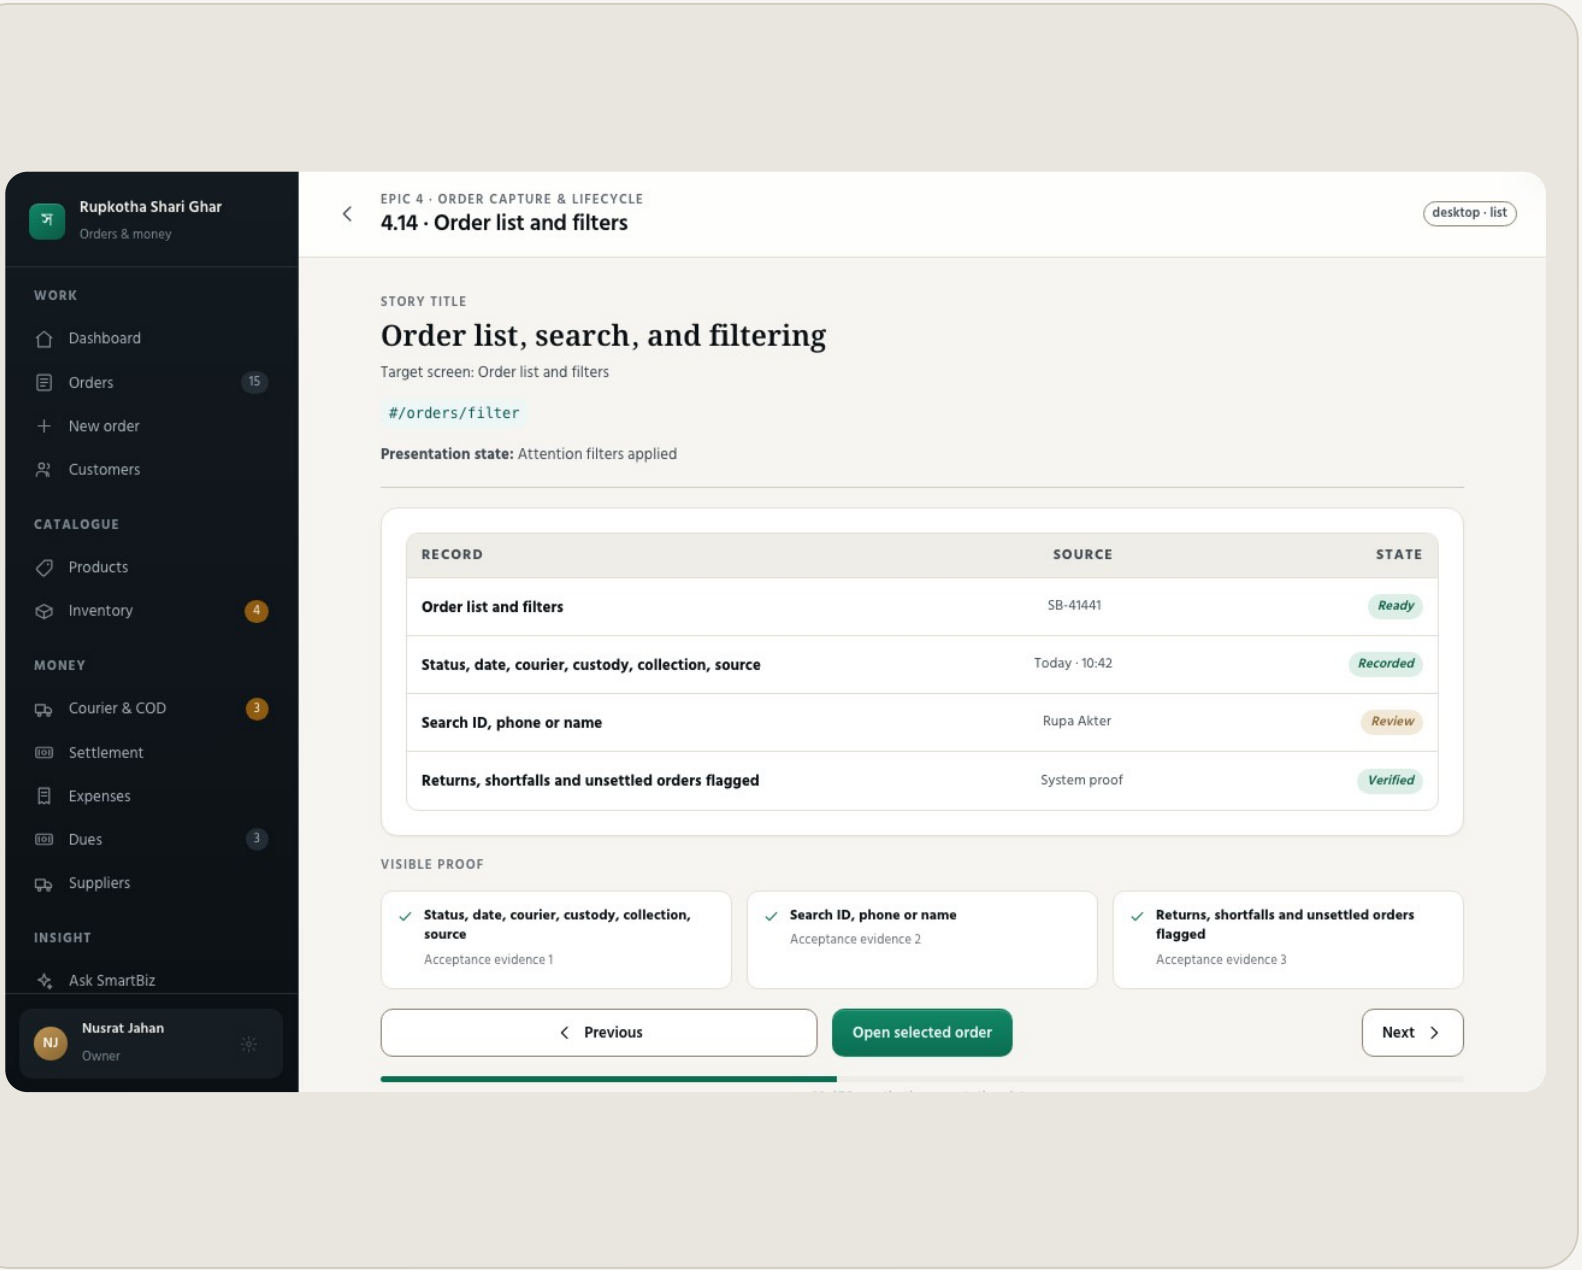

Order list and filters

State: Attention filters applied

Visible proof

- ✓ Status, date, courier, custody, collection, source
- ✓ Search ID, phone or name
- ✓ Returns, shortfalls and unsettled orders flagged

Primary action: Open selected order

EPIC 4 · STORY 4.15

Order capture & lifecycle

Per-Order unit economics

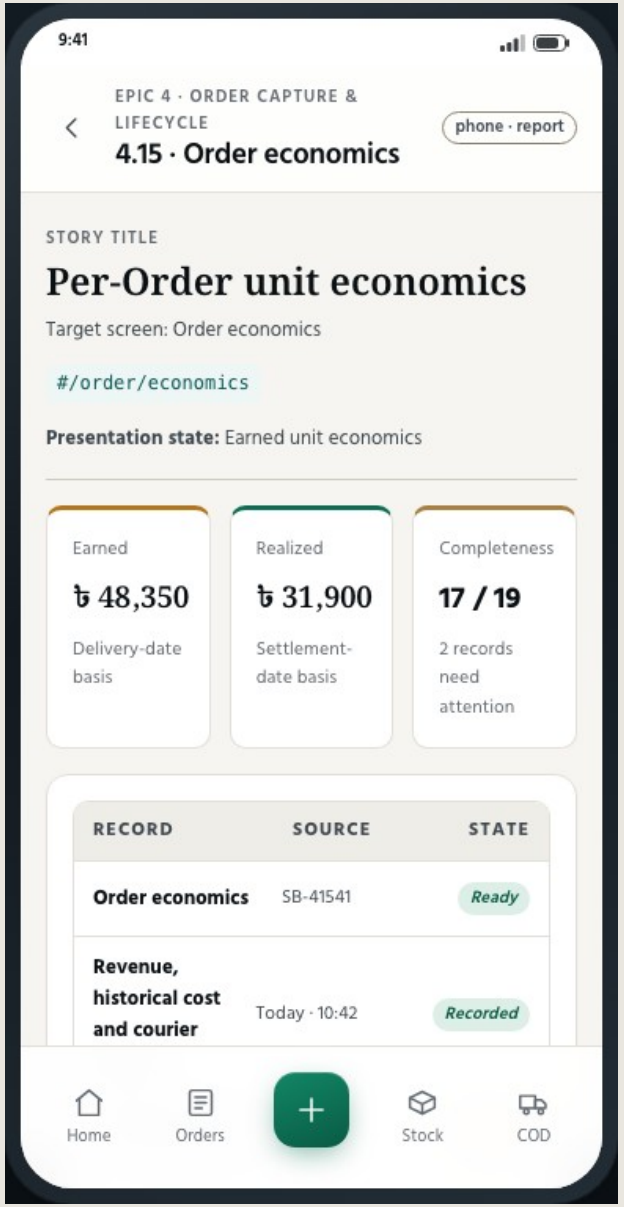

Order economics

State: Earned unit economics

Visible proof

- ✓ Revenue, historical cost and courier charge
- ✓ Resulting margin
- ✓ Capability-gated cost visibility

Primary action: Explain this margin

EPIC 4 · STORY 4.16

Order capture & lifecycle

Completing a missing Purchase Cost

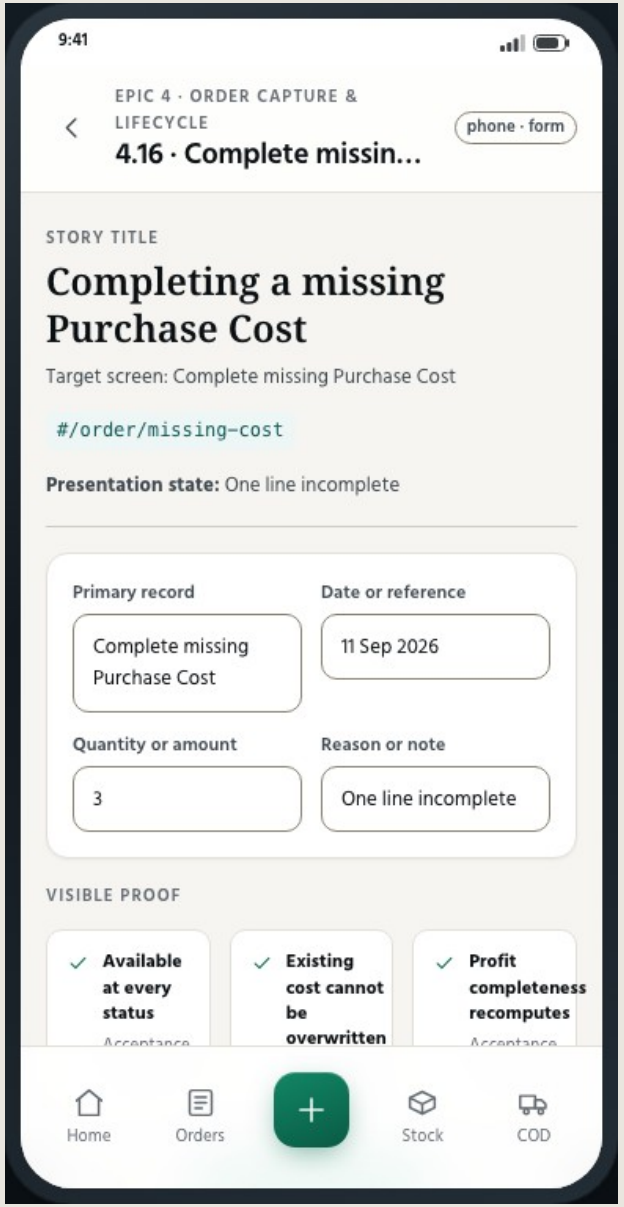

Complete missing Purchase Cost

State: One line incomplete

Visible proof

- ✓ Available at every status
- ✓ Existing cost cannot be overwritten
- ✓ Profit completeness recomputes

Primary action: Save Purchase Cost

EPIC 4 · STORY 4.17

Order capture & lifecycle

Repeat a past Order

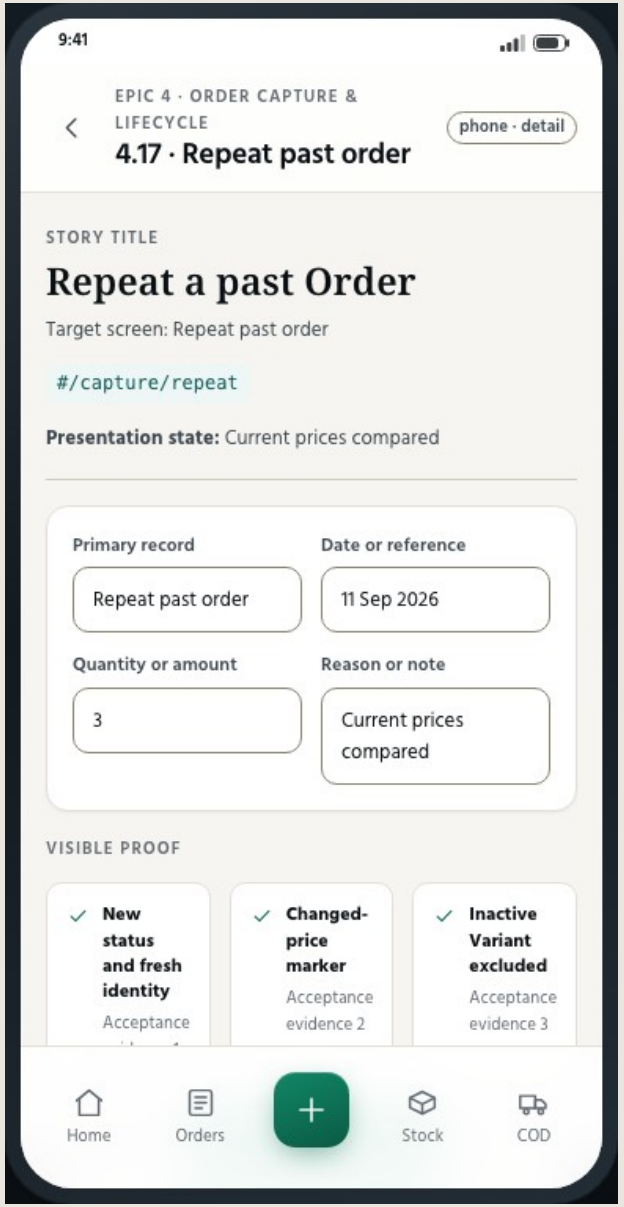

Repeat past order

State: Current prices compared

Visible proof

- ✓ New status and fresh identity
- ✓ Changed-price marker
- ✓ Inactive Variant excluded

Primary action: Create repeated order

EPIC 4 · STORY 4.18

Order capture & lifecycle

Quick-add Product grid

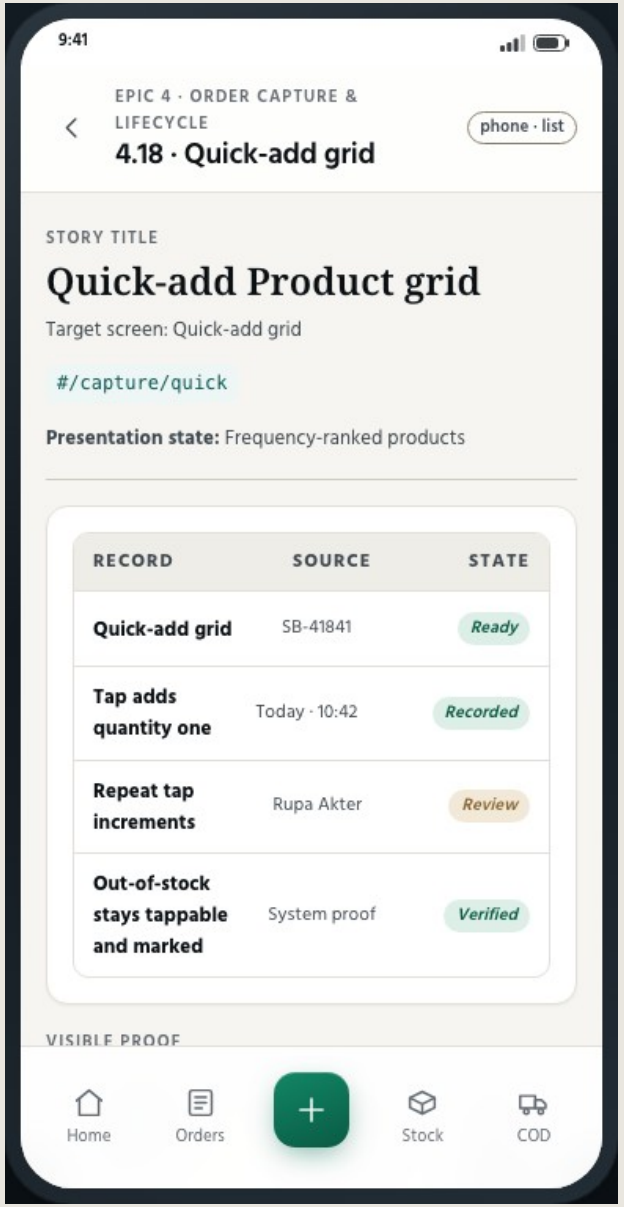

Quick-add grid

State: Frequency-ranked products

Visible proof

- ✓ Tap adds quantity one
- ✓ Repeat tap increments
- ✓ Out-of-stock stays tappable and marked

Primary action: Continue with selected items

EPIC 4 · STORY 4.19

Order capture & lifecycle

Message image beside the capture form

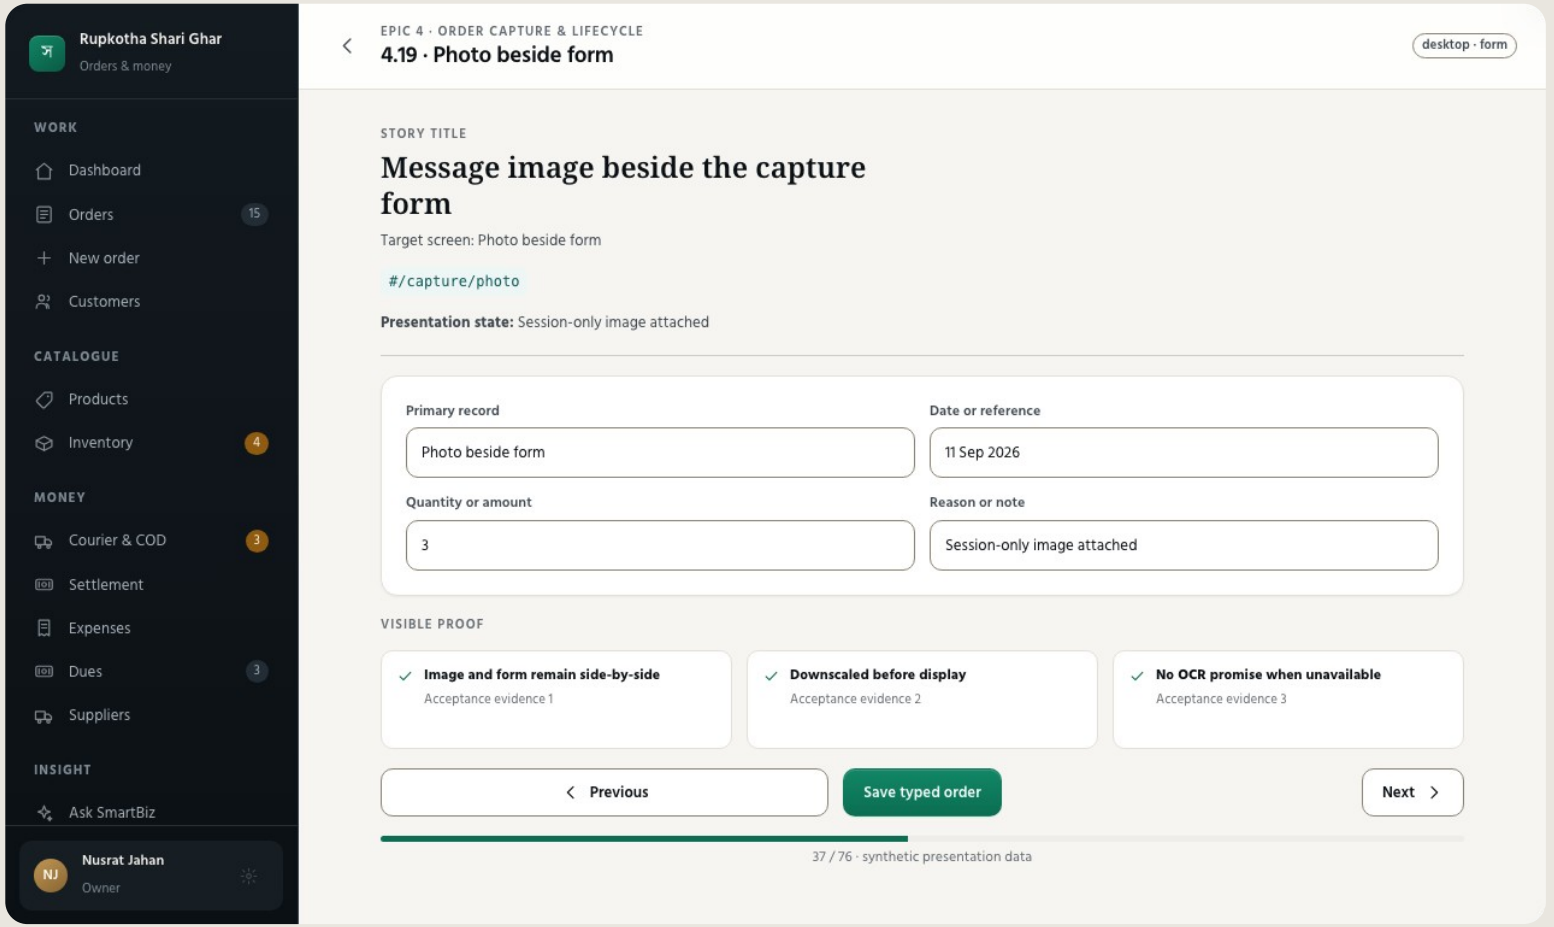

Photo beside form

State: Session-only image attached

Visible proof

- ✓ Image and form remain side-by-side
- ✓ Downscaled before display
- ✓ No OCR promise when unavailable

Primary action: Save typed order

EPIC 4 · STORY 4.20

Order capture & lifecycle

Spreadsheet Order import

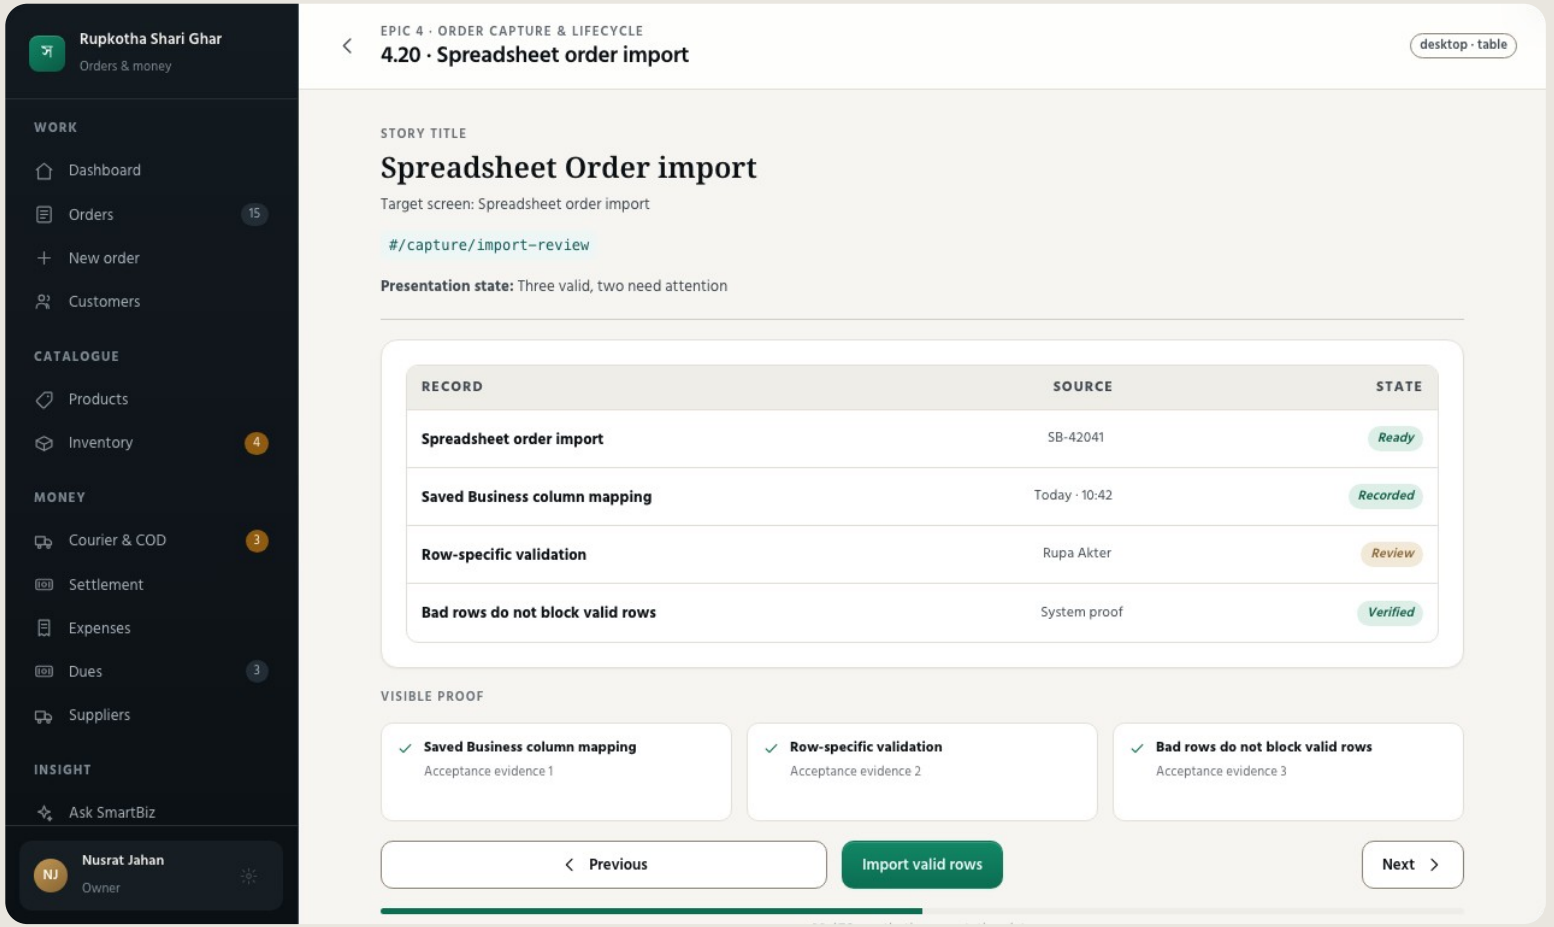

Spreadsheet order import

State: Three valid, two need attention

Visible proof

- ✓ Saved Business column mapping
- ✓ Row-specific validation
- ✓ Bad rows do not block valid rows

Primary action: Import valid rows

EPIC 4 · STORY 4.21

Order capture & lifecycle

Voice dictation into the capture field

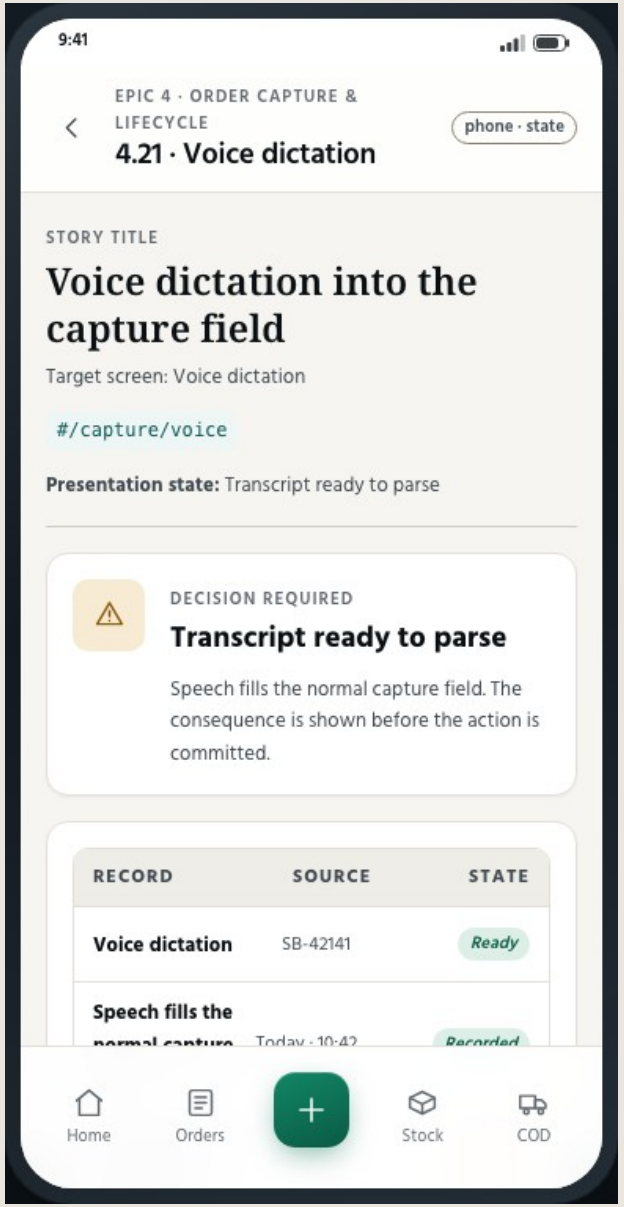

Voice dictation

State: Transcript ready to parse

Visible proof

- ✓ Speech fills the normal capture field
- ✓ Same parser as pasted text
- ✓ Control absent when unsupported

Primary action: Parse transcript

EPIC 5 · STORY 5.1

Courier & COD settlement

Courier records

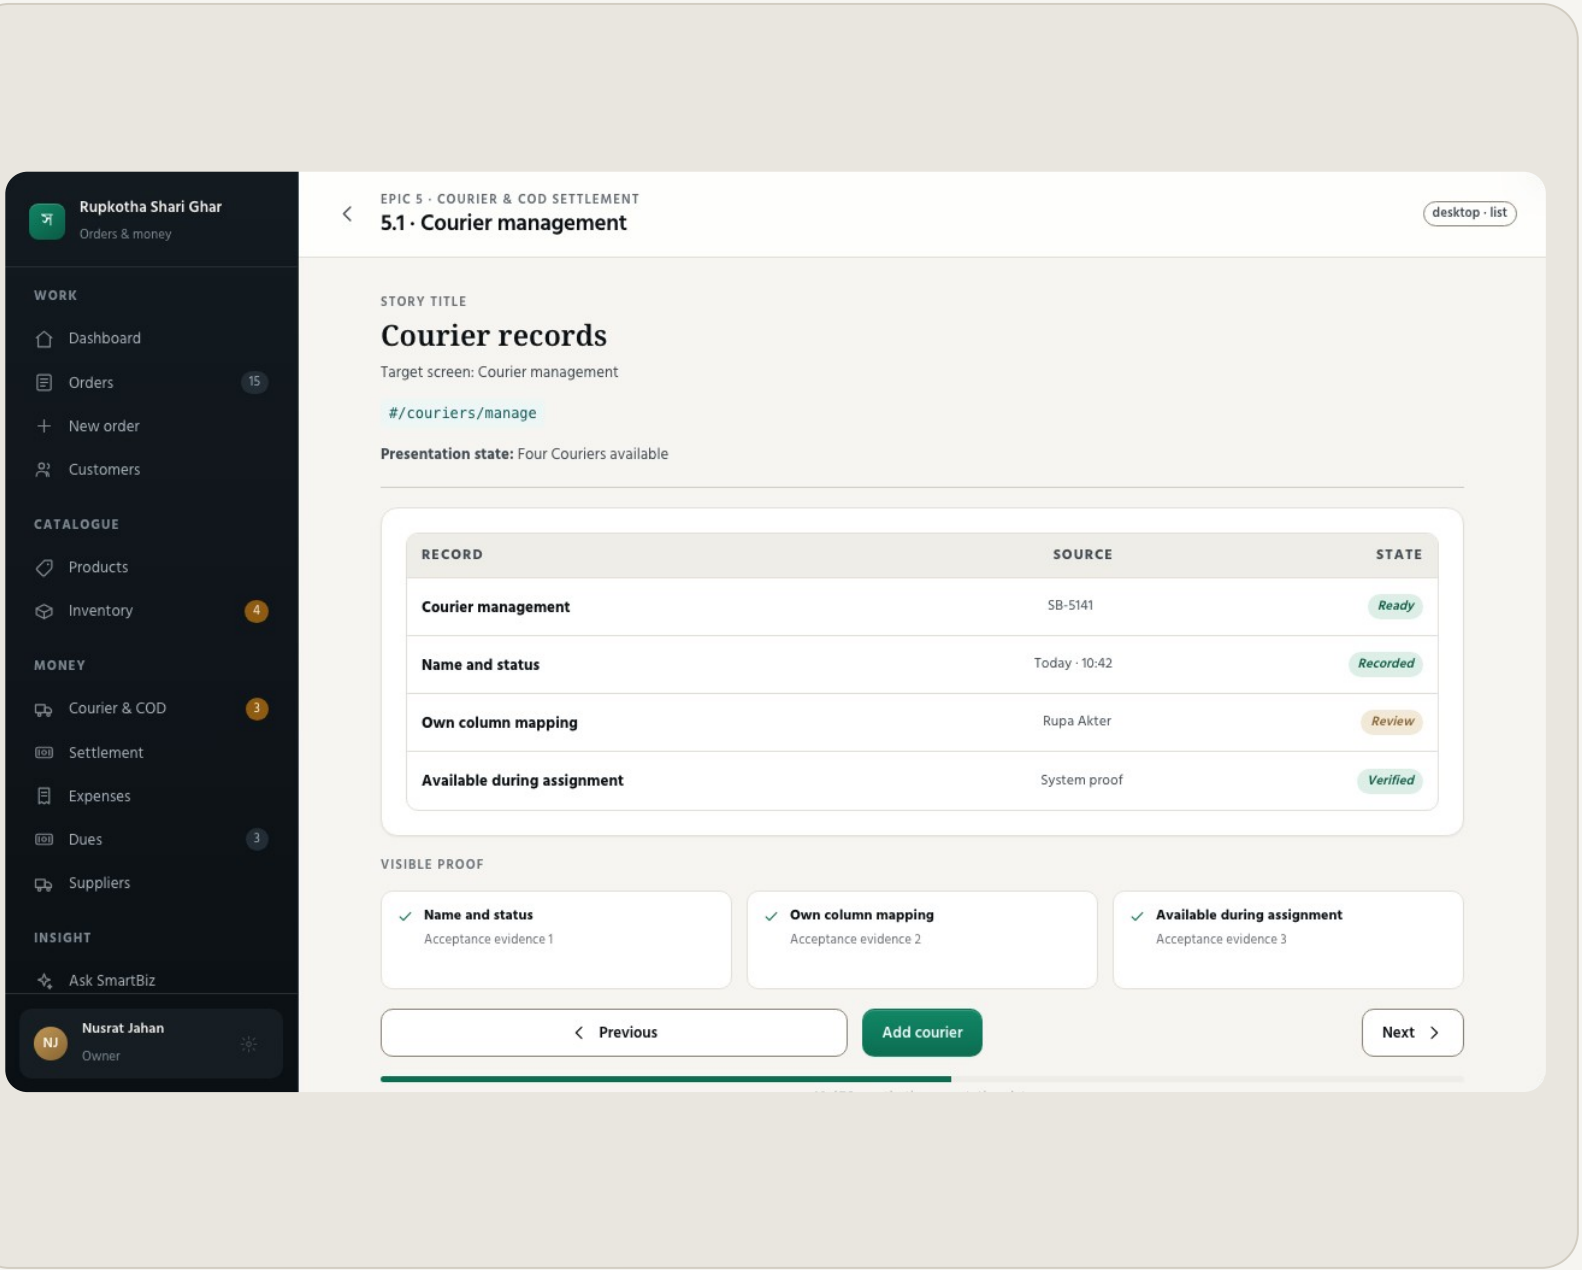

Courier management

State: Four Couriers available

Visible proof

- ✓ Name and status
- ✓ Own column mapping
- ✓ Available during assignment

Primary action: Add courier

EPIC 5 · STORY 5.2

Courier & COD settlement

Order-to-Courier assignment and simulated adapter

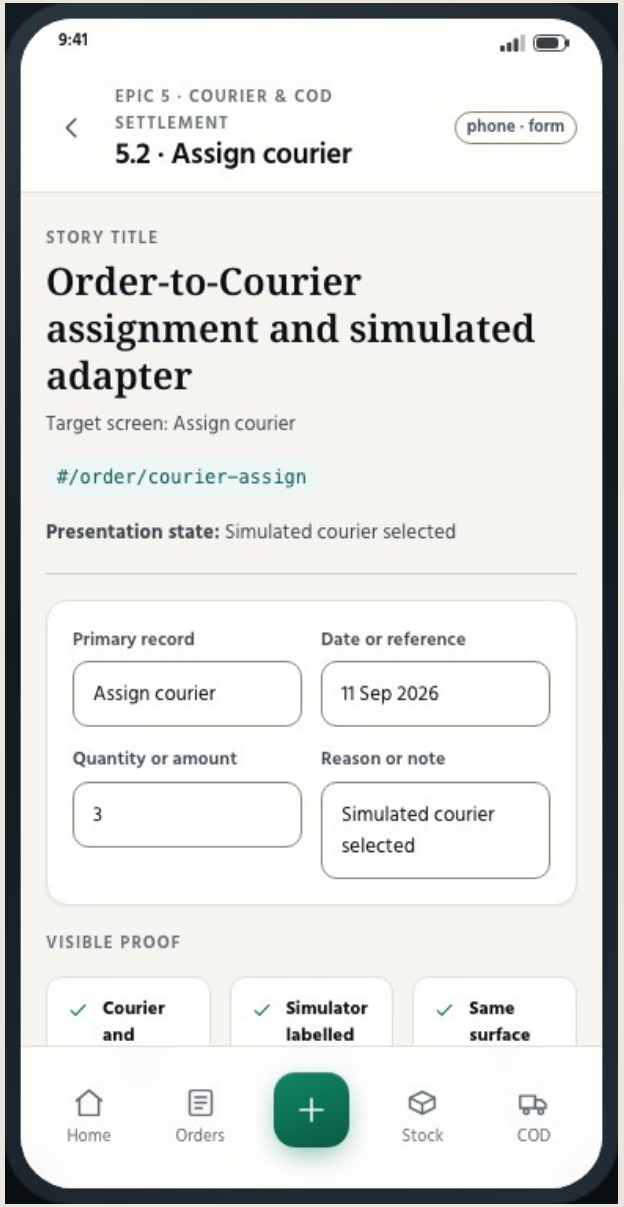

Assign courier

State: Simulated courier selected

Visible proof

- ✓ Courier and tracking reference
- ✓ Simulator labelled at point of use
- ✓ Same surface for a real adapter

Primary action: Assign and create tracking

EPIC 5 · STORY 5.3

Courier & COD settlement

Delivered vs cash-collected as two distinct facts

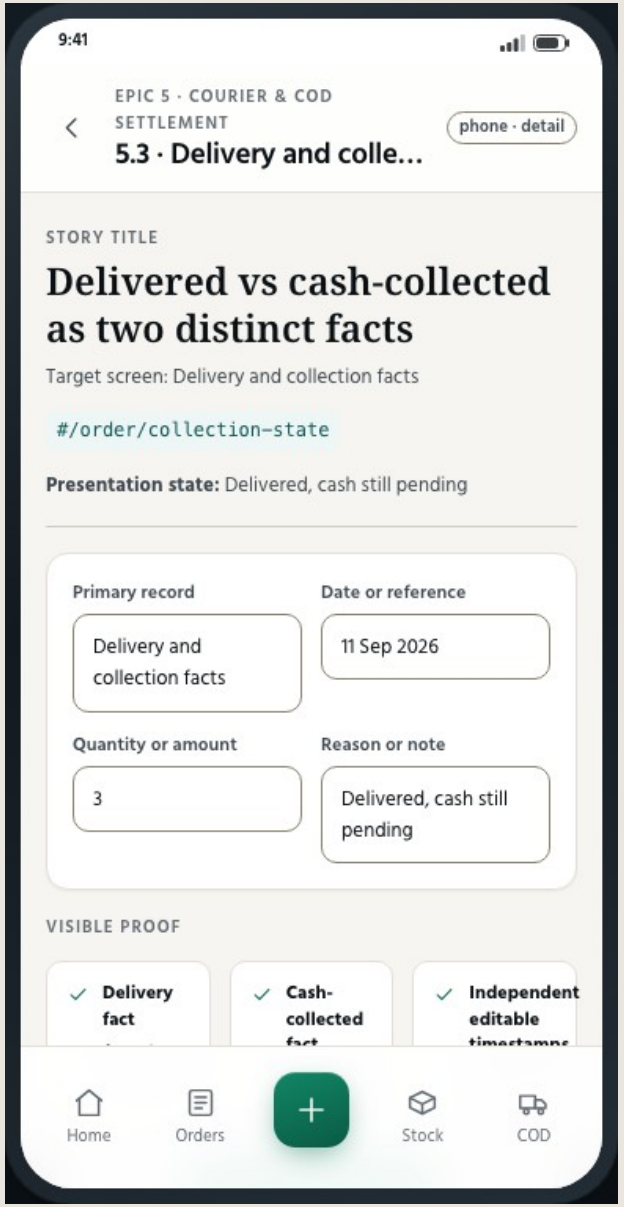

Delivery and collection facts

State: Delivered, cash still pending

Visible proof

- ✓ Delivery fact
- ✓ Cash-collected fact
- ✓ Independent editable timestamps

Primary action: Update collection fact

EPIC 5 · STORY 5.4

Courier & COD settlement

Courier Charge as a cost

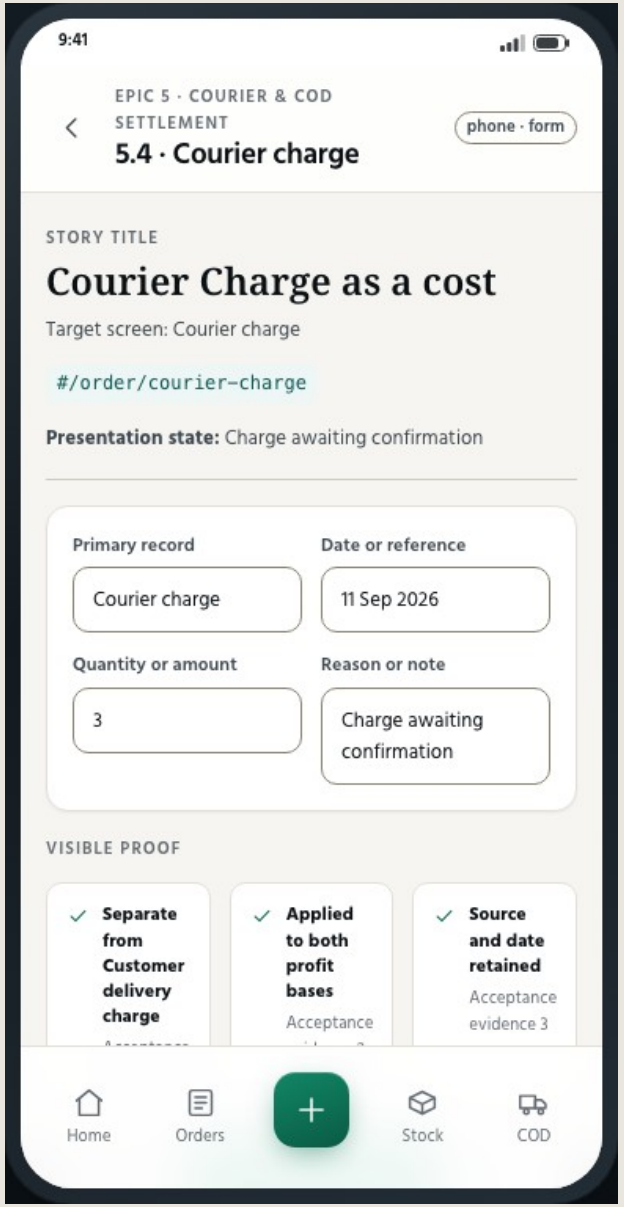

Courier charge

State: Charge awaiting confirmation

Visible proof

- ✓ Separate from Customer delivery charge
- ✓ Applied to both profit bases
- ✓ Source and date retained

Primary action: Record courier charge

EPIC 5 · STORY 5.5

Courier & COD settlement

Money With Couriers visibility

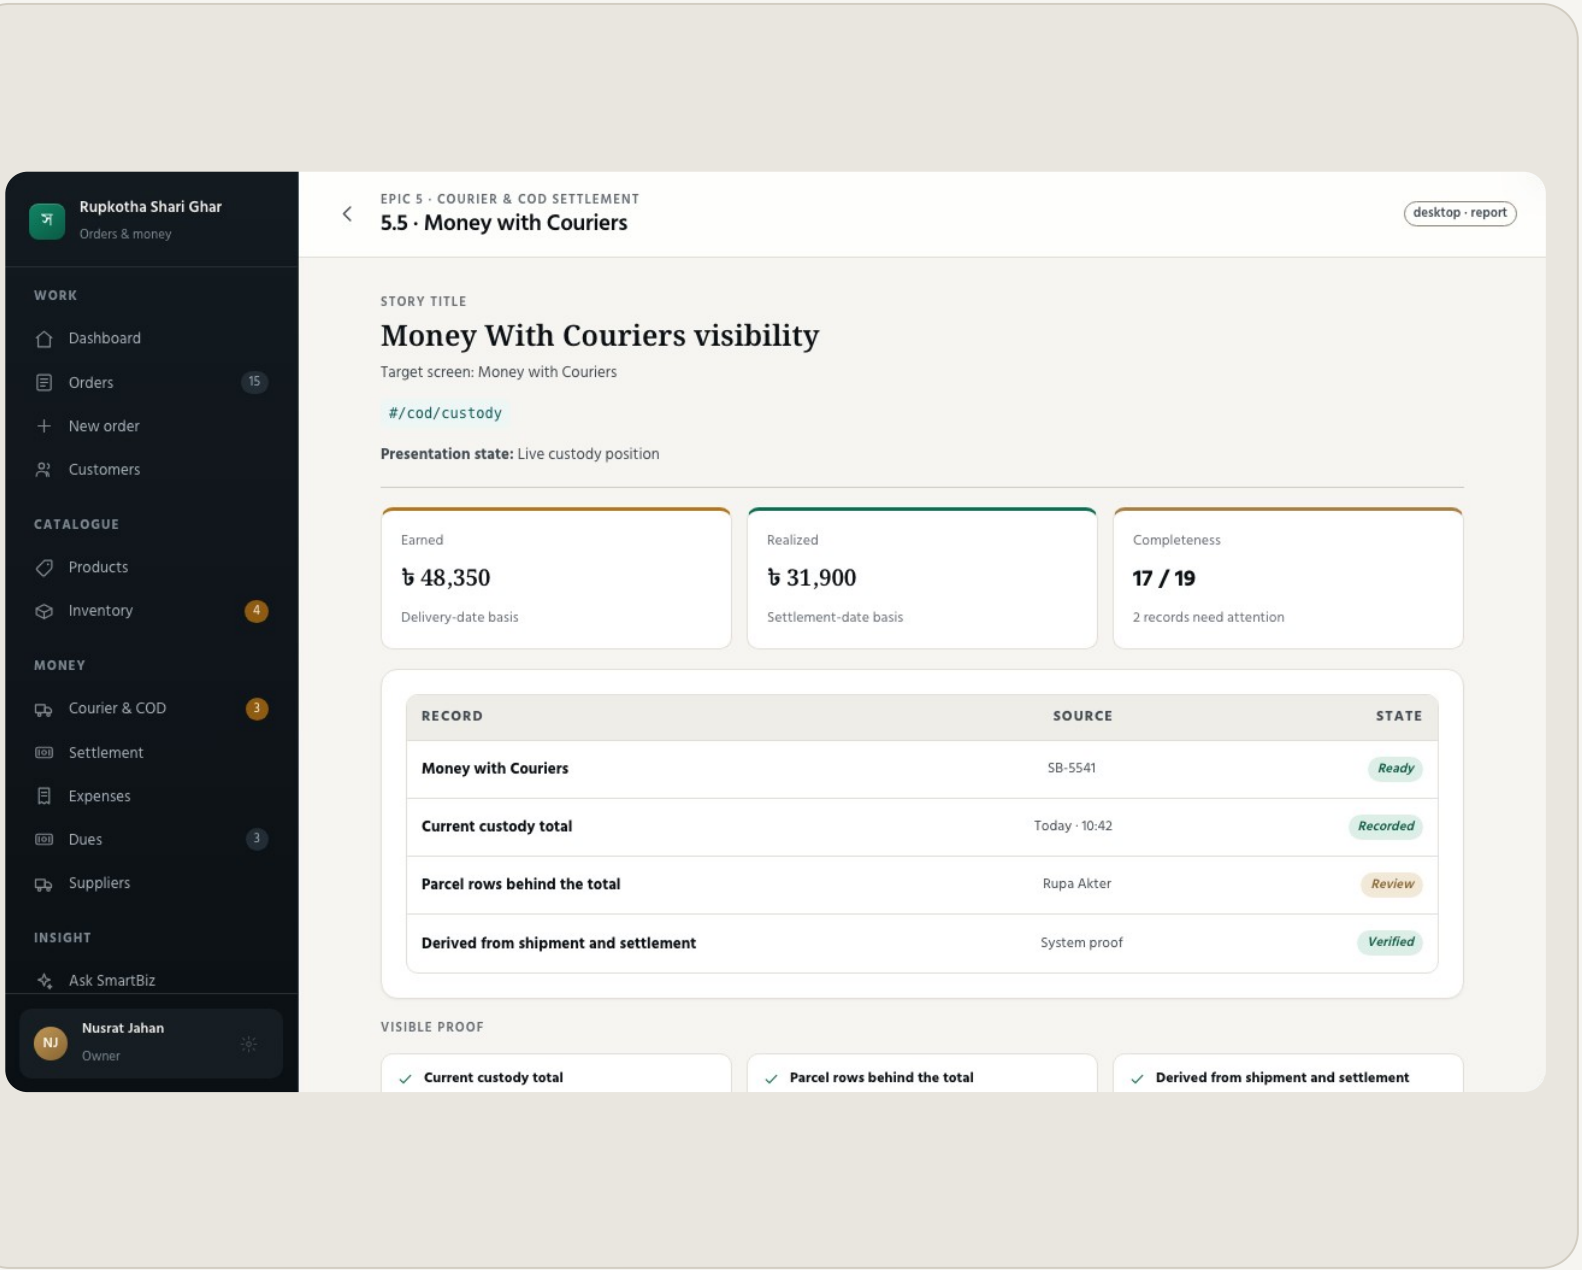

Money with Couriers

State: Live custody position

Visible proof

- ✓ Current custody total
- ✓ Parcel rows behind the total
- ✓ Derived from shipment and settlement

Primary action: Inspect courier parcels

EPIC 5 · STORY 5.6

Courier & COD settlement

Settlement file upload and Column Mapping

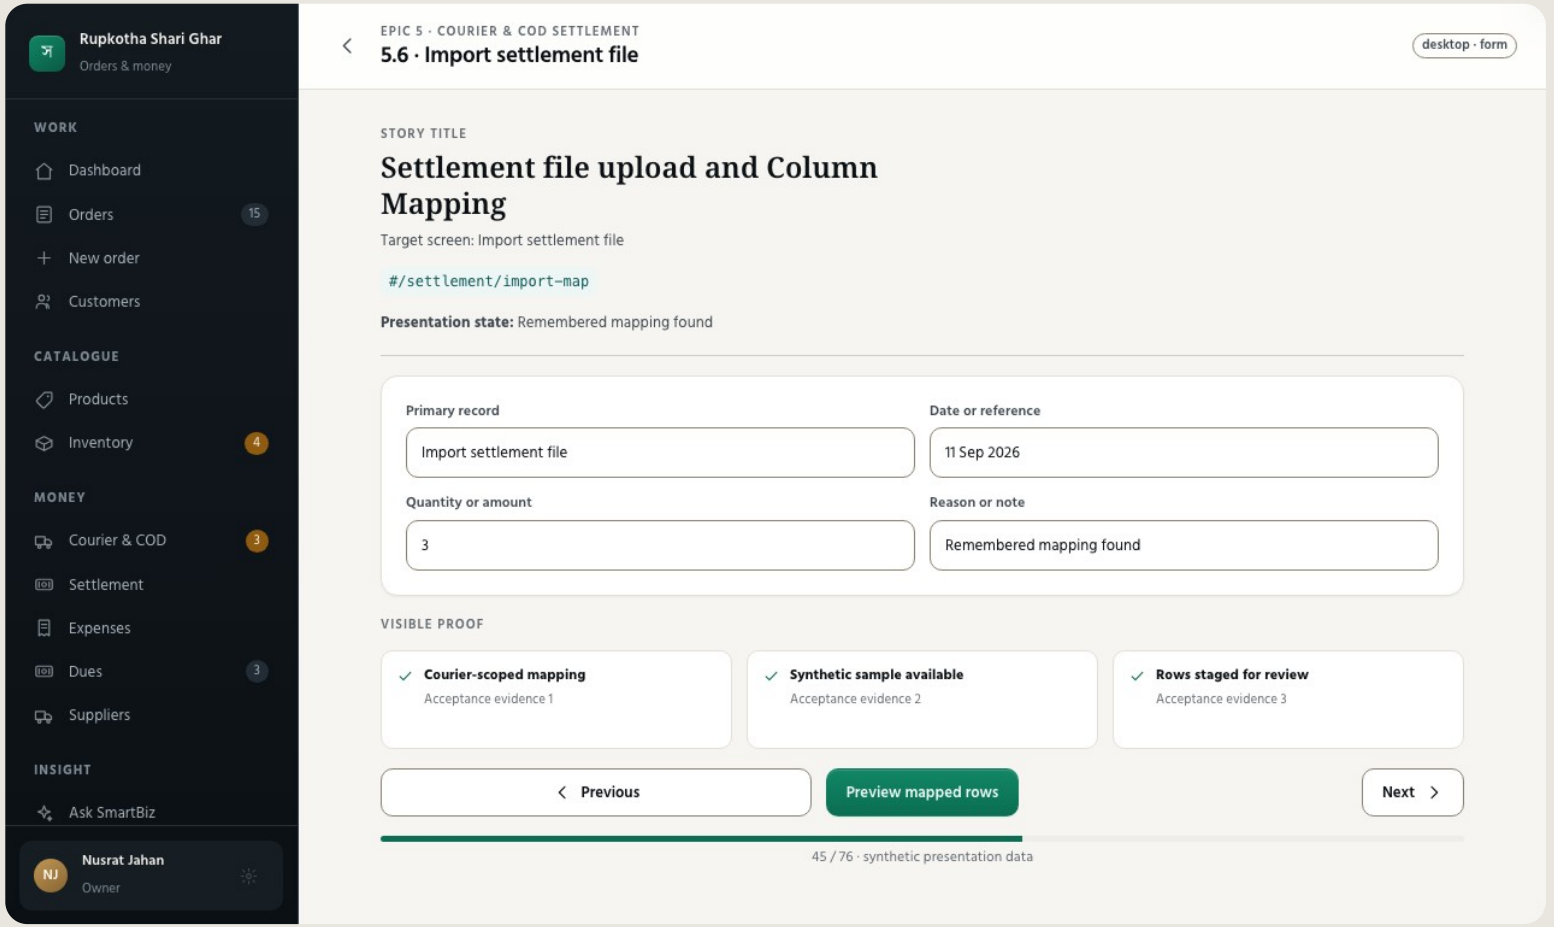

Import settlement file

State: Remembered mapping found

Visible proof

- ✓ Courier-scoped mapping
- ✓ Synthetic sample available
- ✓ Rows staged for review

Primary action: Preview mapped rows

EPIC 5 · STORY 5.7

Courier & COD settlement

Automatic Settlement Row matching

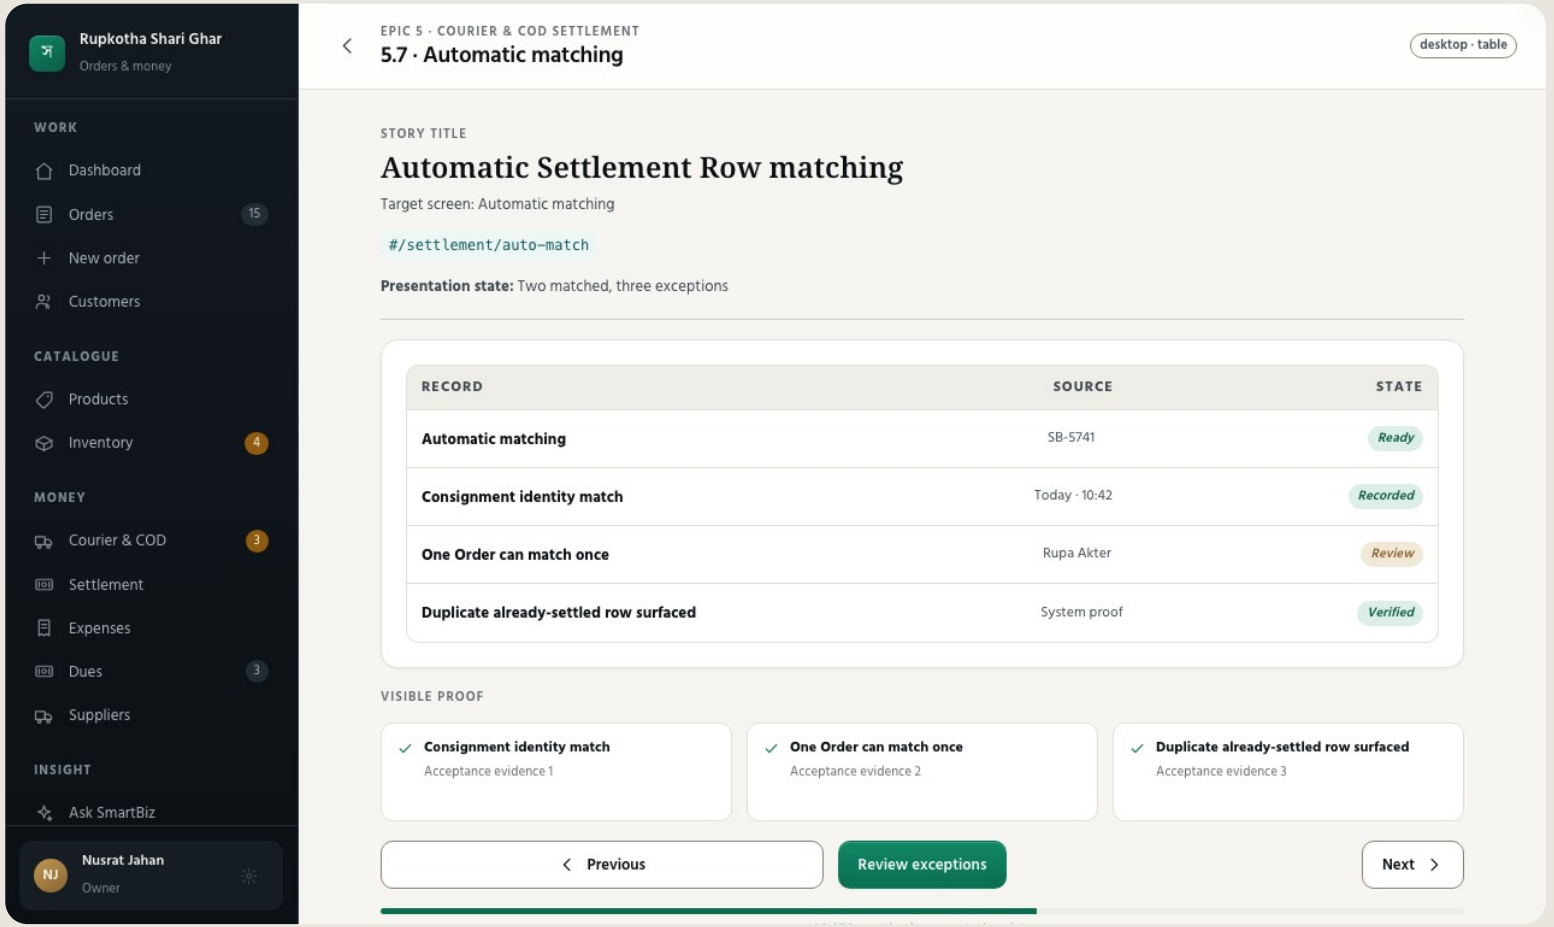

Automatic matching

State: Two matched, three exceptions

Visible proof

- ✓ Consignment identity match
- ✓ One Order can match once
- ✓ Duplicate already-settled row surfaced

Primary action: Review exceptions

EPIC 5 · STORY 5.8

Courier & COD settlement

Unmatched-row resolution and Disposition

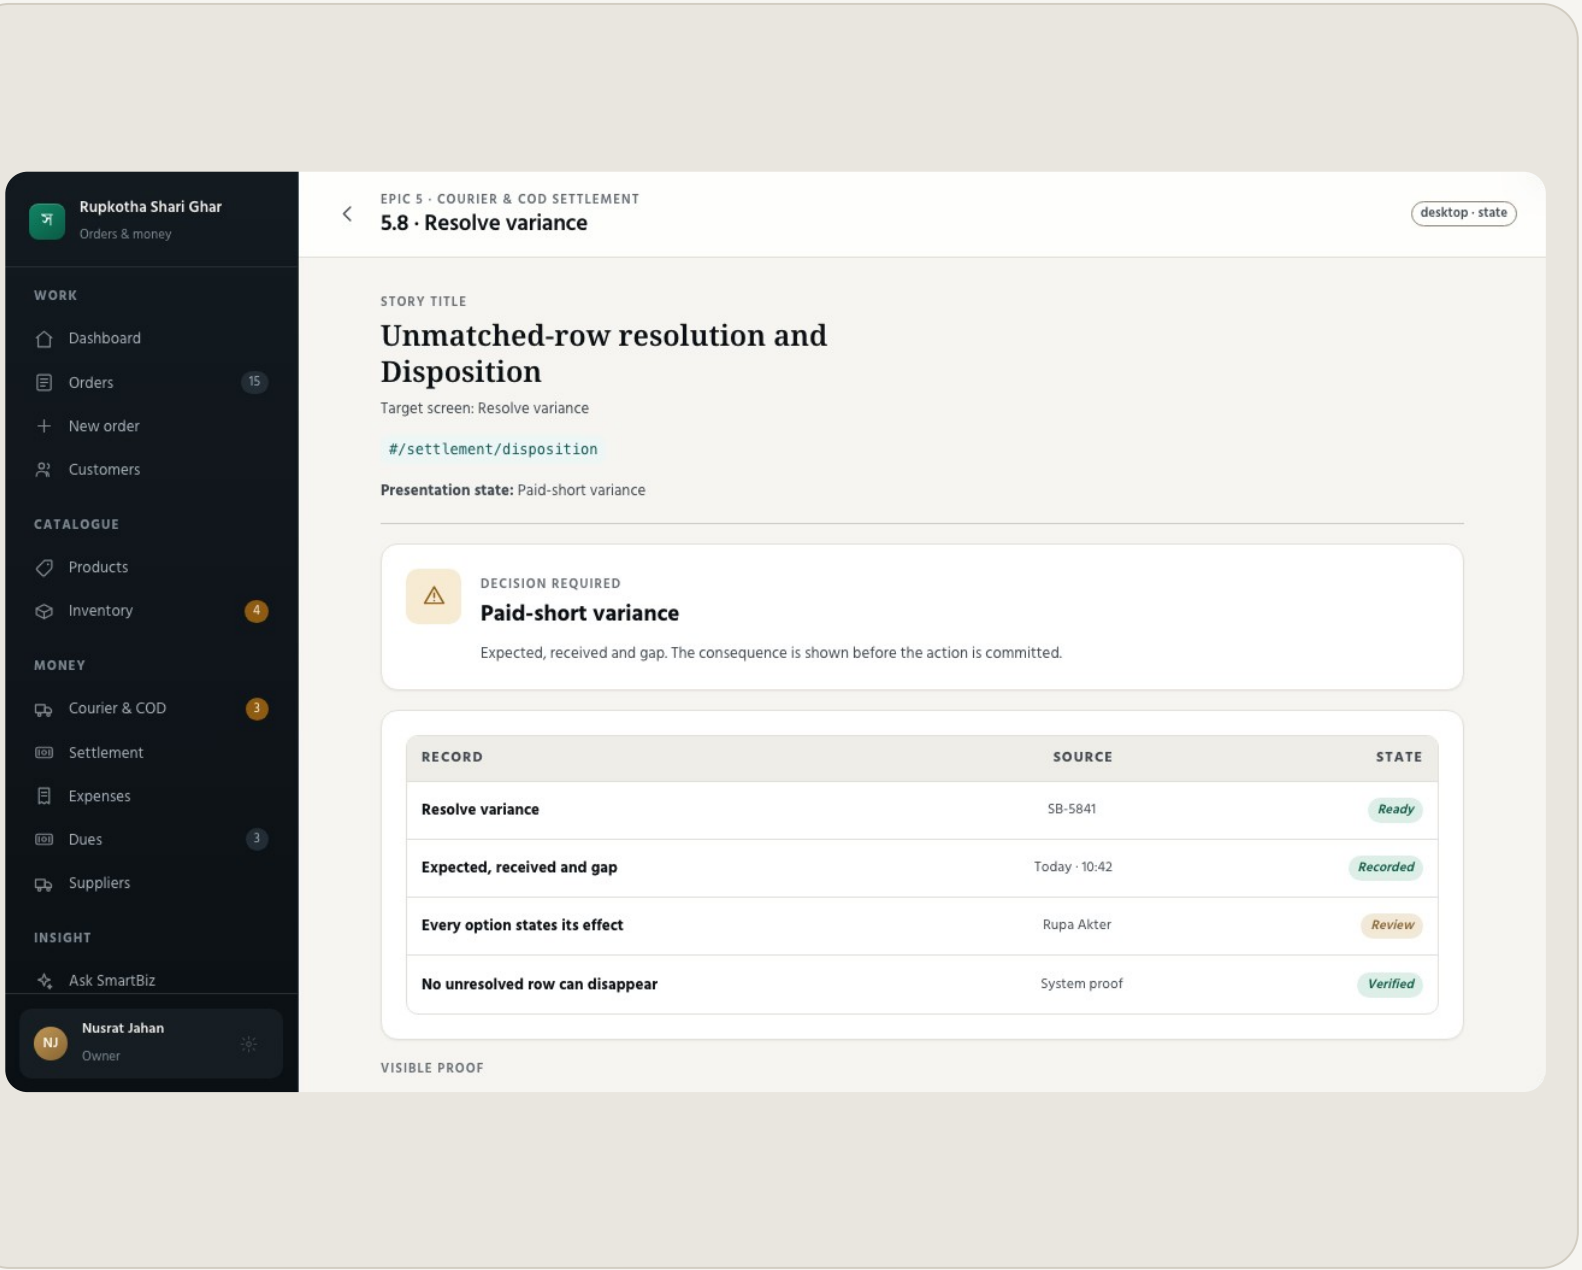

Resolve variance

State: Paid-short variance

Visible proof

- ✓ Expected, received and gap
- ✓ Every option states its effect
- ✓ No unresolved row can disappear

Primary action: Record disposition

EPIC 5 · STORY 5.9

Courier & COD settlement

Settlement Match realizes cash

Settlement match result

State: Money moved to realized once

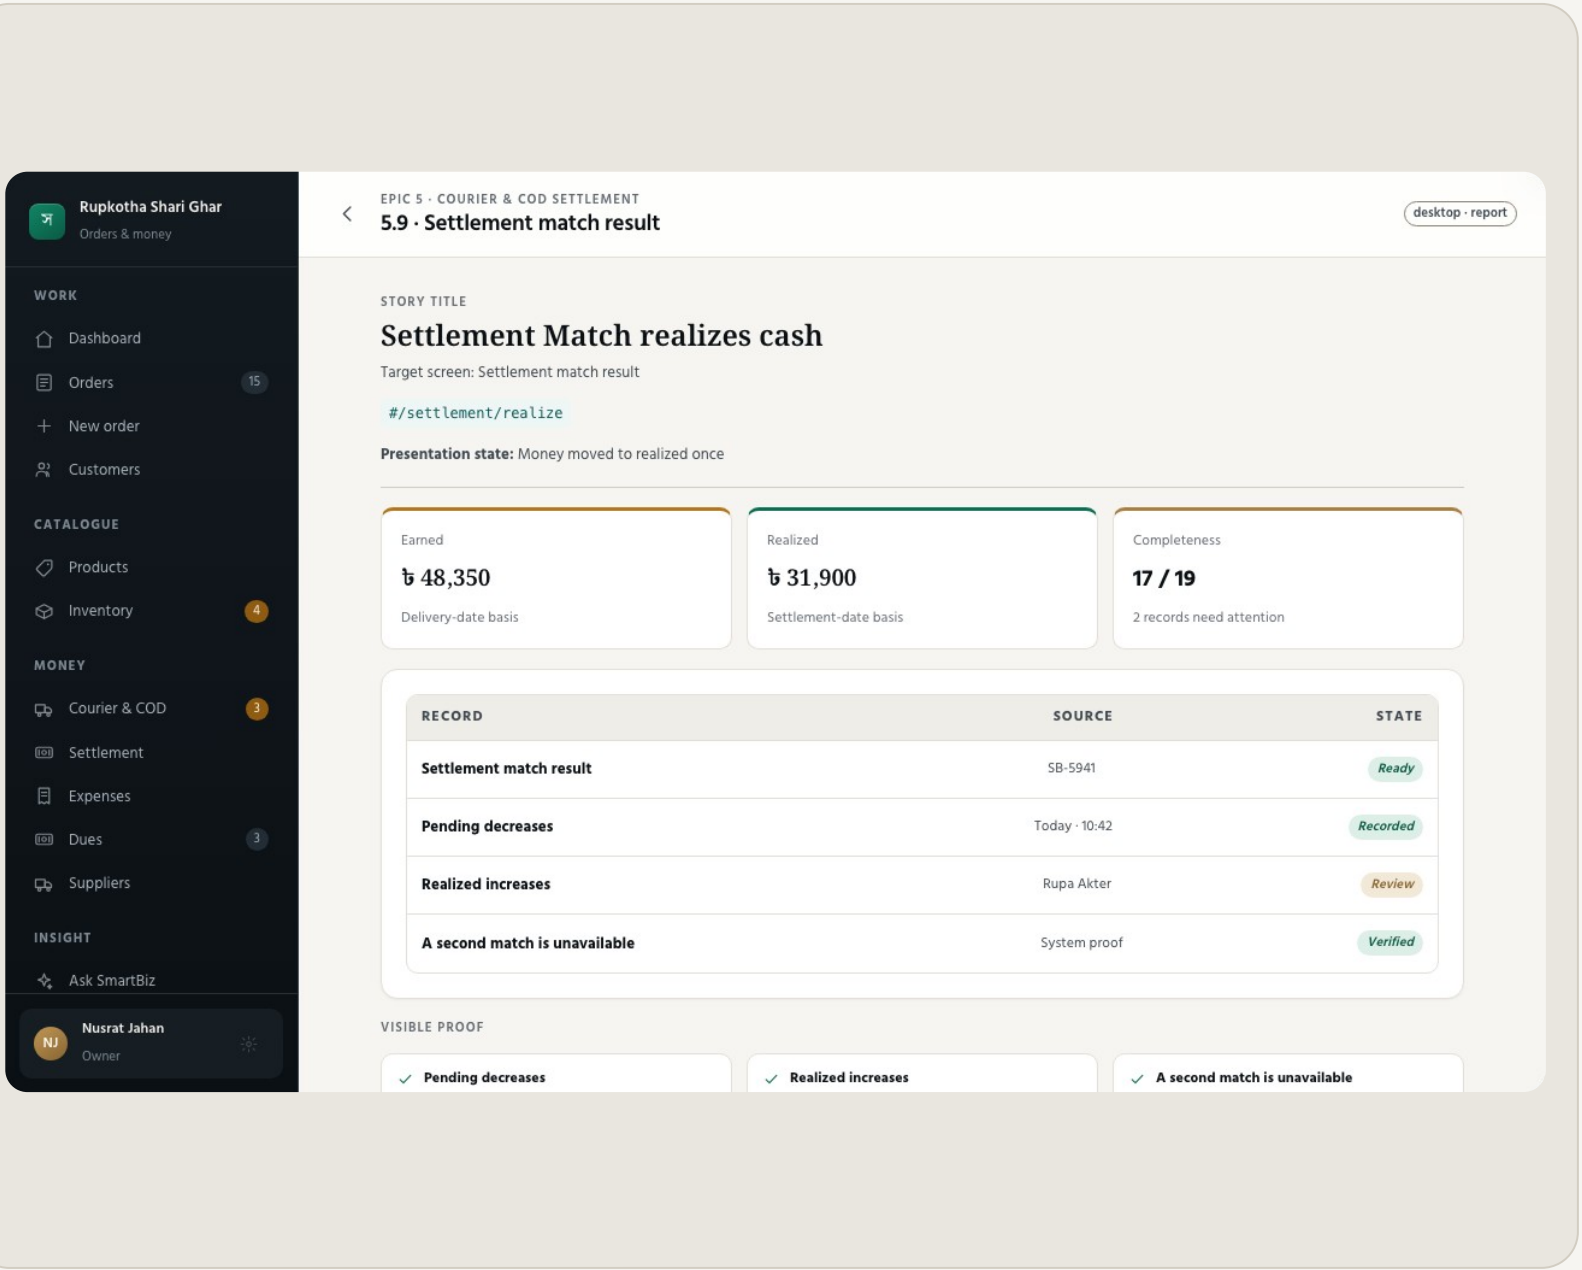

Visible proof

✓ Pending decreases

✓ Realized increases

✓ A second match is unavailable

Primary action: View matched Order

EPIC 5 · STORY 5.10

Courier & COD settlement

Batch review and close

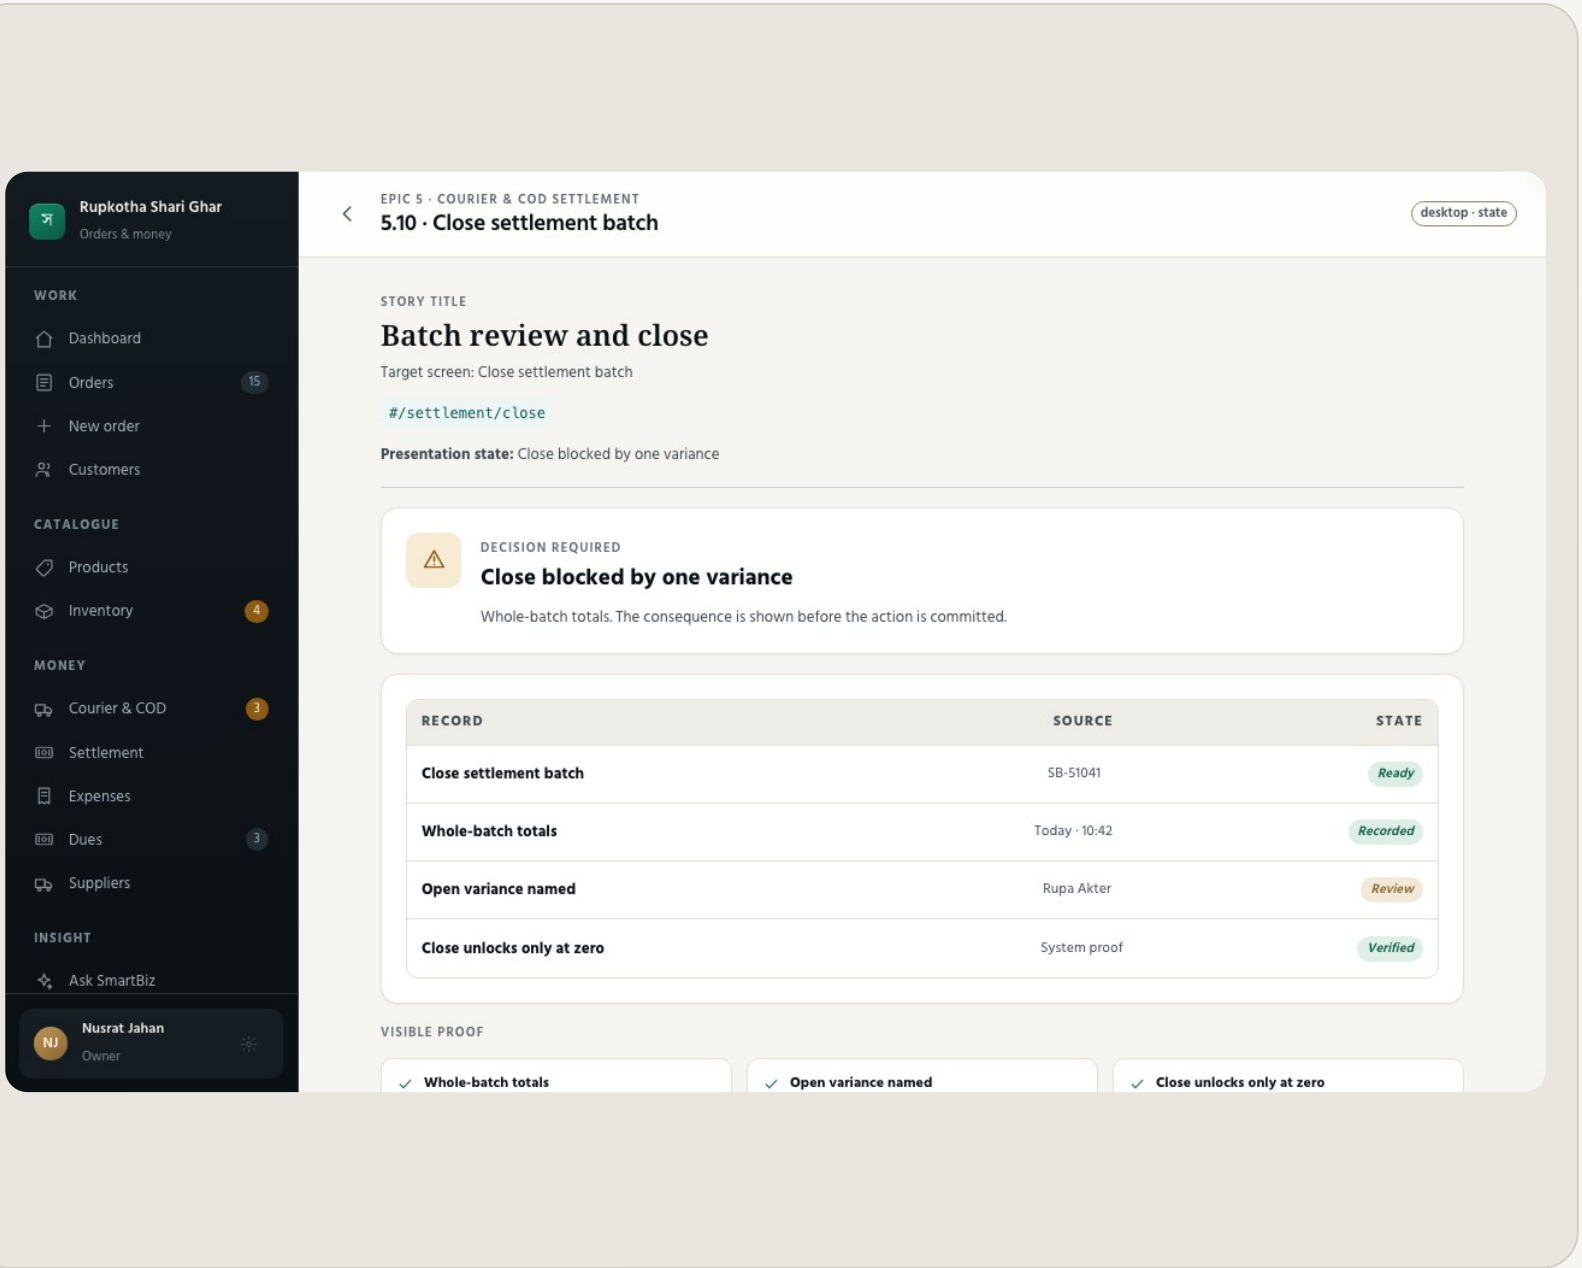

Close settlement batch

State: Close blocked by one variance

Visible proof

- ✓ Whole-batch totals
- ✓ Open variance named
- ✓ Close unlocks only at zero

Primary action: Resolve remaining variance

EPIC 5 · STORY 5.11

Courier & COD settlement

Past Batches remain inspectable

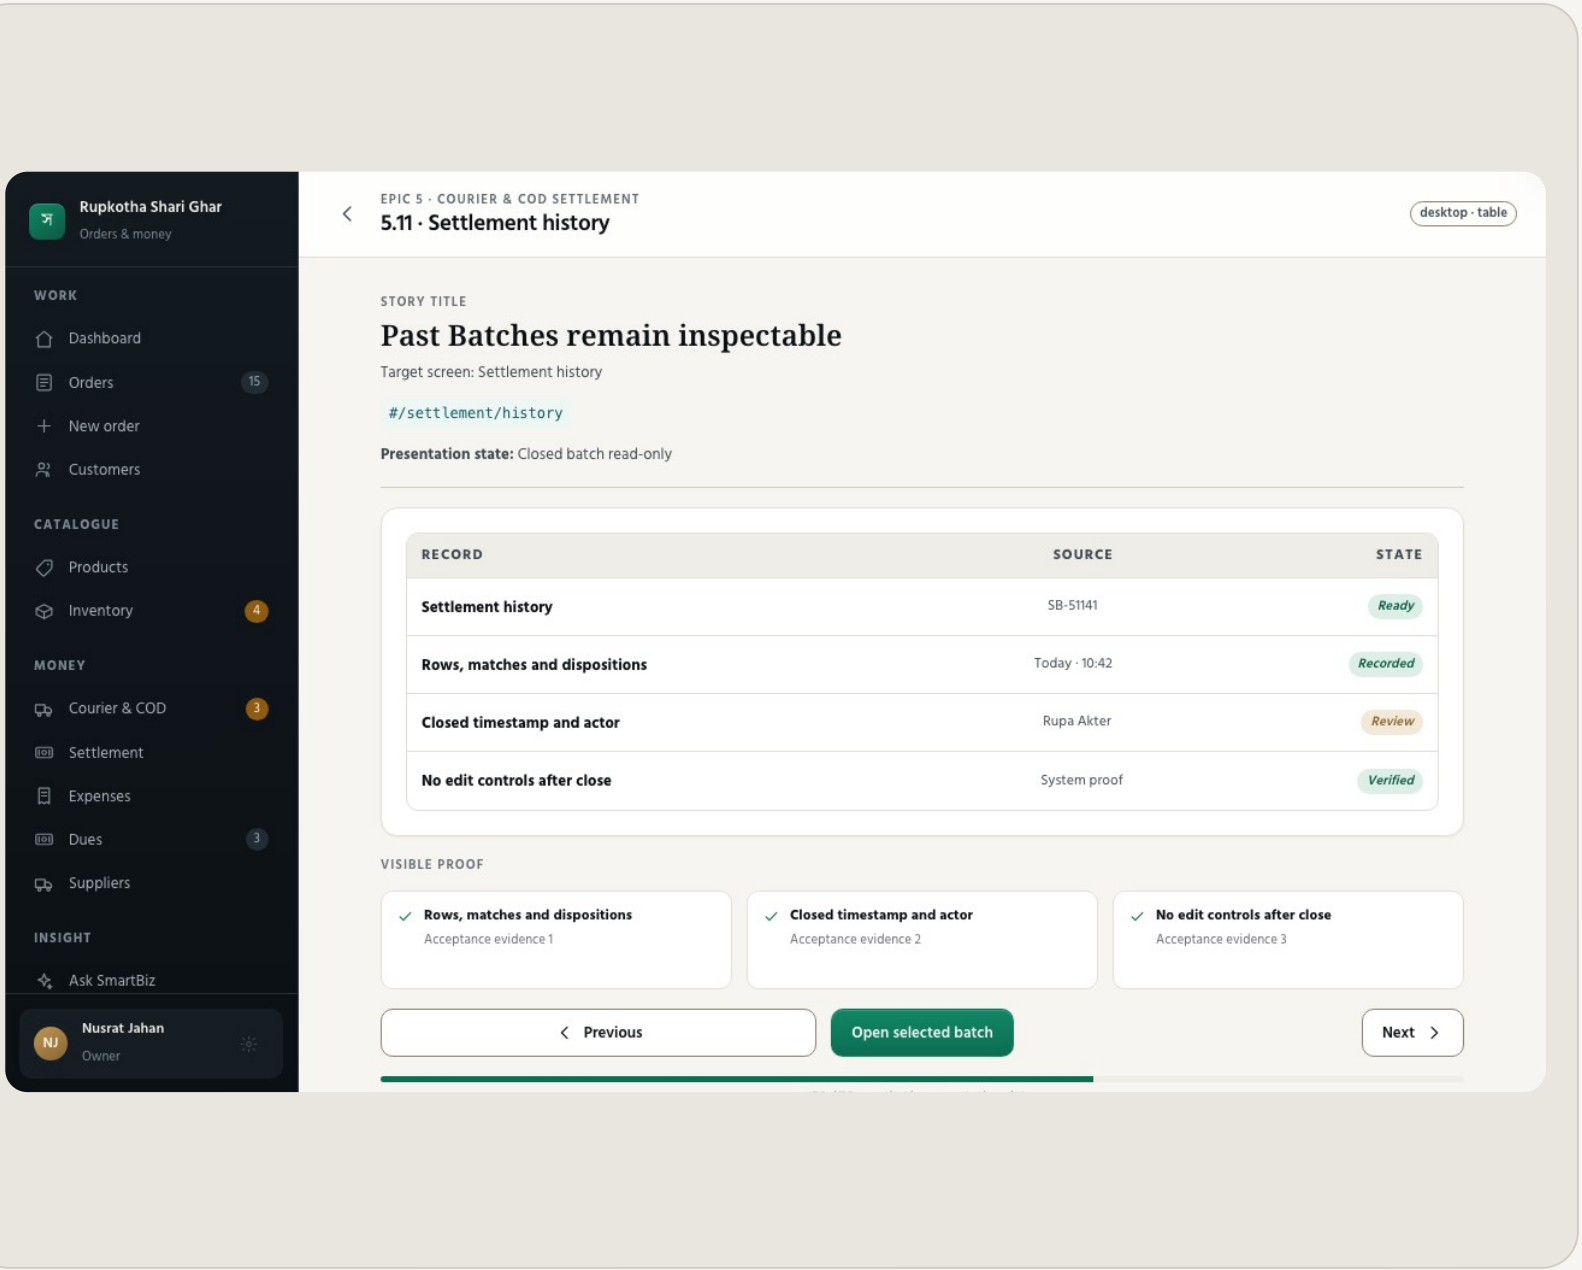

Settlement history

State: Closed batch read-only

Visible proof

- ✓ Rows, matches and dispositions
- ✓ Closed timestamp and actor
- ✓ No edit controls after close

Primary action: Open selected batch

EPIC 5 · STORY 5.12

Courier & COD settlement

Partial and grouped settlement handling

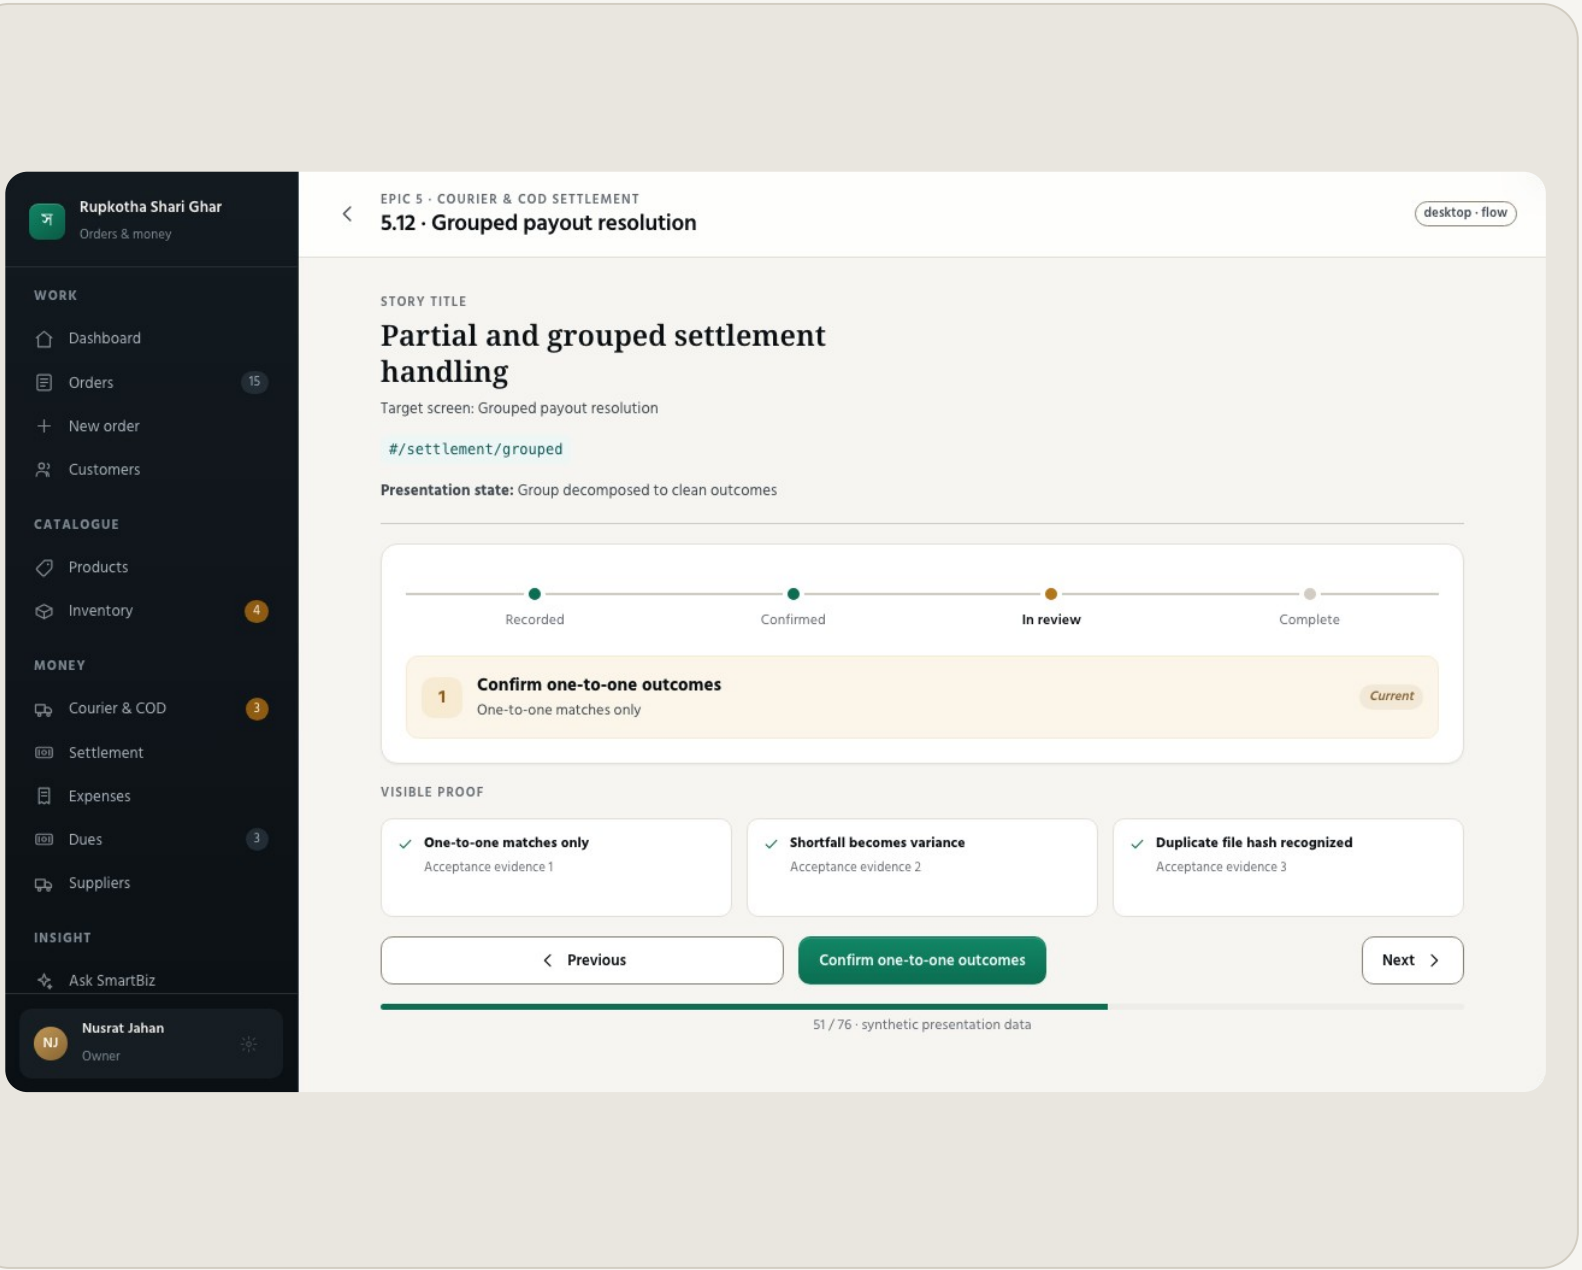

Grouped payout resolution

State: Group decomposed to clean outcomes

Visible proof

- ✓ One-to-one matches only
- ✓ Shortfall becomes variance
- ✓ Duplicate file hash recognized

Primary action: Confirm one-to-one outcomes

EPIC 6 · STORY 6.1

Decision-first dashboard

Dashboard money panel

Dashboard money panel

State: Earned and realized position

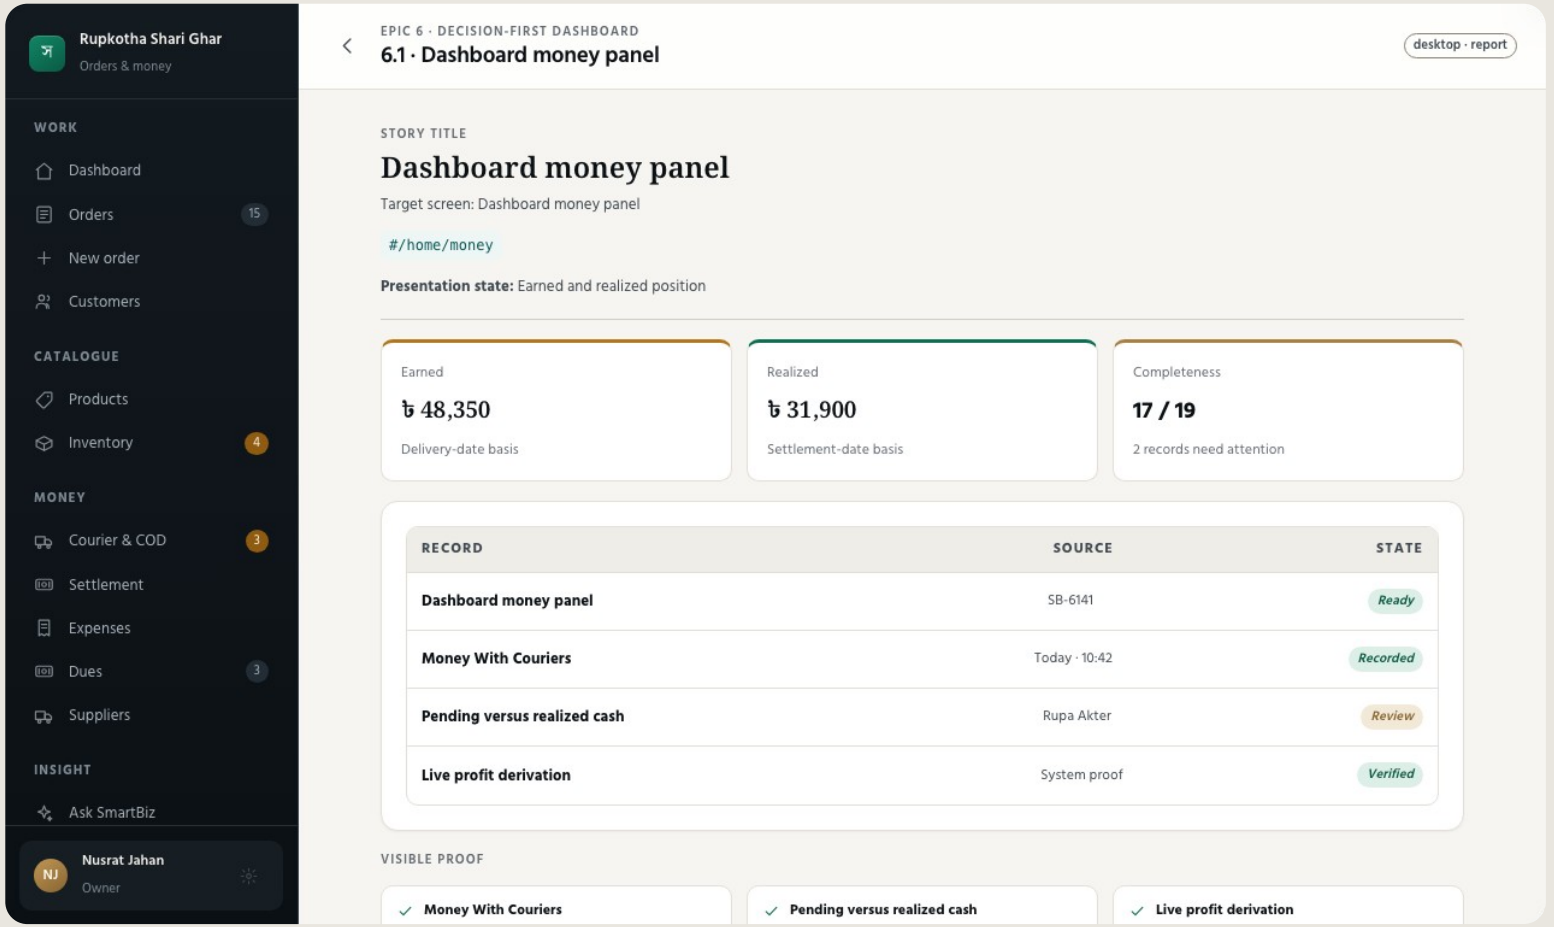

Visible proof

✓ Money With Couriers

✓ Pending versus realized cash

✓ Live profit derivation

Primary action: Open money detail

EPIC 6 · STORY 6.2

Decision-first dashboard

Dashboard operational counts

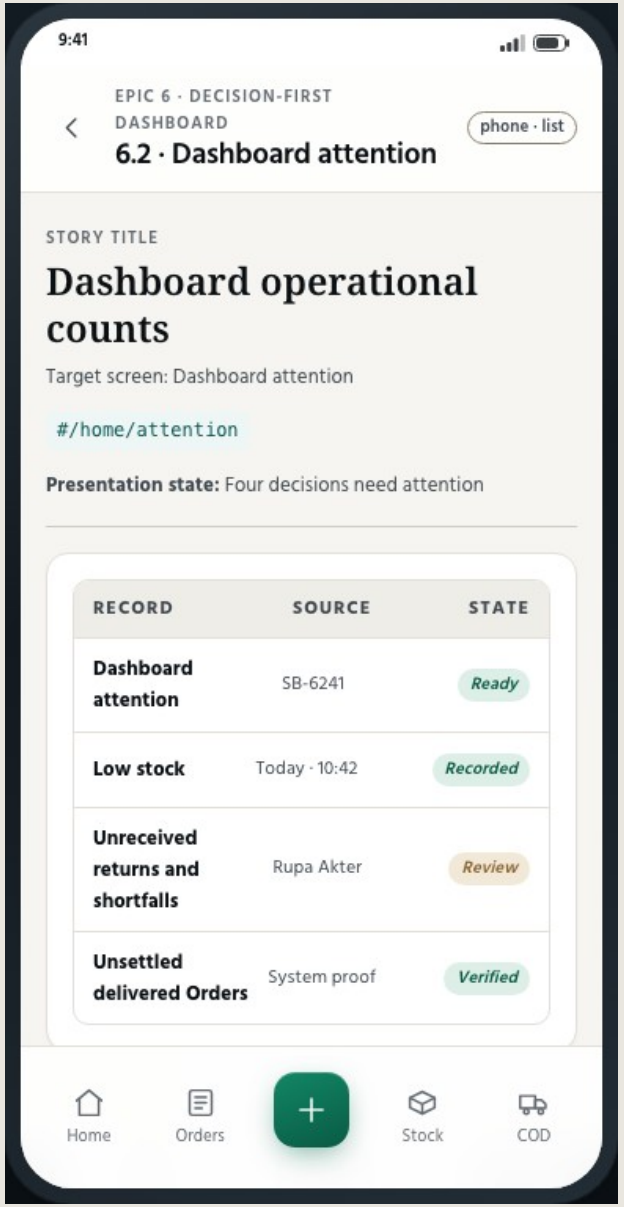

Dashboard attention

State: Four decisions need attention

Visible proof

- ✓ Low stock
- ✓ Unreceived returns and shortfalls
- ✓ Unsettled delivered Orders

Primary action: Start first decision

EPIC 6 · STORY 6.3

Decision-first dashboard

Recognition Basis on every profit figure

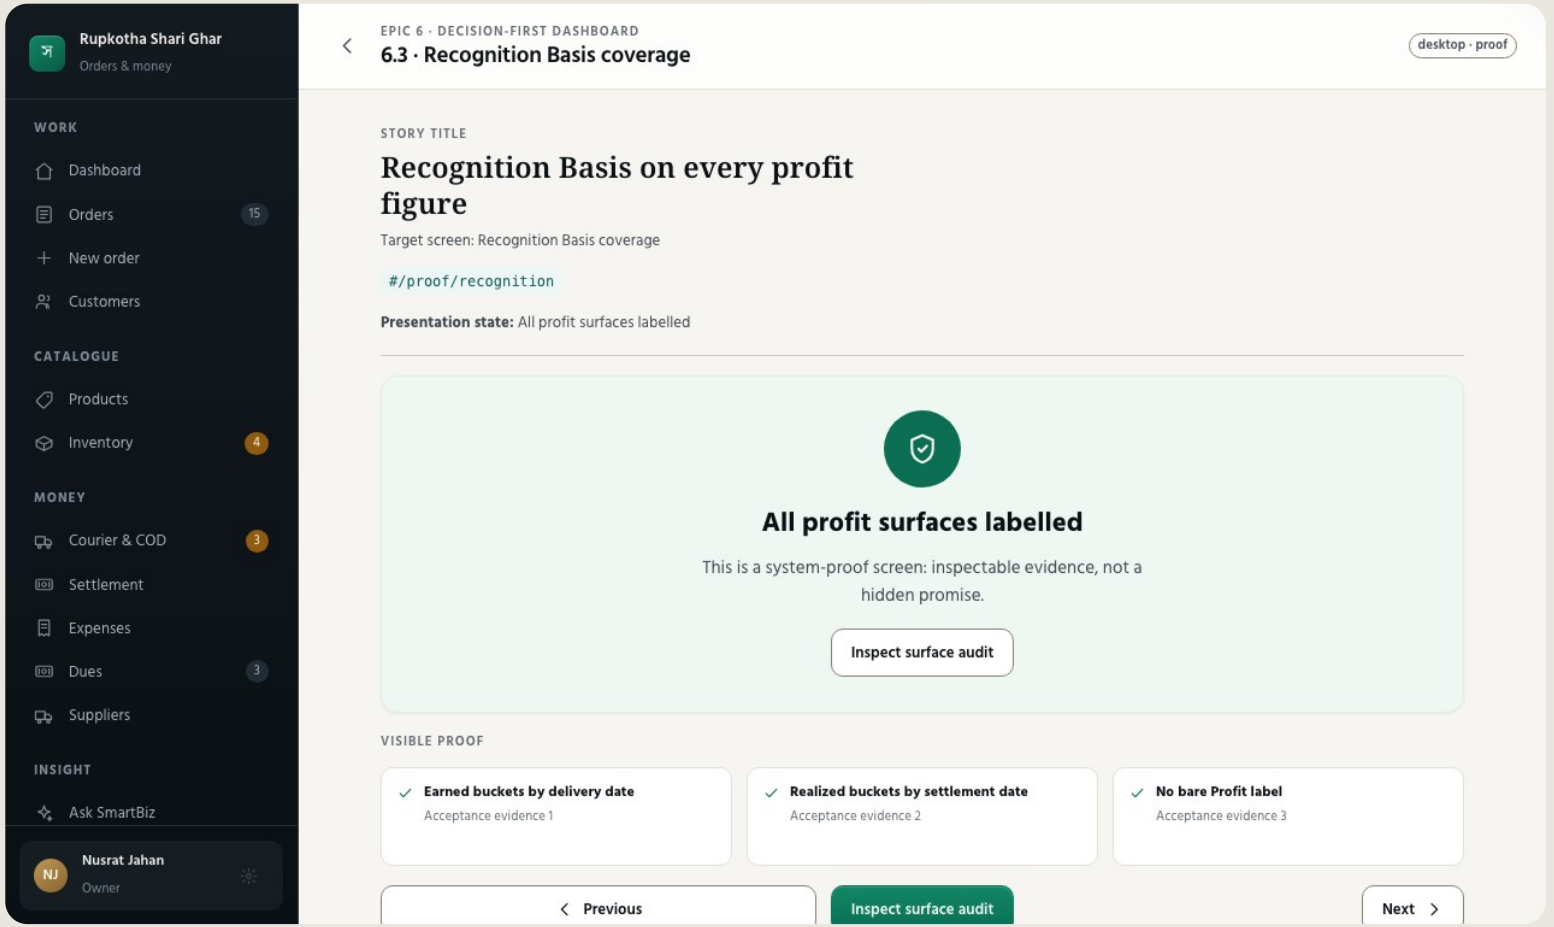

Recognition Basis coverage

State: All profit surfaces labelled

Visible proof

- ✓ Earned buckets by delivery date
- ✓ Realized buckets by settlement date
- ✓ No bare Profit label

Primary action: Inspect surface audit

EPIC 6 · STORY 6.4

Decision-first dashboard

Completeness Indicator on every profit figure

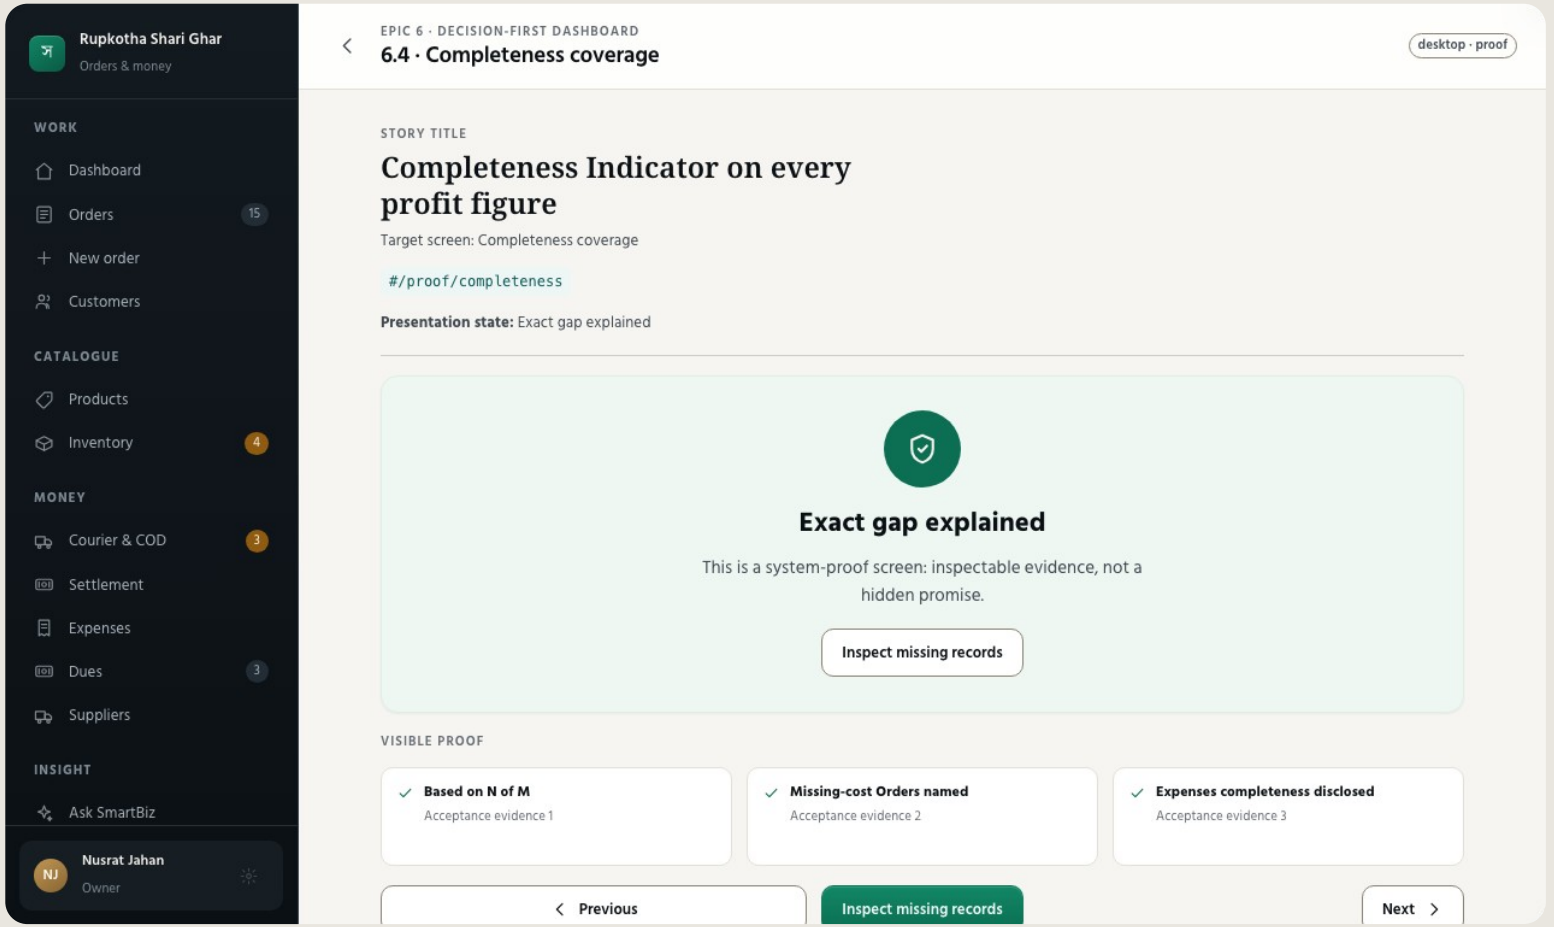

Completeness coverage

State: Exact gap explained

Visible proof

- ✓ Based on N of M
- ✓ Missing-cost Orders named
- ✓ Expenses completeness disclosed

Primary action: Inspect missing records

EPIC 6 · STORY 6.5

Decision-first dashboard

Role-composed dashboard

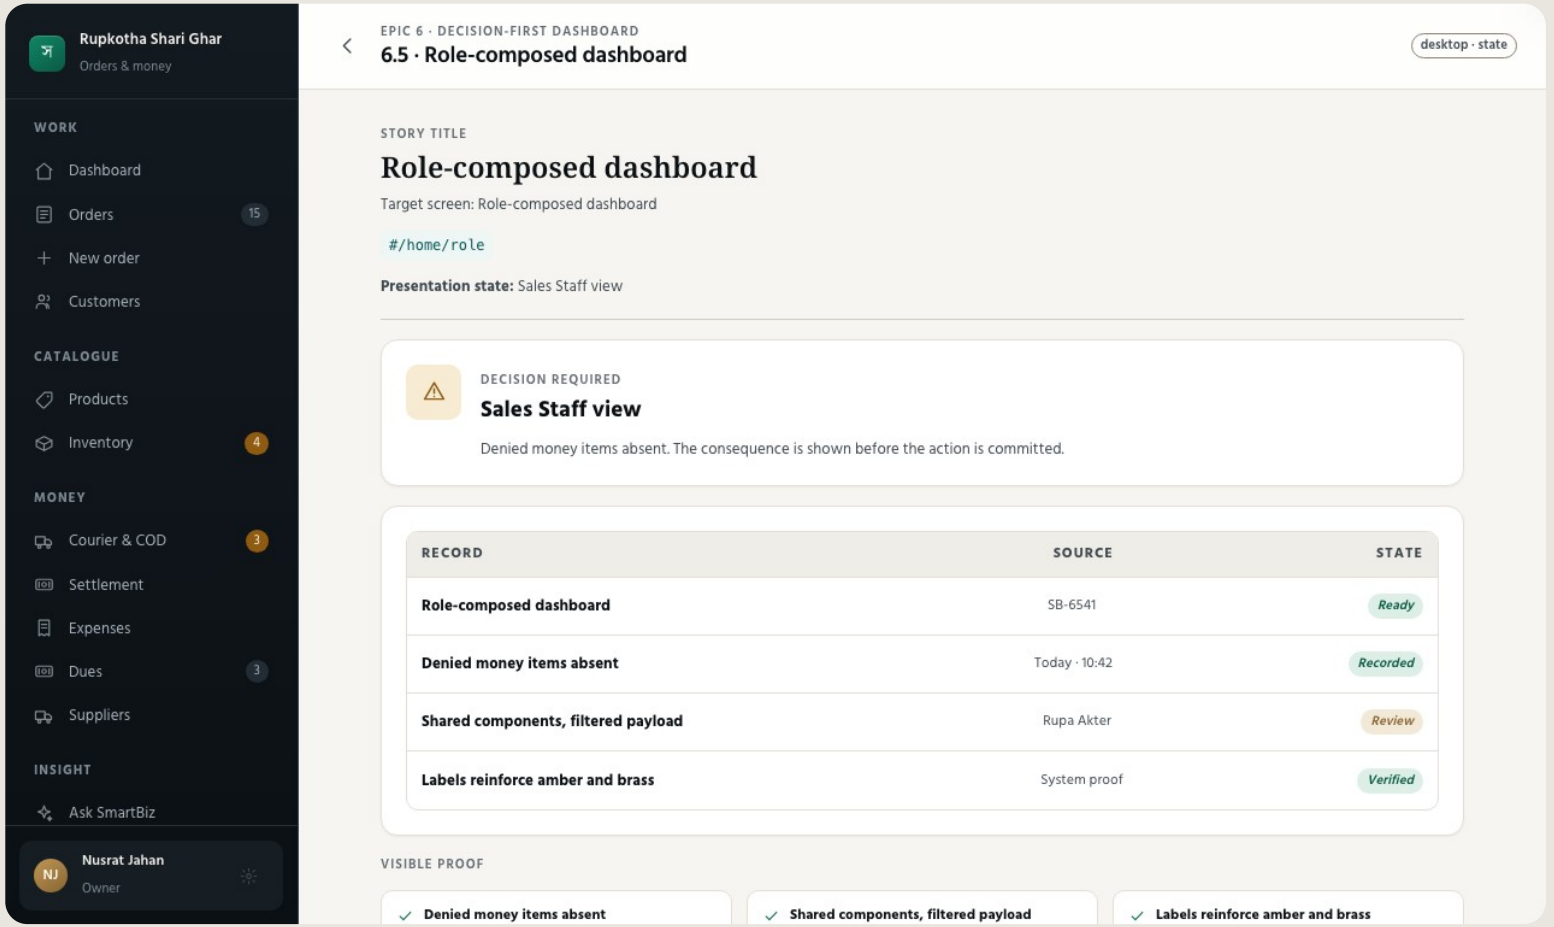

Role-composed dashboard

State: Sales Staff view

Visible proof

- ✓ Denied money items absent
- ✓ Shared components, filtered payload
- ✓ Labels reinforce amber and brass

Primary action: Compare with Owner

EPIC 7 · STORY 7.1

Customers & dues

Customer profile and full history

Customer profile

State: Complete relationship history

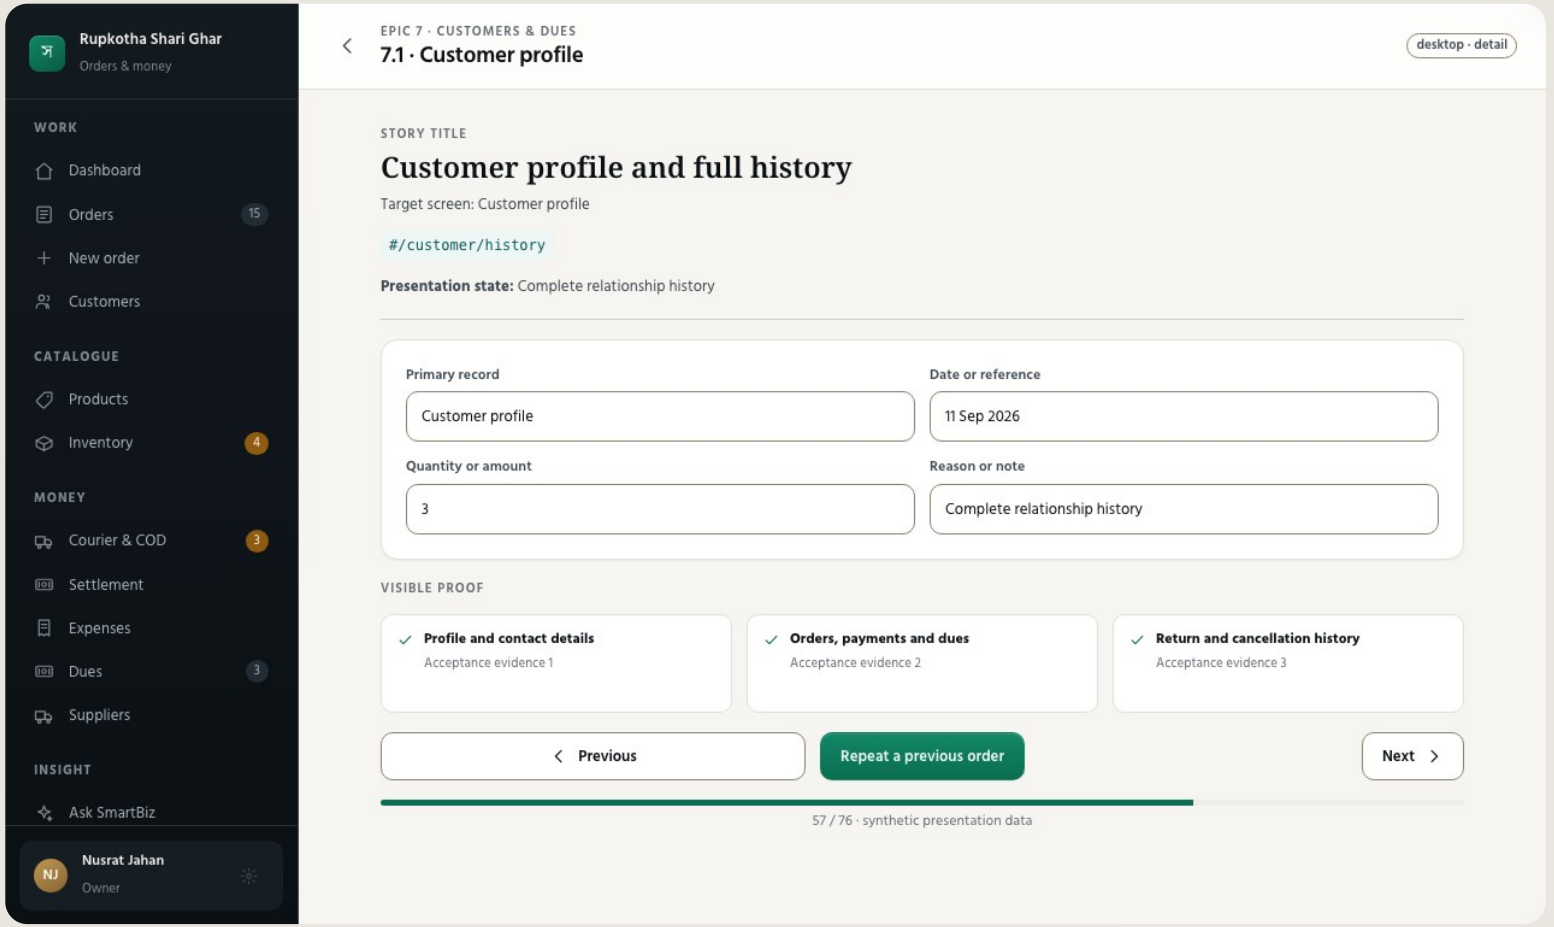

Visible proof

✓ Profile and contact details

✓ Orders, payments and dues

✓ Return and cancellation history

Primary action: Repeat a previous order

EPIC 7 · STORY 7.2

Customers & dues

Customer Risk Ratio

Customer Risk Ratio

State: High risk, formula visible

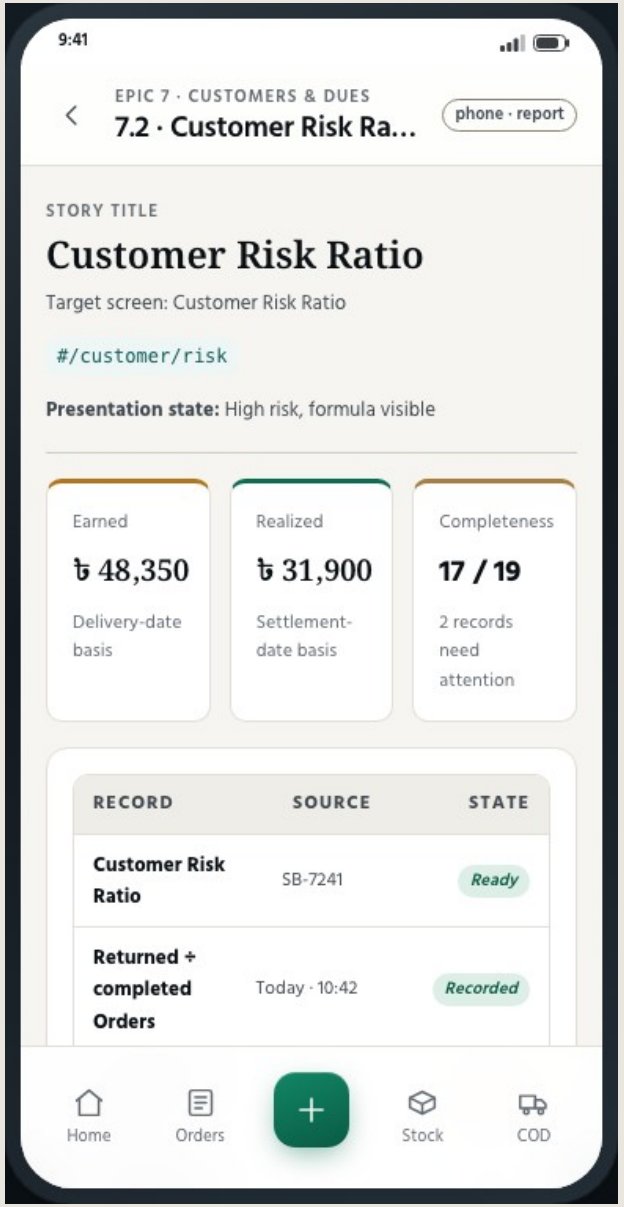

Visible proof

✓ Returned ÷ completed Orders

✓ Small-sample caveat

✓ No predictive model language

Primary action: Explain this ratio

EPIC 7 · STORY 7.3

Customers & dues

Customer Due and Customer Payment

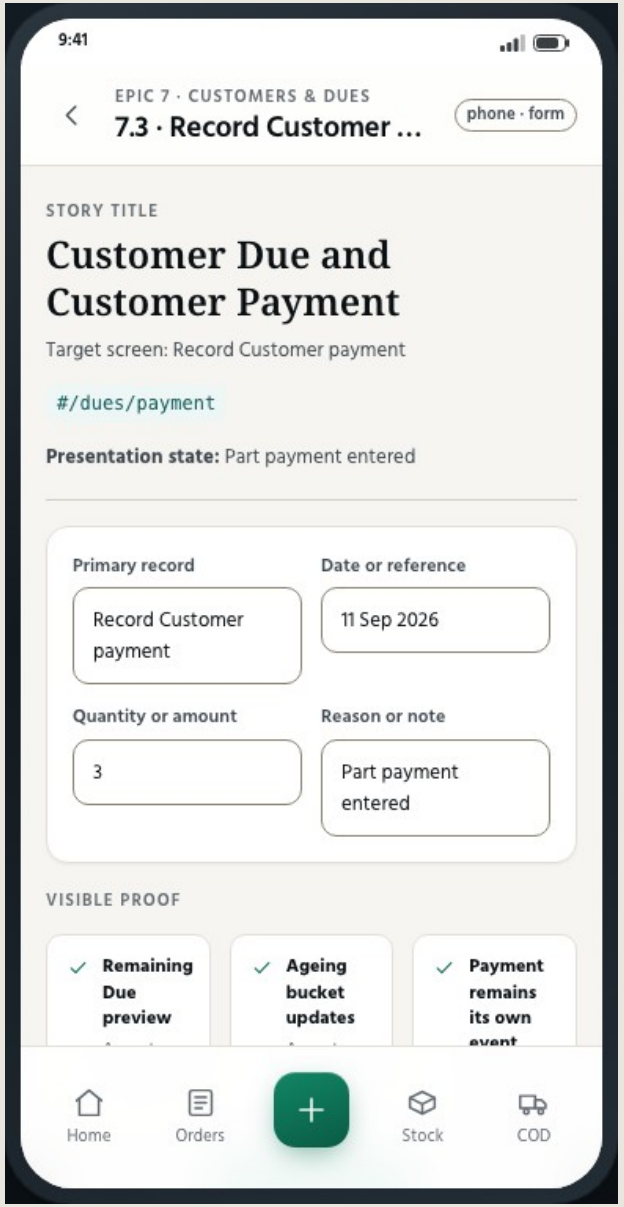

Record Customer payment

State: Part payment entered

Visible proof

- ✓ Remaining Due preview
- ✓ Ageing bucket updates
- ✓ Payment remains its own event

Primary action: Record payment

EPIC 8 · STORY 8.1

Suppliers & purchases

Supplier profile and purchase history

Supplier profile

State: Trading relationship overview

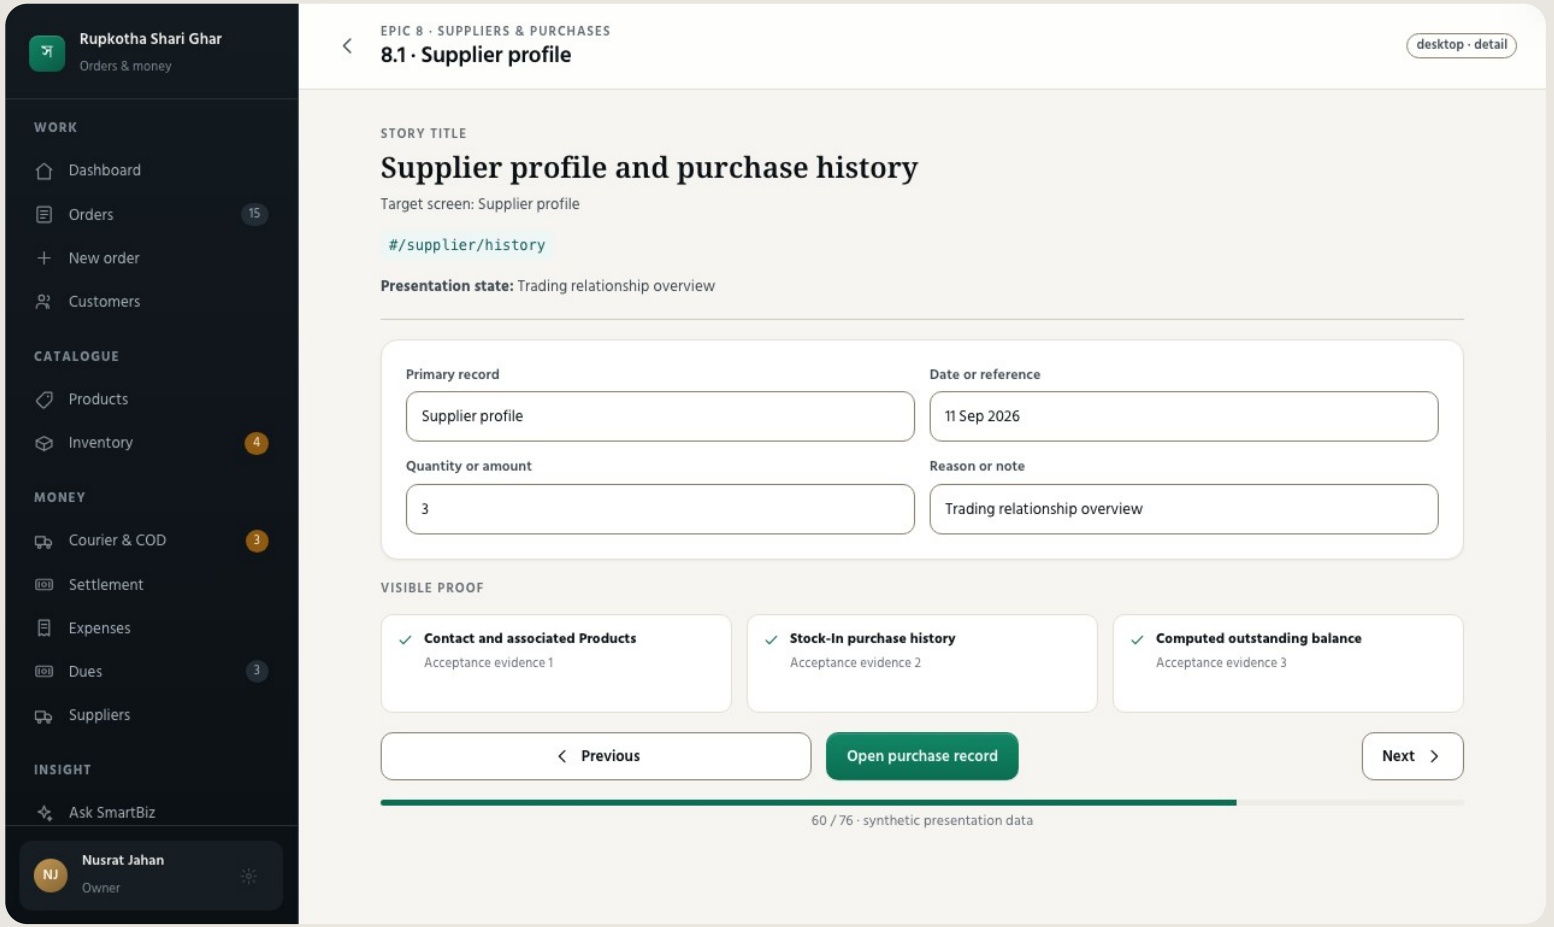

Visible proof

✓ Contact and associated Products

✓ Stock-In purchase history

✓ Computed outstanding balance

Primary action: Open purchase record

EPIC 8 · STORY 8.2

Suppliers & purchases

Stock-In payment state and Supplier Payment

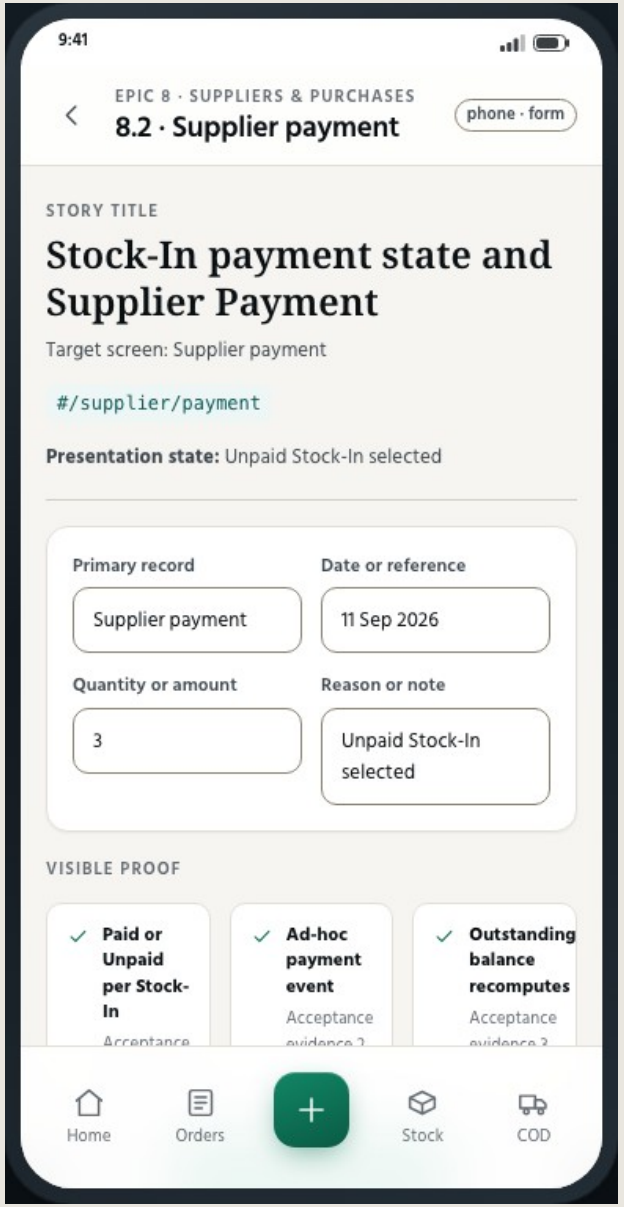

Supplier payment

State: Unpaid Stock-In selected

Visible proof

- ✓ Paid or Unpaid per Stock-In
- ✓ Ad-hoc payment event
- ✓ Outstanding balance recomputes

Primary action: Record supplier payment

EPIC 9 · STORY 9.1

Expenses

Expense entry

Add expense

State: Required fields complete

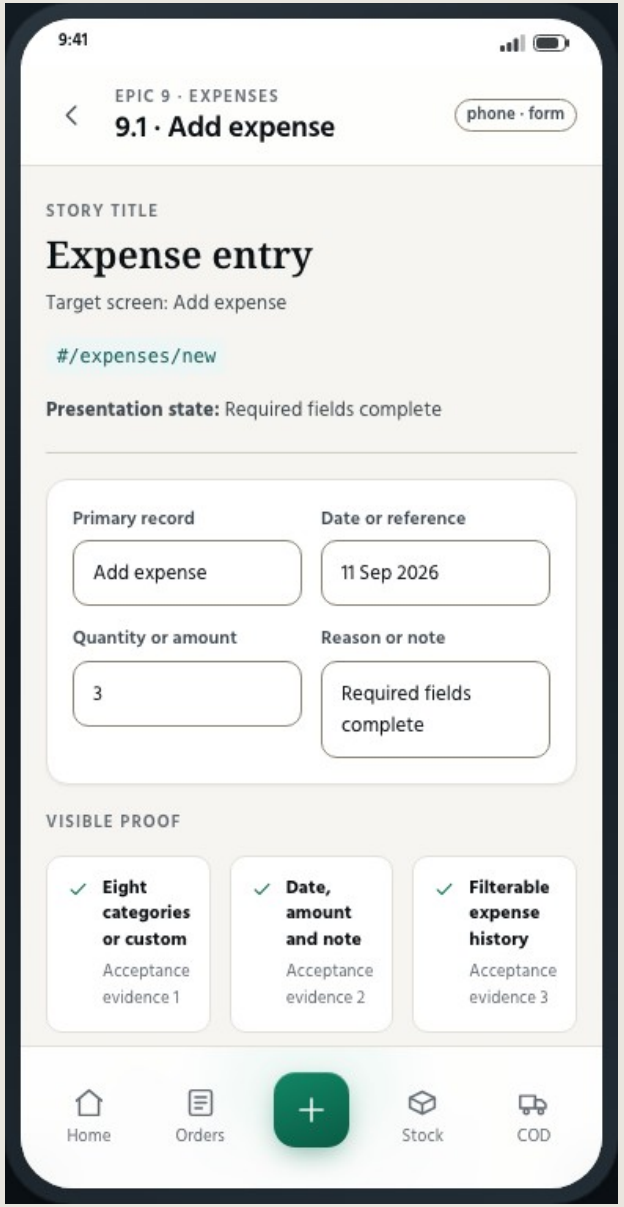

Visible proof

✓ Eight categories or custom

✓ Date, amount and note

✓ Filterable expense history

Primary action: Save expense

EPIC 9 · STORY 9.2

Expenses

Expenses reduce profit on both bases

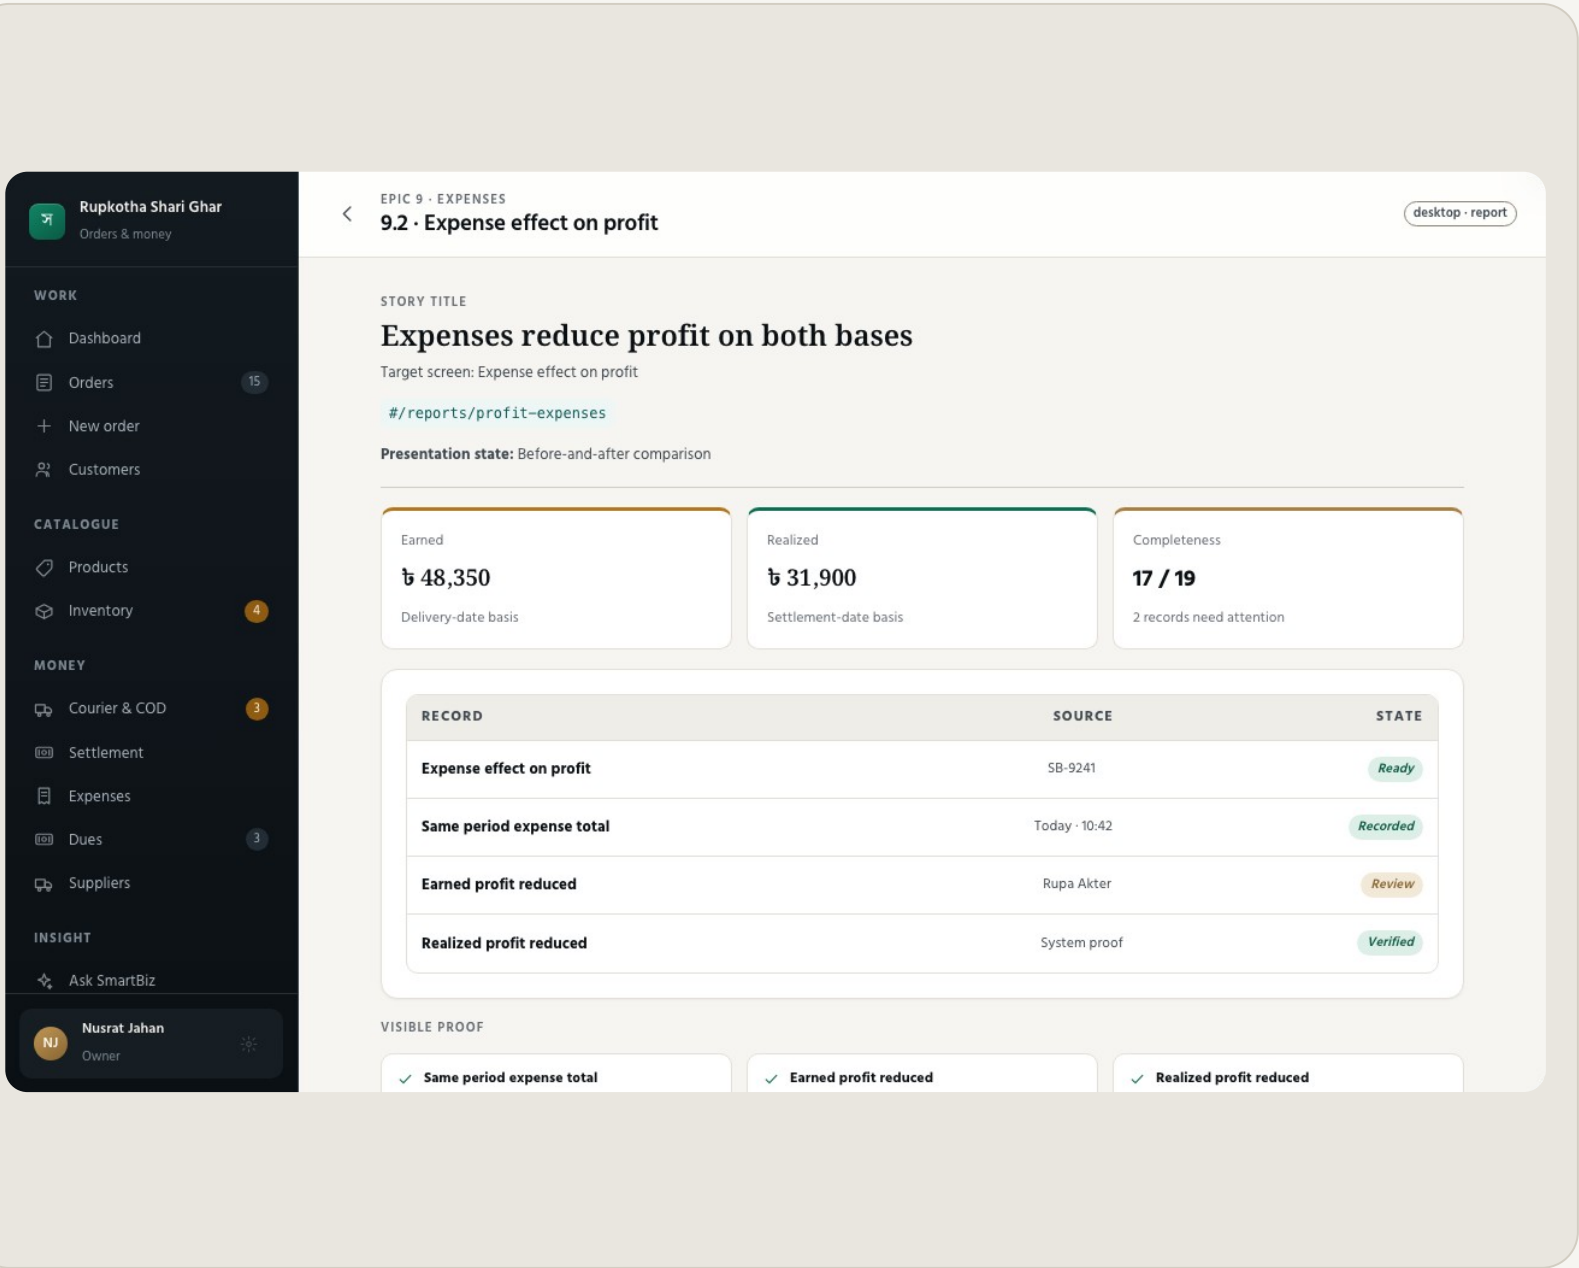

Expense effect on profit

State: Before-and-after comparison

Visible proof

- ✓ Same period expense total
- ✓ Earned profit reduced
- ✓ Realized profit reduced

Primary action: Open source expense

EPIC 10 · STORY 10.1

Reports & exports

Shared Bangla rendering pipeline

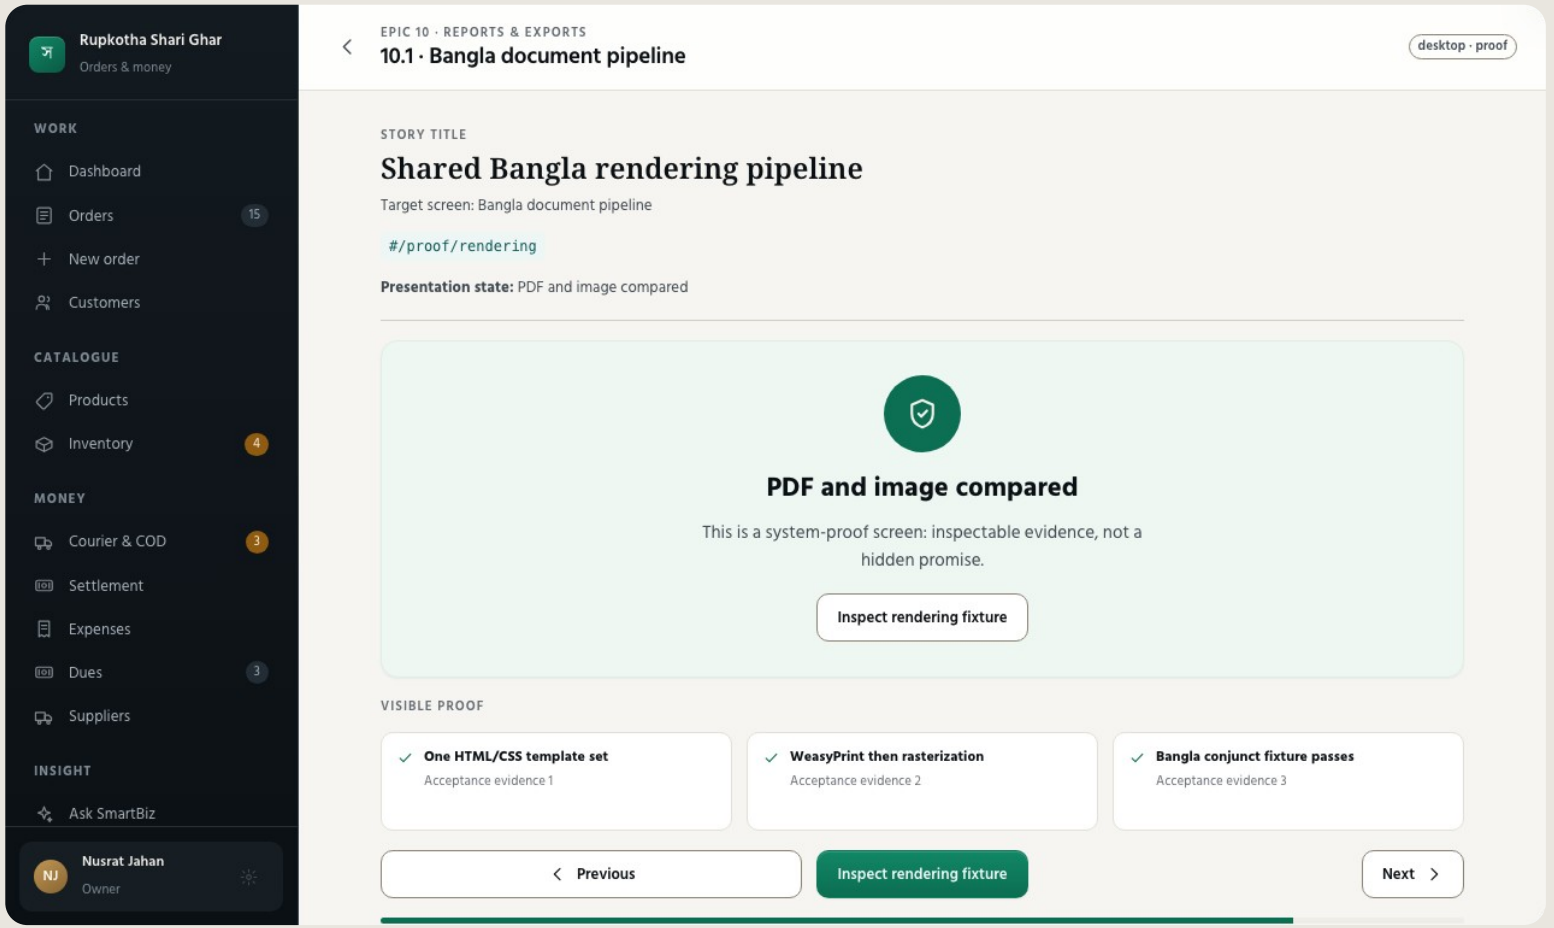

Bangla document pipeline

State: PDF and image compared

Visible proof

- ✓ One HTML/CSS template set
- ✓ WeasyPrint then rasterization
- ✓ Bangla conjunct fixture passes

Primary action: Inspect rendering fixture

EPIC 10 · STORY 10.2

Reports & exports

Nine reports with date filtering

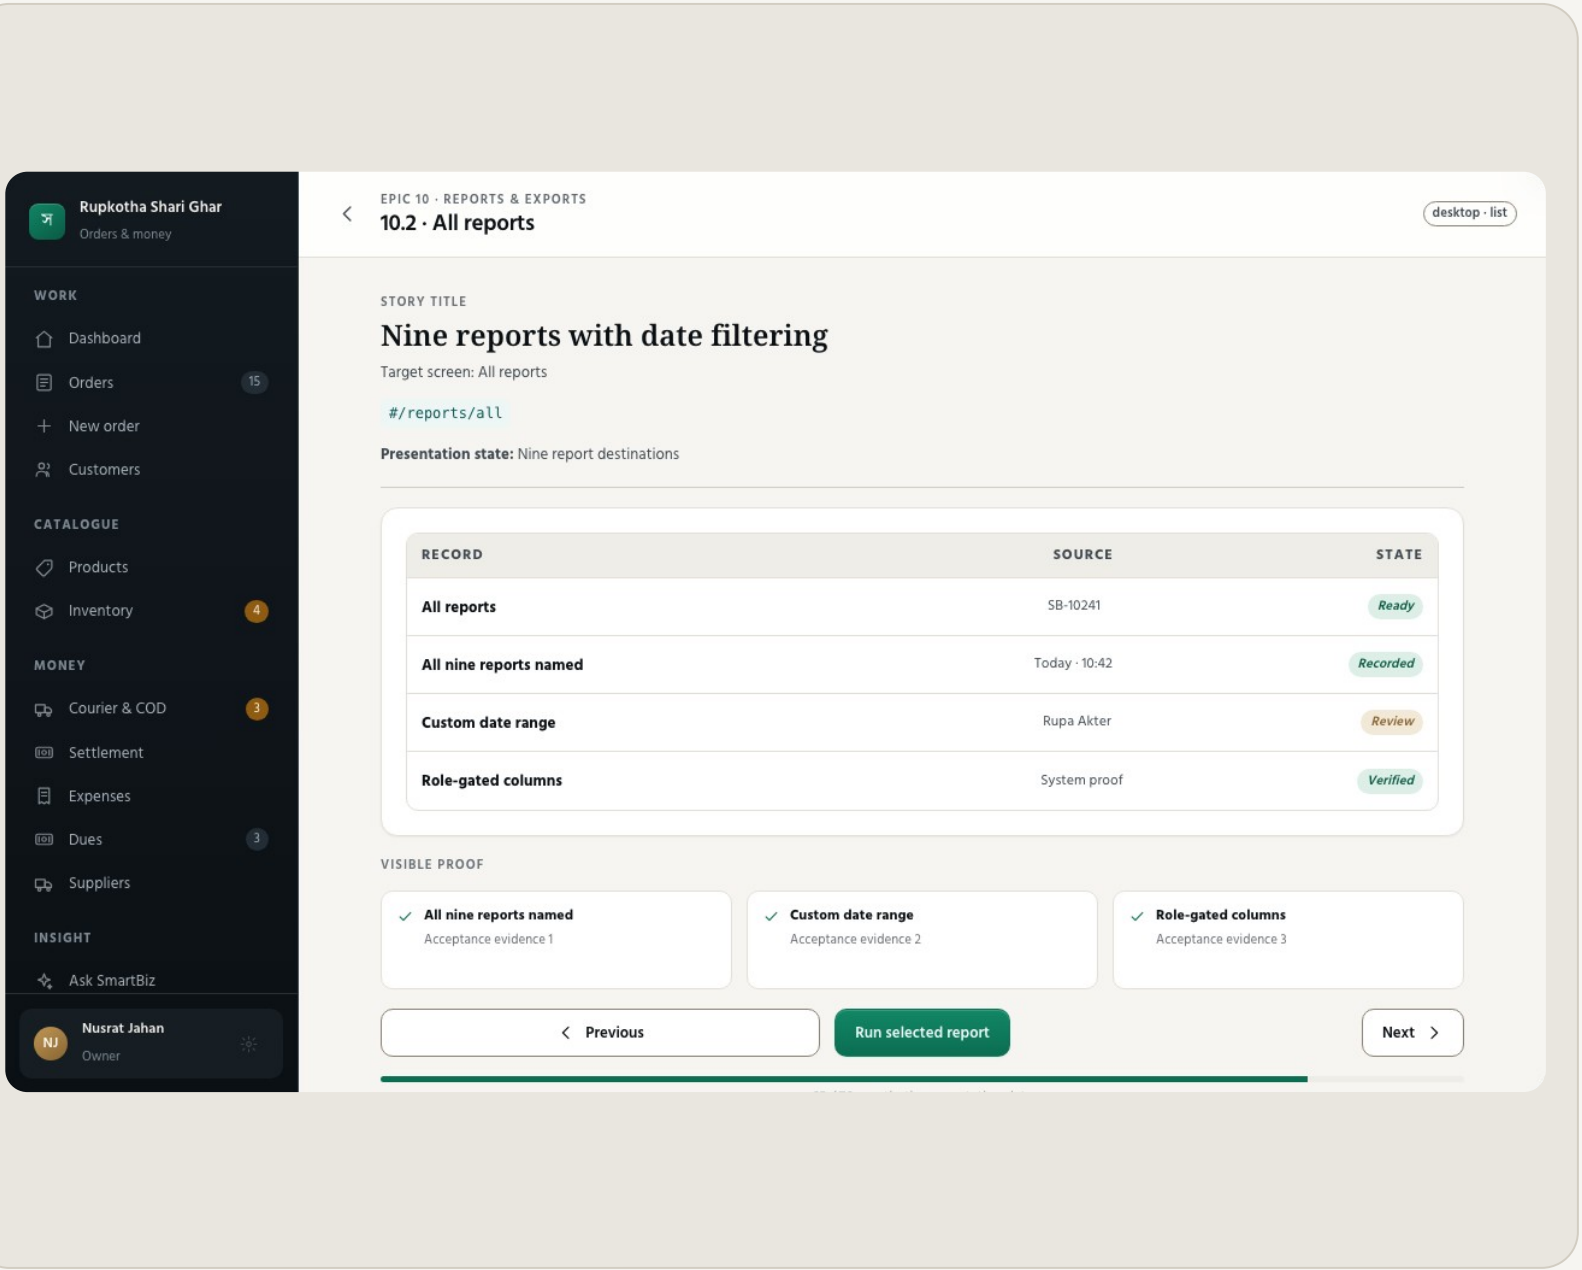

All reports

State: Nine report destinations

Visible proof

- ✓ All nine reports named
- ✓ Custom date range
- ✓ Role-gated columns

Primary action: Run selected report

EPIC 10 · STORY 10.3

Reports & exports

CSV export for all nine reports

CSV export

State: Export contents previewed

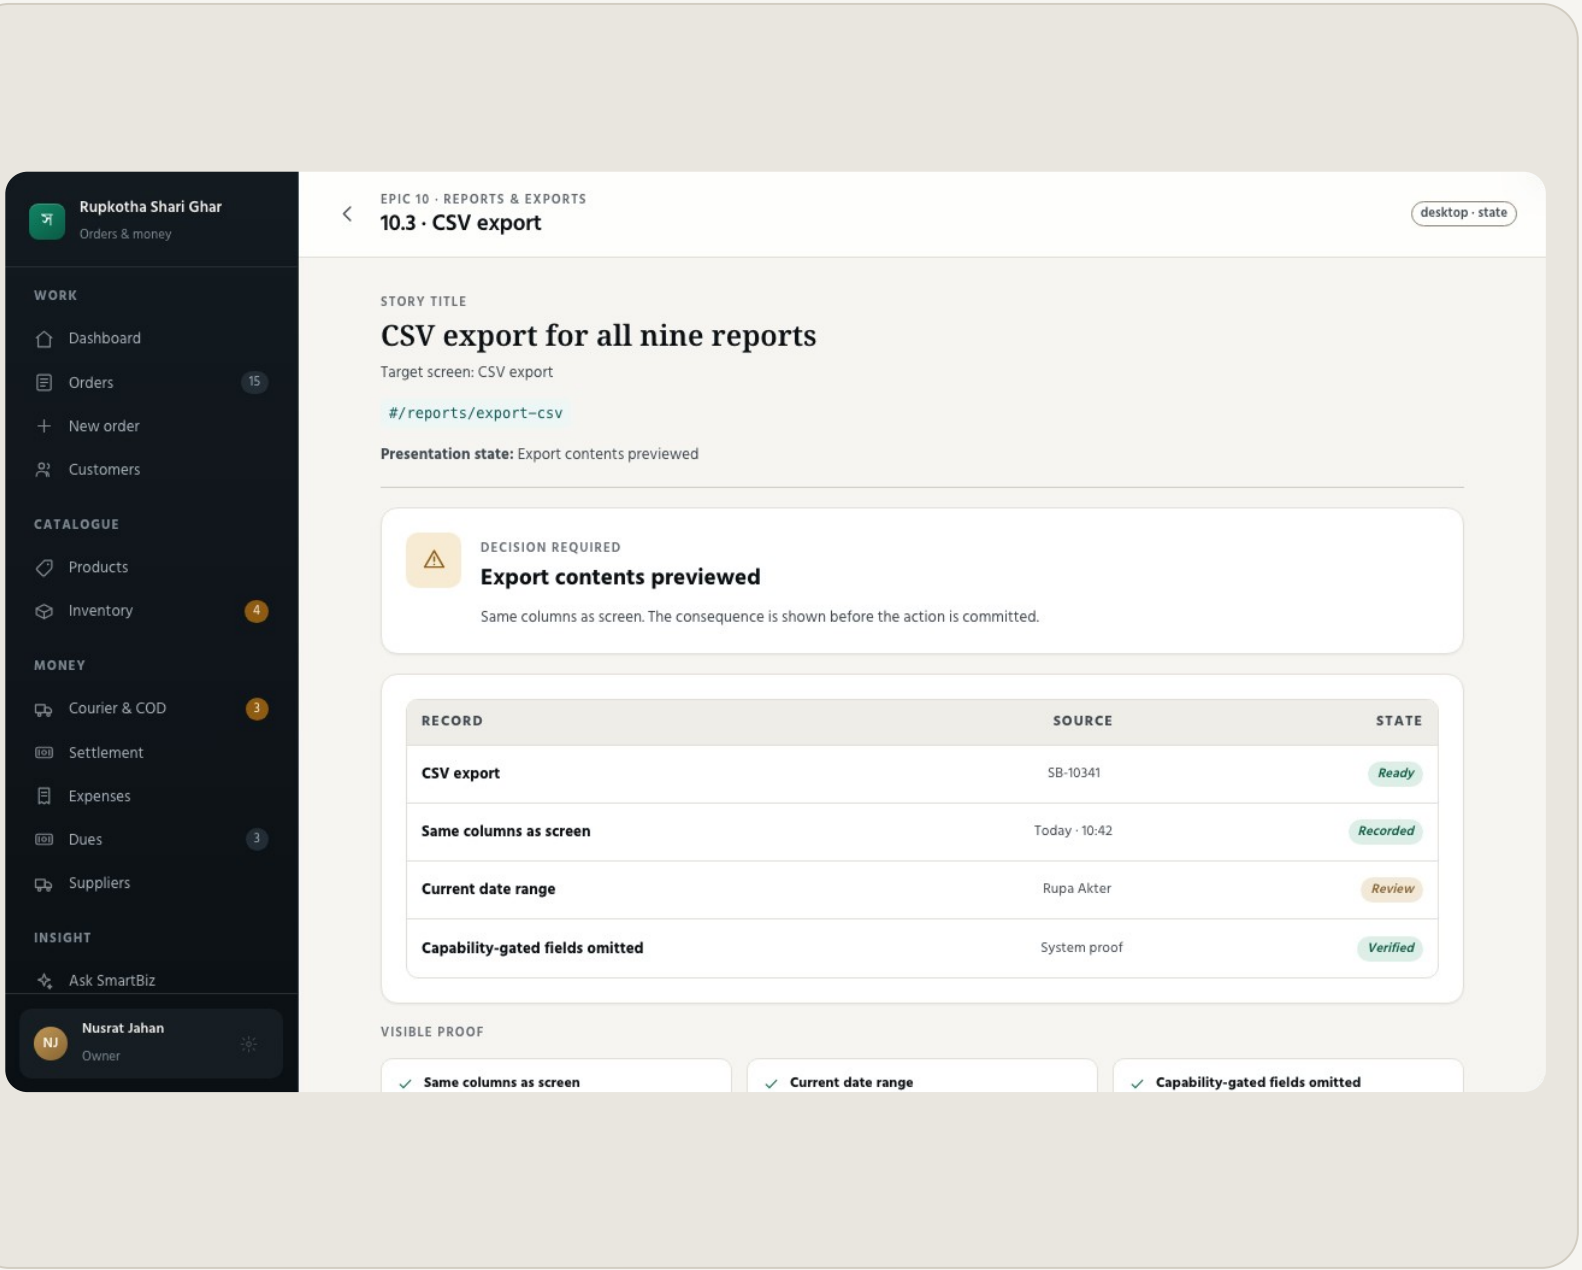

Visible proof

✓ Same columns as screen

✓ Current date range

✓ Capability-gated fields omitted

Primary action: Download CSV

EPIC 10 · STORY 10.4

Reports & exports

Bangla PDF export for three reports

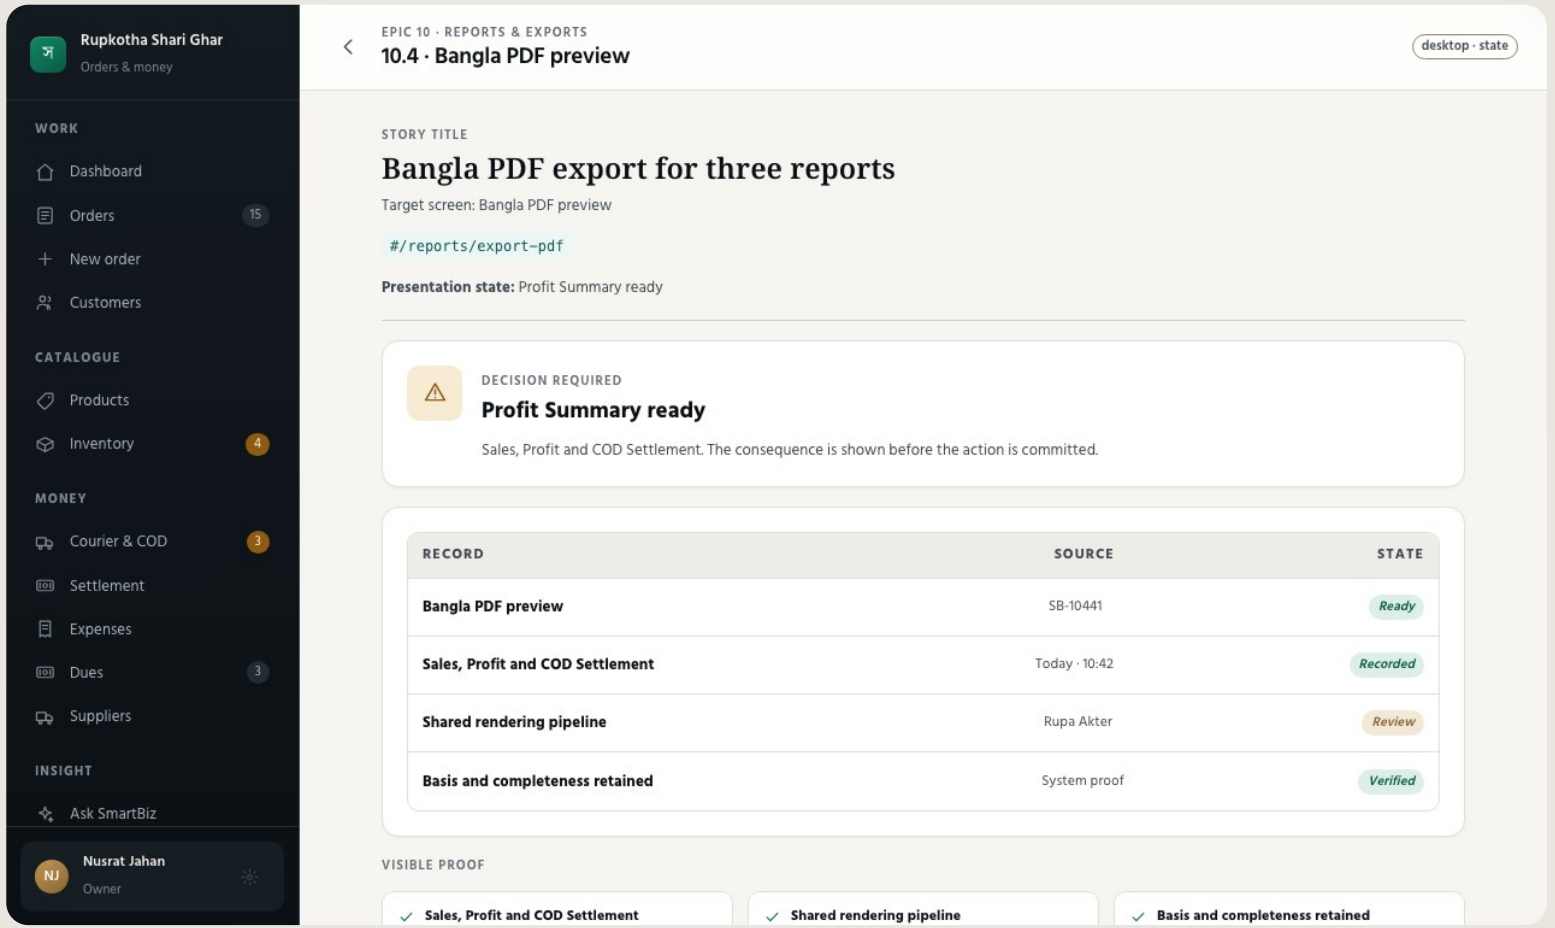

Bangla PDF preview

State: Profit Summary ready

Visible proof

- ✓ Sales, Profit and COD Settlement
- ✓ Shared rendering pipeline
- ✓ Basis and completeness retained

Primary action: Download Bangla PDF

EPIC 10 · STORY 10.5

Reports & exports

Daily Summary digest

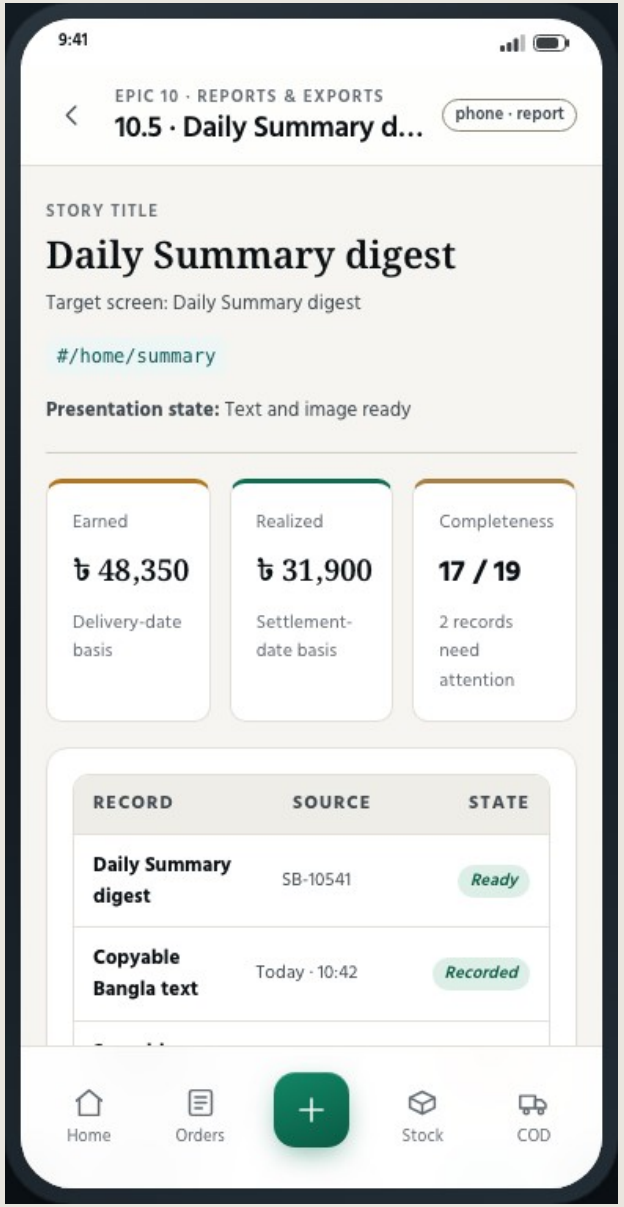

Daily Summary digest

State: Text and image ready

Visible proof

- ✓ Copyable Bangla text
- ✓ Saveable rendered image
- ✓ Orders, COD, basis and completeness

Primary action: Share daily summary

EPIC 11 · STORY 11.1

Audit & reversals

Audit Entry on every financial and inventory change

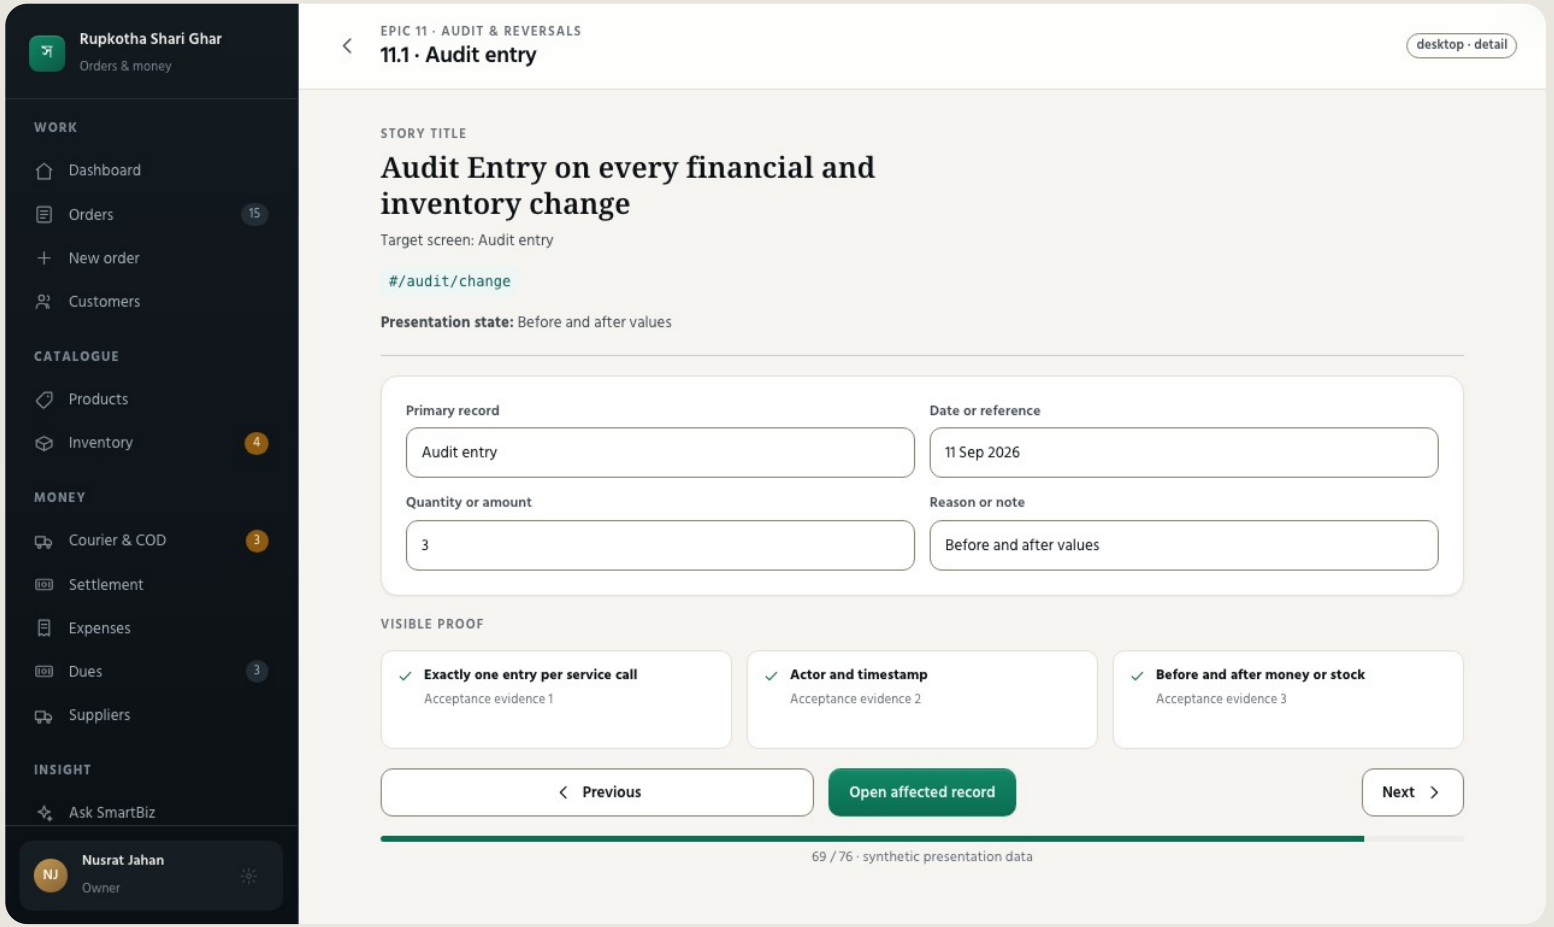

Audit entry

State: Before and after values

Visible proof

- ✓ Exactly one entry per service call
- ✓ Actor and timestamp
- ✓ Before and after money or stock

Primary action: Open affected record

EPIC 11 · STORY 11.2

Audit & reversals

Audit trail view and filtering

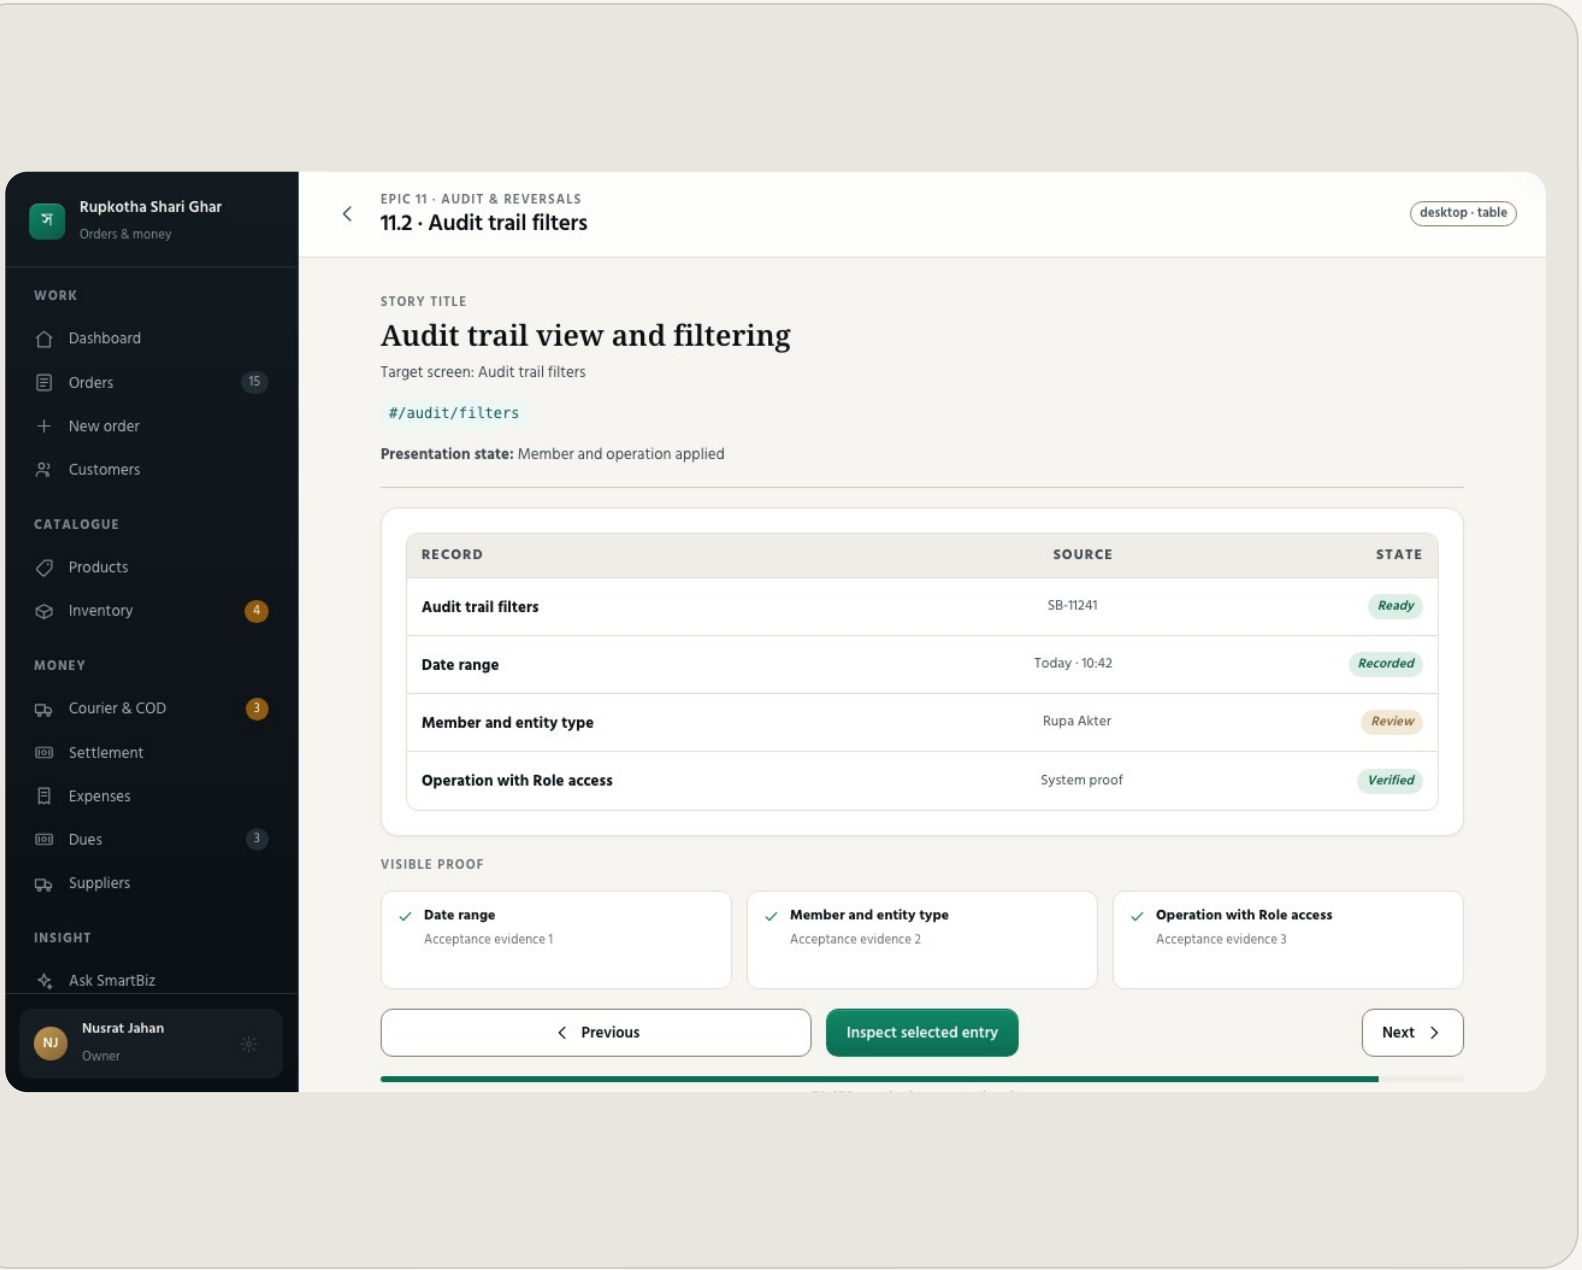

Audit trail filters

State: Member and operation applied

Visible proof

- ✓ Date range
- ✓ Member and entity type
- ✓ Operation with Role access

Primary action: Inspect selected entry

EPIC 11 · STORY 11.3

Audit & reversals

Reversal via Compensating Entry for the seven operations

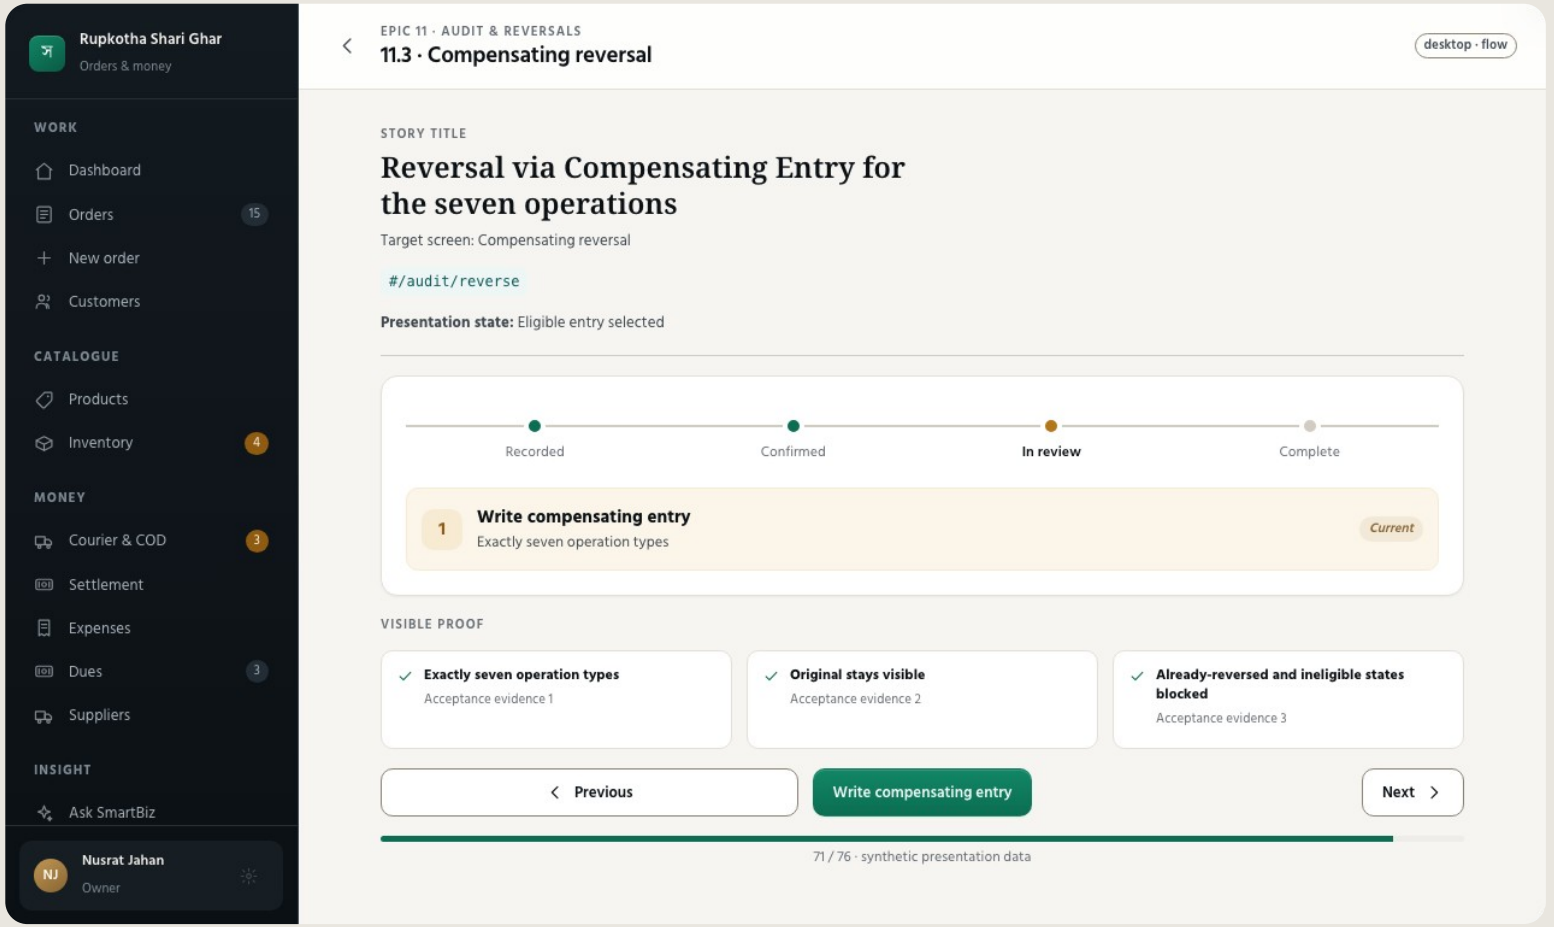

Compensating reversal

State: Eligible entry selected

Visible proof

- ✓ Exactly seven operation types
- ✓ Original stays visible
- ✓ Already-reversed and ineligible states blocked

Primary action: Write compensating entry

EPIC 12 · STORY 12.1

Safe insight assistant

Insight Provider configuration and degradation

Insight Provider states

State: Absent, failing and exhausted

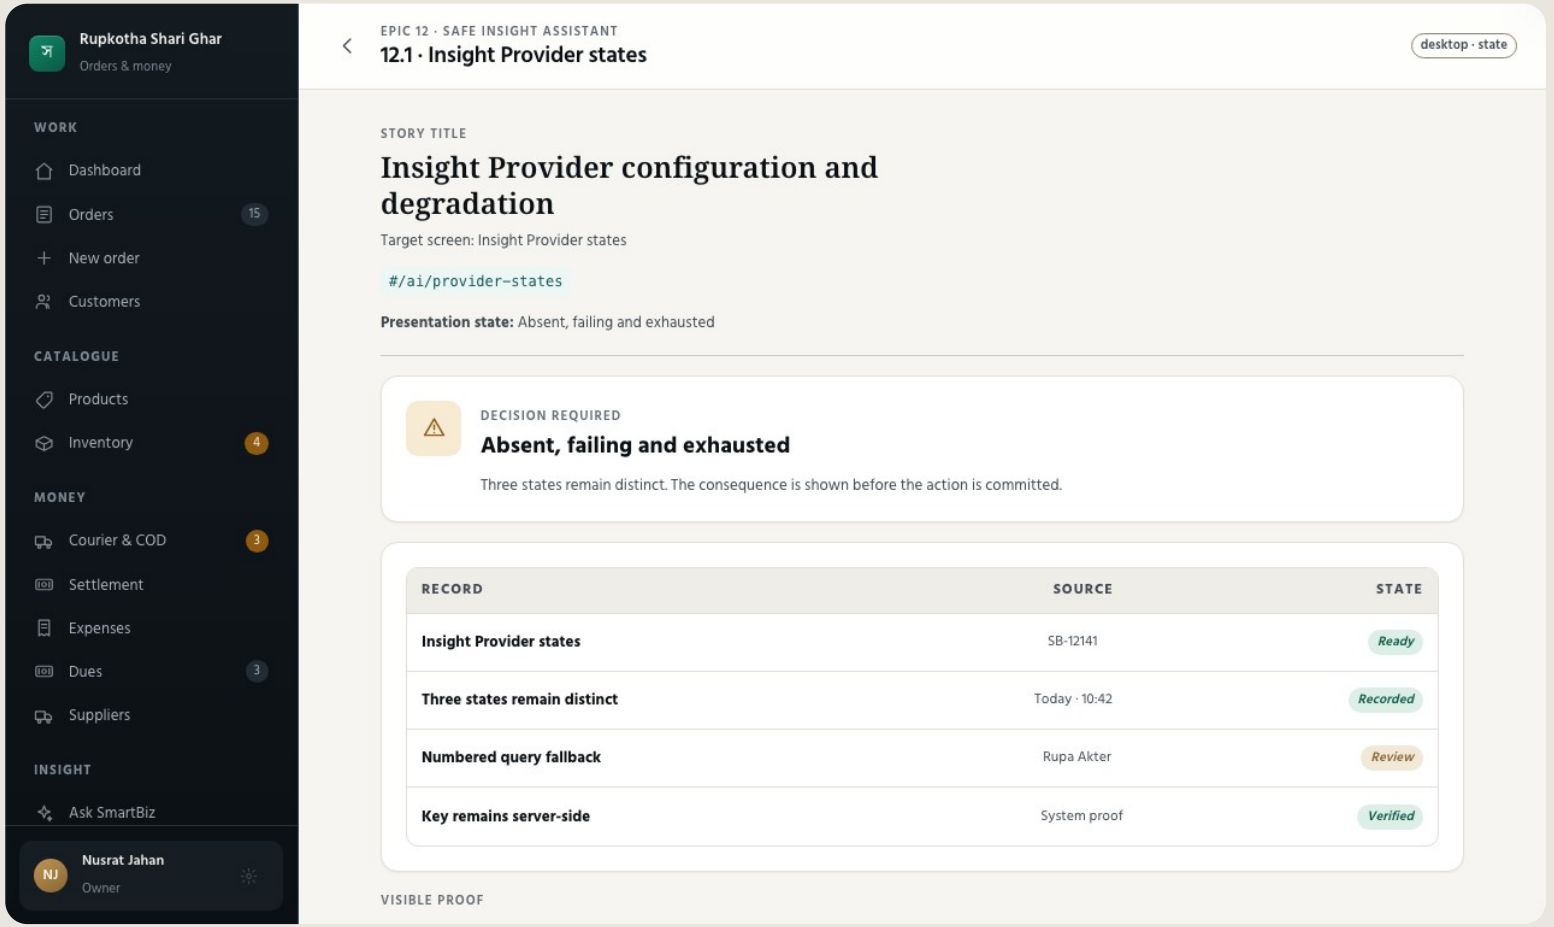

Visible proof

✓ Three states remain distinct

✓ Numbered query fallback

✓ Key remains server-side

Primary action: Compare provider outcomes

EPIC 12 · STORY 12.2

Safe insight assistant

Question Routing to ten Insight Queries

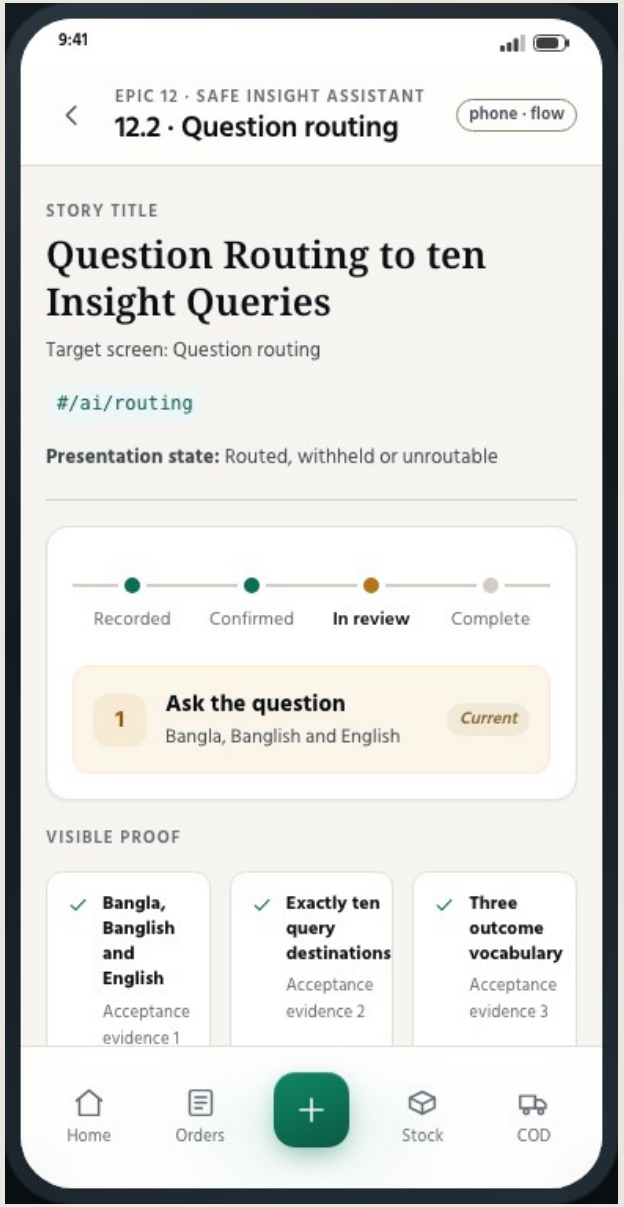

Question routing

State: Routed, withheld or unroutable

Visible proof

- ✓ Bangla, Banglish and English
- ✓ Exactly ten query destinations
- ✓ Three outcome vocabulary

Primary action: Ask the question

EPIC 12 · STORY 12.3

Safe insight assistant

Insight Query answers from Business data

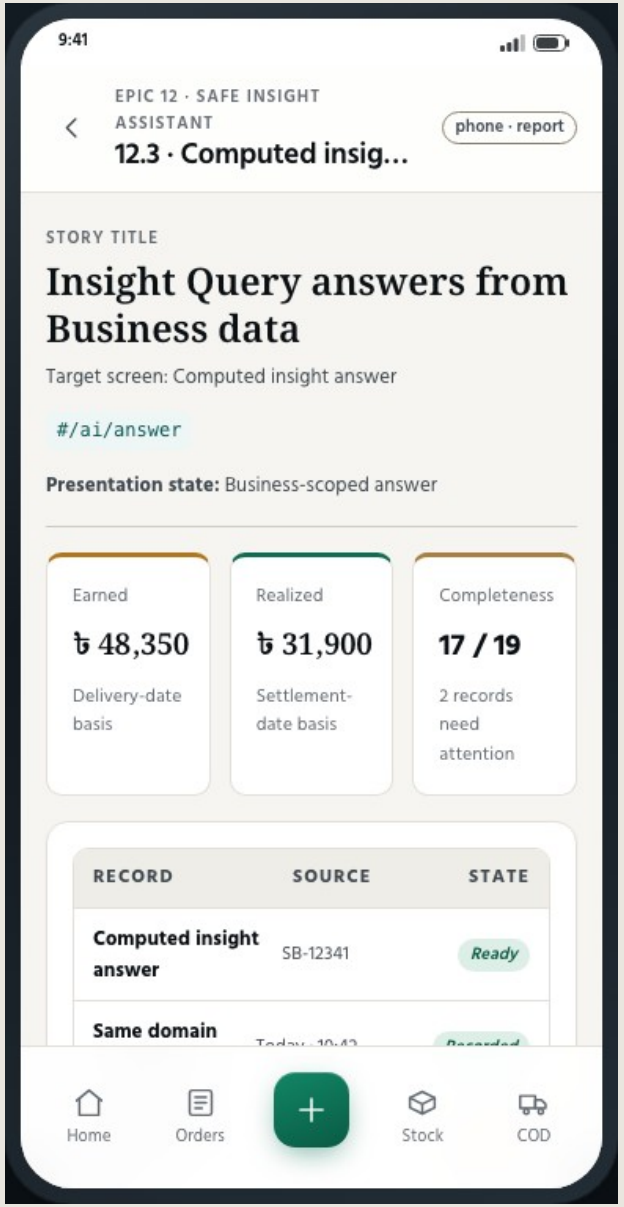

Computed insight answer

State: Business-scoped answer

Visible proof

- ✓ Same domain calculations
- ✓ Role-filtered result
- ✓ Allow-listed outbound payload

Primary action: Inspect source figures

EPIC 12 · STORY 12.4

Safe insight assistant

No-invented-number answer composition

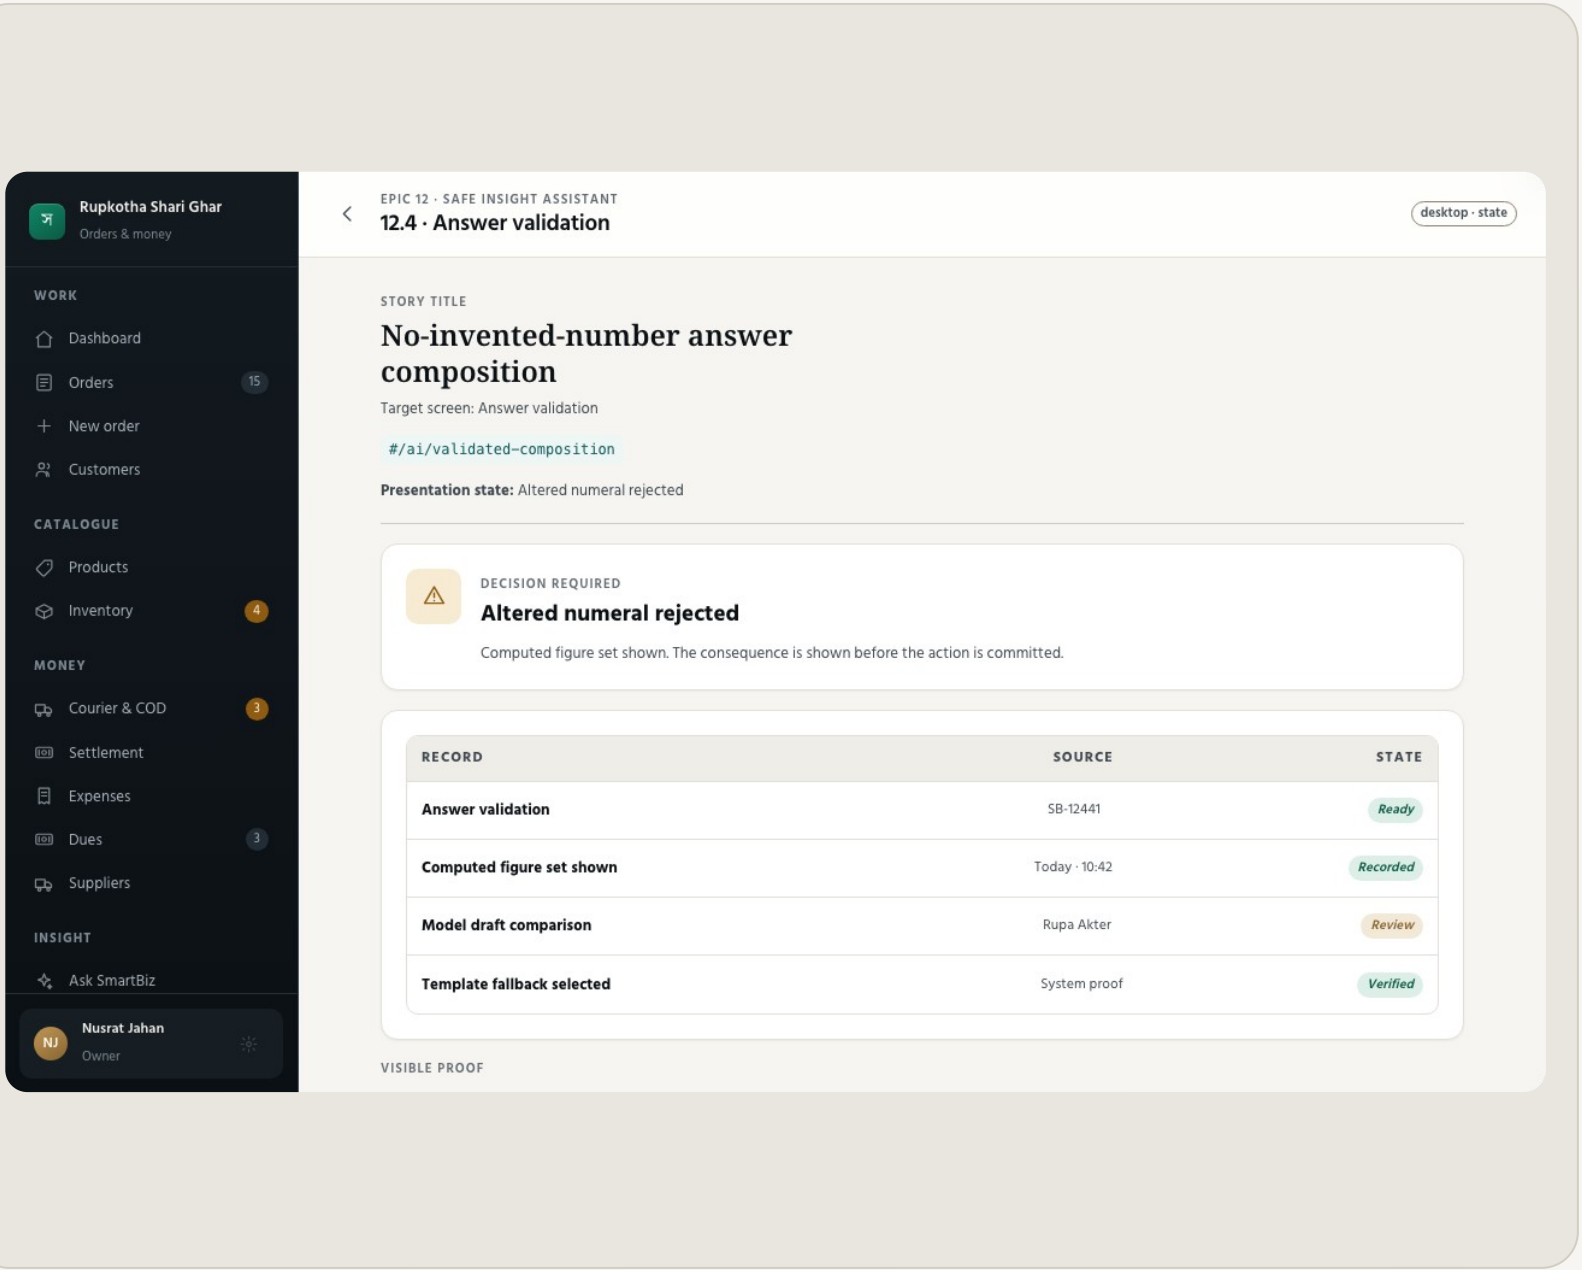

Answer validation

State: Altered numeral rejected

Visible proof

- ✓ Computed figure set shown
- ✓ Model draft comparison
- ✓ Template fallback selected

Primary action: Use safe template

EPIC 12 · STORY 12.5

Safe insight assistant

Profit change decomposition

Profit change decomposition

State: Arithmetic drivers add exactly

Visible proof

- ✓ Revenue and cost movement
- ✓ Expenses, courier charges and variances
- ✓ Signed components equal total change

Primary action: Open underlying report
